

Super-curricular suggestions

Strong applicants to Cambridge and other competitive universities tend to have explored their chosen subject through wider reading outside the classroom, as well as doing very well in their [GCSEs](#) and [A-levels](#). We call this sort of exploration ‘super-curricular’, as it builds on and enhances what you are studying in school. We do not expect you to pay for this sort of exploration and have endeavoured to provide resources that are mostly freely available.

This selection of suggested reading lists and resources has been gathered from the Cambridge departmental and College websites, other universities and other sources on the internet. These lists are certainly NOT ‘required reading’ for Cambridge applicants. They simply provide some suggestions for places to start exploring your own interests in your chosen subject independently - you do not need to engage with any of the specific websites, books, podcasts etc mentioned and can easily find your own alternatives. **The following lists are suggestions only.**

It is important to read critically by thinking carefully about the arguments, assumptions and evidence presented by the author. Reading is a great way to explore subjects that you find interesting – but there are many other ways to deepen your understanding: investigate your local museums, monuments, galleries and natural features, and think analytically about nature, machinery or the built environment. After the COVID-19 lockdown, perhaps you can visit some of these!

The best thing about super-curricular activities is that there are no exams or deadlines to worry about – you are free to follow your own lines of enquiry into the areas that interest you the most. Rather than seeing this as a ‘tick box exercise’ to give you something to write about in your personal statement, you should take time to explore things that you genuinely find interesting and see where your investigations lead you.

Click on a subject link below to find some suggestions to help you explore your subject, or try one of the broad topic links at the bottom of the page. It will help applicants to explore their subject beyond the classroom not only to learn more about the subject, but also to confirm the decision whether or not to read the subject at university. There is no minimum amount of super-curricular activity expected of our applicants; they tend to explore their subject for the sake of interest.

There are some very useful general resources helpful to all subjects [here](#).

UNIVERSITY OF CAMBRIDGE

Cambridge courses

Anglo-Saxon, Norse, and Celtic	History of Art
Archaeology	Human, Social, and Political Sciences
Architecture	Land Economy
Asian and Middle Eastern Studies	Law
Chemical Engineering	Linguistics
Classics	Mathematics
Computer Science	Medicine
Economics	Modern and Medieval Languages
Education	Music
Engineering	Natural Sciences
English	Philosophy
Geography	Psychological and Behavioural Sciences
History	Theology, Religion, and Philosophy of Religion
History and Modern Languages	Veterinary Medicine
History and Politics	General resources for all subjects
