EARTH SCIENCES TASTER DAY– 4 APRIL 2017

For children in care in Year 7-11

Would you like to...

- ... find out why volcanoes erupt?
- ... see some dinosaur fossils and think about what we can learn from them?
- ... get a taste of life as a student at the University of Cambridge?

If you answered yes to ANY of the above then this FREE event is for you!

The programme includes:

- An interactive session about volcanoes and why they erupt.
- A visit to the Sedgwick Museum of Earth Sciences to see some dinosaur fossils.
- A talk about Higher Education and what it is like to be a student.
- A tour of a Cambridge College with current university students.

This event is for children in care of all abilities in school years 7-11, who are enthusiastic about education or interested in geology. The day is for anyone who is interested in exploring their future options or learning something new! Attendees are welcome to bring a foster carer/social worker/teacher with them and a foster sibling/friend if they wish. Travel for all participants is funded by the University.

To book your FREE place, please visit www.bit.ly/realiseevents

****Bookings will close on Tuesday 28 March or earlier if capacity is reached****
