

## Undergraduate Tuition Fees 2017-18

This document applies to you if you are intending to apply to Cambridge to commence studies in 2017-18.

- 1) Colleges collect all fees on behalf of the University, ie they act as the fee collecting agent for the University.
- 2) In order to know which fee you will be charged, the College will look at:
  - a) Your **fee status** (expressed as either 'Home/EU' or 'overseas')

Fee status depends on both nationality and residency. Further guidance is available but, in short, if you are a UK or EU national **and** have been resident in the UK or EU for the last three years up until the 1 September before the course starts, you will be 'Home/EU' fee status. Otherwise, you are likely to be 'overseas' fee status, but please note there are a number of exceptions to this rule which may qualify you to be 'Home/EU' instead: you will normally need to provide further information on your family history, parental employment, your education and your recent residence to make a decision.

- b) Your **previous highest qualification at the point of matriculation**

This only needs to be considered if you are a 'Home/EU' student, and will dictate whether or not you (a) should be charged the regulated fee – which is the fee which the University is permitted to charge by the government – and (b) can access tuition fee loans through Student Finance England. If you already have a first degree or equivalent, you normally are not eligible for the government-sponsored funding, and are subject to paying the fees listed under the 'Second UG degree' column and the separate College Fee (as indicated by the +), except if you will be studying Architecture, Medicine or Veterinary Medicine (as indicated).

- 3) If you are categorised by your College as a Home/EU student, and you are studying your first undergraduate degree, your tuition fee will be expressed as a single amount (that the University and the Colleges share). This also applies if you are a Home/EU student studying Architecture, Medicine or Veterinary Medicine, whether or not it is your first degree.

Otherwise, your tuition fee will be expressed in your formal offer as two separate amounts, which correspond to a University fee and a College fee. The precise amount of the fee will depend both on your course and your College, as outlined in the table overleaf.

	Home/EU students		Overseas students+
	First UG degree (and Second UG degree in Architecture, and Medical and Veterinary Sciences).	Second UG degree (except for Architecture, and Medical and Veterinary Sciences).	
	Annual fees are subject to change year on year, and depend on UK government policy and restrictions ('regulated fees'), which may change at any time See note § below. It is likely this figure will increase annually with inflation.	Annual fees are subject to change year on year, except for Architecture, and Medical and Veterinary Sciences. In the past, this figure has been an increase of around 2-3% per annum.	Annual fees are subject to change year on year.  In the past, this figure has been an increase of around 5-6% per annum.

\* In Mathematics, and some of the Engineering and Natural Sciences subjects, you may continue onto an 'advanced undergraduate degree' leading to a Masters qualification (MMath, MEng, MSci). For these subjects, the same annual fee as outlined above will apply (notwithstanding the annual fee increases year on year as indicated above).

§ Regulated fees for Home/EU students: The University's ability lawfully to charge Home/EU students less than overseas students depends on the Education (Fees and Awards) (England) Regulations 2007. Government policy for fees for 2017-18 and later is currently being reviewed. The University commits to charging fees at a level no higher than the maximum fee loan and intends to set its fee at that maximum level. The UK Government has announced an increase of that level to £9,250 for 2017-18, and an expectation that this will then rise annually with inflation, but has yet to ratify it. New students should therefore plan for annual increases in the fee (and government-supported loan) by a rate corresponding to the Retail Price Index.

The University also confirms that students who would currently qualify for the regulated fee (as defined in the legislation above), to the best of its knowledge, will be eligible for the regulated fee in 2017-18. Students will continue to be eligible for the regulated fee for the full duration of their course, provided that this continues to be permitted by UK law.

+ Indicates that you need to add on a College fee to calculate your final fee.
