Cambridge has welcomed and nurtured students for hundreds of years.

The collegiate University is bound together by a deep-rooted sense of community and shared purpose. Our commitment to excellence in education, learning and research is uncompromising, and lived out in practice every day in our lecture theatres and supervision rooms, our libraries and labs.

My student days at Cambridge offered me the precious opportunity to challenge and deepen my knowledge. But they also provided the space and the time to broaden my intellectual horizons, allowing me to read voraciously and widely, and to interact with one of the most stimulating and diverse groups of people I had ever met – staff and students from around the globe.

At Cambridge, we continue to reach our hands outward. As we do so, we welcome an ever more diverse group of students who have the desire and ability to learn and produce new insights that shift and deepen our understanding of the world around us.

**Professor Stephen Toope**
Vice-Chancellor
Welcome to Cambridge

Cambridge is one of the best universities in the world, offering undergraduate degree courses (also called Triposes here) in the arts and humanities, social sciences, sciences and engineering.

Top 5
- in 2018 in the Academic Ranking of World Universities and Times Higher Education World University Rankings.

Top 10
- for academic experience, accommodation, and industry connections (Times Higher Education Student Experience Survey 2018).
- Cambridge guarantees most students College-owned accommodation for at least three years (see p24-25).
- Cambridge is one of the top ten universities most often targeted by Britain’s leading graduate employers (The Graduate Market in 2018).
- 150 open days and events in Cambridge each year for you to visit us (p154-5).

90%
- of our 2017 graduates were in employment or further study six months after graduating (see p34-5).

Cambridge Open Days

Whether you know lots about the University or almost nothing, come along to an Open Day and see for yourself what we have to offer. See p154 and visit our website for information and booking.

4 and 5 July 2019

www.cam.ac.uk/opendays
More than 65 subjects are offered within our undergraduate courses - see the Index (p160-2) for a full list of subjects.
For advice on how to choose a College see p118-20 and look through the College profiles to find out more.

A collegiate university: who does what?

Cambridge is a ‘collegiate’ university – it’s made up of faculties/departments in different academic subjects and Colleges.

**The University** (through its faculties/departments):
- determines course content
- organises lectures, seminars, practicals and projects
- sets and marks examinations
- awards degrees

**The Colleges:**
- admit undergraduate students
- organise small-group teaching (supervisions)
- offer accommodation, places to eat and recreational facilities
- provide pastoral and academic care

Make sure to check relevant websites (referred to throughout this Prospectus) for further details, advice relevant to some students and courses, as well as the most up-to-date information.
Cambridge Students

To help you to get a sense of what it’s like to study here, we’ve included comments from some of our students throughout this Prospectus. You can listen to more student perspectives online.

www.youtube.com/CambridgeUniversity

Cambridge is a fantastic place to live while studying and has everything you could want from a city, with loads of pubs and bars, museums, theatres, and cafés.

With the College and supervision systems, it’s really hard to slip through the gaps, both in terms of welfare and your academic life. Seeing your supervisor every week means if you start to struggle with your work, it’s picked up on really quickly and there are lots of provisions in place to make sure you get back up to speed.

Charlie
Stoke-on-Trent

Cambridge is such a beautiful place to live and work, and I always feel safe when out and about. Walking down to Grantchester, visiting the orchard and tearooms is a definite ‘bucket list’ item for the summer. Seeing the Footlights at the ADC Theatre is also a great evening out and you never know if you’ll see the next big acting name when they’re just starting out!

Laura
Horsham
The Careers Service is excellent – I’ve been to a number of useful events and talks. The main way I’ve benefited is through an internship scheme. It’s run by the Careers Service and places undergraduates (and recent graduates) with organisations for summer internship positions. I obtained an eight-week internship. It was a brilliant experience: I developed lots of valuable skills, made useful contributions to a charity’s work and learned an awful lot.

Bryony
Wolverhampton

I chose my course because it offered flexibility to pursue different options, allowing me to not only study one subject, but a range of related topics. The course is rigorous and challenging, and always pushes you to be the best you can be while offering the resources to do so. Although the workload can be heavy, by organising myself properly I still make plenty of time for relaxing and socialising.

Making friends was one of my biggest worries coming to Cambridge, but there are so many people who share your interests. I’ve made great friends and the College system makes it really easy to meet people. I’ve joined science and sports societies as well as helping out with University outreach, so there’s really something for everyone if you want to meet people or learn something new.

Ceara
Belfast

Supervisions are great. Having like-minded people around you 24/7 really pushes you and motivates you. You get to discuss and talk about things that you never could before.

Zain
Mauritius
Applying to Cambridge

If you want to apply to the University, you do so through UCAS. However, at Cambridge the process starts earlier to allow time for all of the application information to be gathered and considered. This section guides you through the process and explains what we’re looking for in prospective students and how we assess applications.

1 Course
You’re going to be studying to a very high level for several years, so, make sure you choose a course you’re personally interested in and will really enjoy studying! See p44-117 for course information.

Visit one of our Open Days to find out more about the courses on offer. See p154 for dates and how to book.

2 College
Where would you like to live when you’re here? In your UCAS application, indicate if you have a preference College or if you’re making an open application.

See p118-20 for guidance on choosing.
Remember —
The application deadline 15 October!

Apply
Submit your UCAS application online¹ by 15 October² — our institution code is CAM C05.

Soon after, submit your Supplementary Application Questionnaire (SAQ) — a few extra questions requesting information not included in your UCAS application which we find helpful.

You’ll find more information about what we look for in your application on the next few pages.

Written assessment
Most applicants are required to take a written assessment, either pre-interview or at interview (if interviewed).

Interview
Everyone with a realistic chance of being offered a place is invited to attend an interview (see p9). That’s around 75 per cent of applicants each year.

If you decide to apply, you can find films and full information about interviews online.

Decision
We’ll advise you of our decision before the end of January.

See p10.

¹ You also need to submit an additional application form if you’re living or attending school/college outside the EU at the time of application (see p11), applying for the Graduate Course in Medicine (see p91), and/or applying for an Organ Scholarship (see p19). Please note that it’s not possible to apply to both the Universities of Cambridge and Oxford in the same year.

² Other application deadlines apply for those wishing to be considered for interview in particular overseas countries (see p40), and for some mature applicants (see p37).
What are we looking for?
Admissions decisions at the University are based solely on academic criteria – your ability and potential. We assess everyone individually, which means that we look at – and for – different things in different people for different courses. Consequently, there’s no magic formula that will guarantee you’re offered a place. However, all Admissions Tutors are looking for students who they believe:

• have the most academic ability and potential
• will benefit from and flourish in the Cambridge learning environment
• are best suited to the course for which they applied

Academic ability and potential
We’re looking for students with the academic ability and potential to flourish at the University. Therefore, you should be aiming for excellent examination grades.

• Typical A Level/IB offers and subject requirements are outlined on the relevant course pages (see p44-117).
• Further guidance on entry requirements as well as typical offers for a range of other qualifications – including Scottish and Welsh qualifications and the Irish Leaving Certificate – can be found on p151-2.
• Our Subject Matters leaflet (www.cam.ac.uk/ugpublications) gives advice to GCSE students about how to choose the most appropriate subjects and subject combinations at A Level.

Learning at Cambridge
We’re looking for an indication of your ability to think critically and independently, and your willingness to argue logically while keeping your mind open to new ideas. You also need self-discipline, motivation, commitment, and the desire and potential to go beyond what you’ve learned so far. See also p12.

Suitability and enthusiasm for your course
Finally, we’re looking for students who really want to learn about the subject they’ve applied for and aren’t just interested in the degree at the end, important though this is. Think carefully about your options and which course(s) and subject area(s) you’re most enthused and inspired about studying for the next few years.

If you think you have these qualities, we’re looking for students like you and hope you’ll apply.
How do we assess applications?
There’s no blueprint for an ideal Cambridge student and we want to give applicants as many opportunities as possible to demonstrate their strengths and potential. Therefore, each application is considered individually and holistically, using all of the following information:

- academic record
- school/college reference
- personal statement
- any written work submitted
- performance in any written assessment
- contextual data
- performance at interview (if interviewed)

Further information
www.cam.ac.uk/apply

The interview process
Everyone with a realistic chance of being offered a place is invited to attend an interview, so it’s a good idea to be aware of what might happen during your interview so you can be fully prepared.

Interviews help our Admissions Tutors to get to know you and your motivations for applying to Cambridge; they contribute to our assessment of your academic potential and suitability for your chosen course, while giving you the opportunity to expand on the written elements of your application.

What do interviews involve?
The form and length of interviews varies from subject to subject and from College to College. You’ll have one, two or three interviews (most commonly two), each lasting between 20 and 45 minutes.

If you’re applying for a course which has an at-interview written assessment, you will normally sit this on the same day as your interview (see p43).

How should I prepare?
There aren’t any special tricks to preparing for interviews, however there are some things you can do beforehand which will, at the very least, make you feel more confident.

- Watch our interview films to give you an idea of what to expect on the day.
- Re-read your personal statement and any written work.
- Read around your subject and think about any particular topics you’d like to talk about.
- Practise talking and answering questions about your subject and wider academic interests with your friends, family and/or teachers.

For more tips, advice and interview films, visit our website (www.cam.ac.uk/interviews).

Probably the most important tips are to be on time, be as relaxed as possible, and, above all, be yourself!
Applying to Cambridge

Our decision

All undergraduate admissions decisions are the responsibility of the Cambridge Colleges. Following the assessment of your application, there are two possible outcomes.

1. **You’re made an offer.**
   This might be from the College you applied/were allocated to, or from a different College as a result of your application being ‘pooled’ (see left). An offer may be unconditional, or conditional and dependent on achieving certain grades in the qualifications you’re taking (the University makes unconditional offers only to those who have already met the conditions for entry to their chosen course).

2. **Your application is unsuccessful.**
   With around five applications per place, every year we have to turn down many students whom we would like to have taken. If your application isn’t successful, although this may be disappointing, we hope you’ll have found the process a useful experience and valuable preparation for your other university choices.

---

**The pools**

The ‘winter pool’ is designed to ensure that the best applicants who have been squeezed out by the competition at their original College are offered places – Colleges would rather admit a strong applicant from the pool than a weaker applicant who applied directly/was allocated to them.

Although impressed by your application, your College may not have a place for you and so may pool your application for other Colleges to consider.

Some pooled applicants may be asked to attend another interview in early January. When all pooled applications have been reviewed, you may be offered a place by a different College. If no College can offer you a place, your original College will advise you of this decision by the end of January.

Typically, one in four applicants is pooled and, of these, around one in five is made an offer of a place by a different College from the one they applied/were allocated to (954 for 2018 entry).

In a few cases, offer holders who haven’t quite met the conditions of their original offer may still be offered a place following a small ‘summer pool’ that takes place once examination results are released.

---

1 There’s an overseas application fee associated with the COPA, as well as an interview fee for those interviewed overseas. See the website for more information.

2 Other application deadlines apply for those wishing to be considered for interview in particular overseas countries (see p40).
What's the most important part of my application?

Every application is assessed holistically – Admissions Tutors consider all of the information available (see p9) together before making any decisions. While the most recent academic performance carries the greatest weight, the relative importance of each element varies because each student is different. No part of an application is considered in isolation; for example, a student’s performance at interview alone doesn’t determine the outcome of their application. See also p153 for other frequently asked questions.

Applying from outside the EU

If you’re living and/or attending school/college outside the EU at the time of your application, in addition to your online UCAS application you need to submit a Cambridge Online Preliminary Application (COPA).³

If you’re attending school/college within the EU at the time of your application (even if you live outside the EU), you don’t need to submit a COPA.

For most students, the UCAS application must be submitted by 15 October 2019 and the COPA submitted by 19 October 2019.²

www.cam.ac.uk/apply

Extenuating circumstances

If you have experienced health or personal problems, disability or difficulties with your schooling, your school or college referee (or GP or social worker) should complete our Extenuating Circumstances Form (available online) by 15 October 2019.

The information provided on the form gives context against which Admissions Tutors can consider your academic record and, if appropriate, your performance at interview.

The sort of extenuating circumstances that this form should be used to advise us of include:

• a serious, acute or chronic medical condition (especially since the age of 14)
• significant caring responsibilities or recent bereavement or serious illness within close family
• any kind of disruption due to adverse family circumstances
• serious disruption due to educational provision at school/college
• other circumstances where disruption has occurred

See online for more details. If you or your referee wish to discuss your particular situation, please contact a College admissions office for advice as early as possible.

www.cam.ac.uk/apply
Teaching and Learning

Cambridge is known and respected across the globe for the excellence of our teaching and research, and the quality of our graduates. Not only are you taught in the lecture theatre by academics who are experts in their field, but our supervision system means that you receive more personal tuition from them too.

How you’re taught

At Cambridge, the University faculty or department arranges lectures, seminars and practicals that students from all Colleges attend together. Your College also arranges supervisions for you. You can find out more about what these involve opposite.

Each academic year consists of three eight-week terms¹. As the terms are short, the pace and volume of work is likely to be greater than you’re currently used to and there’s much greater emphasis on independent and self-directed study here compared to school or college.

During term time, you’re expected to spend an average of 42-46 hours a week on your academic studies (including teaching/contact time and independent study), and you also need to undertake some work during the vacations (eg further reading/research, revision, assignments).

Every student adjusts to this new workload in their own way and time, and there are plenty of people who can offer advice and support while you get settled in and throughout your degree (see p26-9).

¹All students must ordinarily be available to study in Cambridge for the full duration of their course (with the exception of a year abroad, where part of the course).
Teaching methods

Lectures
Lectures act as a starting point for your own research and typically last around 50 minutes. Depending on the subject anywhere up to several hundred students may attend. Many lecturers are leading academics working at the forefront of their field, so lectures are a fantastic opportunity to find out about the latest research.

Seminars and classes
These are usually for medium-sized groups (eg 10-30 students), last between one and two hours, and provide the opportunity to discuss particular topics in more detail. They’re led by academics but you’re expected to contribute actively.

Practicals
Sometimes called ‘labs’ or laboratory classes. Practical work on some courses may be assessed.

Supervisions
Supervisions provide regular small-group tuition with subject specialists. This system of personal tuition is one of Cambridge’s greatest strengths. Supervisions provide the opportunity to explore your subject more deeply, discuss your own work and ideas, and receive regular feedback. As they aren’t assessed, supervisions provide the ideal environment for you to test your ideas and interests, while encouraging you to develop your thinking.

- Supervisions are small-group sessions (most often for between one and three students) with a supervisor (an academic), which are organised by your Director of Studies (see p26).
- You do some preparation for each supervision – usually reading, writing an essay or working on some problems. In the session, you get feedback on your work and talk about/present your ideas.
- Supervisors are specialists in particular subject areas (they may be one of the country’s or world’s leading authorities). Throughout your course your supervisors will change depending on what you are studying at the time.
- Typically, you have one or two hour-long supervisions each week, though the frequency varies from course to course.

Field trips, study visits, language courses, study abroad
Several courses include opportunities to go on field trips, study visits or language courses, or to study abroad through exchange programmes. Naturally, where you go, how long for and what you do varies depending on your course. The faculties, departments and Colleges often have funds available to help you go on trips in Britain and abroad.

Independent research
A chance to carry out your own research, test out theories and put forward your own ideas. Your work might even get published while you’re still an undergraduate.

Work experience
Some courses include a period of work experience, giving you a chance to explore potential career paths, develop your employability skills and create networks that could lead to job opportunities after you graduate.

Refer to the individual course outlines (p44-117) and faculty/department websites for more details about teaching.

Further information
www.cam.ac.uk/courses

Top 5 for academic experience (THE Student Experience Survey 2018).
Facilities and resources
We admit the most academically able and motivated students and provide them with inspiring, world class teaching. We're confident that we also offer the best resources and facilities to support their learning.

Libraries
You certainly won’t be short of libraries at Cambridge – the collegiate University has more than 100!
- College libraries contain standard course texts and other related materials.
- Faculty and department libraries offer more specialised collections and electronic resources for particular subjects.
- The University Library (or UL) is a legal deposit library holding more than eight million books, journals and other documents ranging in age from ancient manuscripts to a vast range of electronic resources available for you to access from anywhere.
- You can use the online Spacefinder tool to find out about libraries and other study spaces across the city.

To ensure you get the most from the University’s libraries, the UL and many of the College, faculty and department libraries offer practical sessions and one-to-one help. These include introductory tours, sessions to highlight the resources available for particular disciplines and information skills classes.

Further information
www.lib.cam.ac.uk/teaching-and-learning
Computing and IT
University Information Services (UIS) works in partnership with your College and department to provide for all your computing needs while you are at Cambridge. This ranges from the provision of wi-fi throughout the University and Colleges, to access to specialist computer rooms and advanced research computing services.

UIS offers all students comprehensive IT support, including:
• a service desk
• free email accounts and file storage
• free software, including Microsoft Office and McAfee antivirus protection
• free IT training courses.

Further information
www.uis.cam.ac.uk

Language Centre
The Language Centre provides language-learning opportunities to all students wishing to take up or continue a language. Our Language Programme (CULP) offers taught courses at various levels in a number of languages. We also run a popular conversation exchange scheme with native speakers, and conversation sessions for students to maintain their spoken ability. For international students, we offer an academic English support programme.

Our range of static and interactive resources includes books, CDs, foreign films and online programmes. In addition, the John Trim Centre houses self-study resources in more than 180 languages (including English) and a dedicated Advising Team is on hand to help.

Further information
www.langcen.cam.ac.uk

Museums and collections
Cambridge has nine specialist museums and collections, all of which are open to students and the public. The fascinating exhibits range from dinosaurs to modern art, and rock samples to Rembrandt. Even if none relates directly to your course, a look at the whale skeletons, classical sculpture or the totem poles from Vancouver has to add something to your time at Cambridge!

Further information
www.cam.ac.uk/museums

Further information
www.langcen.cam.ac.uk
Student Life

We have a great social scene here. There’s loads going on within the University and Colleges, and with students accounting for about a fifth of the city’s overall population, Cambridge is a great place to be a student.

What can I say about Cambridge? With tailored teaching, specialised facilities and world-leading academics, I’ve found Cambridge a spectacular institution at which to be an undergraduate.

It’s not all about the teaching though. You’ll find hundreds of student societies, world class sports, debating, performances, art and more – everyone finds their own hobbies and passions.

As your central students’ union, CUSU is here to ensure that the student experience is as fulfilling as possible and that you have access to the resources and information needed to make the most of your time here. As officers elected by you, we represent your interests on committees, offer essential professional services, and provide welfare support and training.

Students are always welcome to pop into the CUSU offices for a chat with the Sabbatical Officer Team – tell us how you want to shape the University and we’ll help you to do it.

The CUSU Team wishes you all the best in your application.

Evie Aspinall
CUSU President

100s of student clubs to choose from.
Cambridge University Students’ Union (CUSU)

Your time at Cambridge isn’t just about academic work – it’s important that you have time out from your studies and get involved socially too.

CUSU represents the interests of all University students and provides a range of central services and support beyond those delivered by the Colleges.

Led by six elected full-time student officers, CUSU:

- represents the student body on University committees
- runs the professionally staffed Advice Service
- offers training to College officers to deliver welfare support and services
- champions diversity and access group campaigns
- manages the Alternative Prospectus website (which includes the ‘Ask a Student’ facility)

Every College also has its own students’ union, to which undergraduates are elected to represent students at a College level. So, if you want to have a say in student affairs, consider running for election!

Student societies

University is about trying new things. At Cambridge, you can do almost anything at almost any level, from ‘having a go’ to semi-professional. Your extra-curricular activities might provide a springboard for careers or be part of life beyond university too.

Community and charity

Cambridge students are very active in numerous community projects, campaigns and charity work, both locally and worldwide.

Cambridge RAG raises more than £100,000 annually for 10 student-selected charities. Jailbreak is one of their most popular fundraisers, with sponsored students racing to get as far as possible without spending anything in just 36 hours. Former jailbreakers have reached Australia, Brazil, Singapore, Spain and New York.

Other community and charity groups include:

- Amnesty International
- Nightline
- Cambridge Student Community Action

Drama

Cambridge is renowned for its student-produced drama. From the cutting-edge comedy of the Cambridge Footlights to classical plays, popular musicals and original productions, there’s something for everyone.

Auditions are often open to all and there are opportunities to direct, produce, and get involved with set design, lighting, sound, stage management, costume, make-up and front of house, even if you’ve never done it before.

There are excellent performing arts facilities around Cambridge. In addition to the University’s ADC Theatre, a number of Colleges have their own purpose-built auditoria and several major productions take place in the city’s Corn Exchange and Arts Theatre.

Other drama societies include:

- Marlowe Society
- Cambridge Impronauts
- Musical Theatre Society

Continued overleaf
Media
If you’d like to try your hand at journalism, there are two student newspapers (Varsity and The Cambridge Student) and various other publications to get involved with. As well as CU-TV and the University’s award-winning radio station, Cam FM, (presented by University members and offering training in many aspects of radio), there are groups focused on photography and film-making.

Other media societies include:
- Bluesci magazine
- The Cambridge Globalist
- Cambridge Film Association

Politics
Cambridge is politically diverse and engaged, so it’s a great place for students to debate local, national and international issues or just learn more about them.

There are numerous political clubs and societies, such as CUSU, your College students’ union, and the Union Society, where high profile speakers – which have included Senator Bernie Sanders, Leomie Anderson, Stephen Fry and Judith Kerr – speak alongside students.

Other political societies include:
- Cambridge Defend Education
- TEDxCambridgeUniversity

Other interests?
As well as those already mentioned there are societies relating to:
- dance
- the environment
- food and drink
- games and hobbies
- religion/faith
- science and technology
- academic subjects

See the Societies Directory on the CUSU website for the full range. If there isn’t a group or society for your particular passion or interest at the moment, you could start one – all you have to do is find a few like-minded people.

Further information
www.cusu.co.uk/get-involved/societies

I would recommend trying out lots of different things and seeing what fits with you. I tried going to the Massage Society in my first term with my friend for a laugh and absolutely hated it, but she still goes!

University is a great time to find out more about what you do and don’t love, and being really involved in different societies is a wonderful way to make friends across all of the different Colleges.

Rachel
Birmingham
Music

There’s an enormous range of music societies and student bands, for any style and level of experience. Many Colleges run open mic nights and numerous bands, choirs and orchestras regularly record and tour nationally and internationally.

The Faculty of Music offers masterclasses and workshops, and has an extensive collection of instruments that can be used by students (some instruments may be available to hire).

Music groups include:

- a capella groups
- Baroque Ensemble
- Brass Band Society
- Ceilidh Band
- Chamber Orchestra
- Concert Band
- Jazz Orchestra
- Mixtape Society
- Opera Society
- Recorder Ensemble
- Rock Society
- Show Choir
- String Ensemble
- Symphony Orchestra

Music awards

If you’re already a singer/chorister, organist or instrumentalist of a high standard, you may like to consider one of our music awards.

Choral and organ awards

Student organists and choristers provide music for regular chapel services and perform in College concerts, with some touring in the UK or abroad. The awards vary from College to College but all include a small financial contribution and some support for music lessons.

Instrumental Awards Scheme

The Instrumental Awards Scheme enables gifted musicians to reach a high standard of performance in chamber music. Successful students are award-holders for a year, and receive a small financial contribution (an ‘exhibition’), professional coaching of their ensemble, masterclasses, recital opportunities and a subsidy for instrumental lessons.

Players of violin, viola, cello, flute, oboe, clarinet, bassoon, French horn or piano are eligible to apply. Associate membership of the Scheme is open to players of trumpet, horn, trombone and tuba, and other standard orchestral instruments used in chamber repertory (eg double bass, harp). A minimum of Distinction at Grade 8 of the Associated Board or similar is required, though please note that most successful candidates are of Diploma standard.

Further details of the Choral Award, Organ Scholarship and Instrumental Awards Schemes are available online, and individual College websites provide information about the musical activities undertaken and enjoyed by their music award-holders.

Music awards application deadlines

- Organ Scholarship Scheme – 1 September 2019
- Choral Award Scheme – 15 February 2020
- Instrumental Awards Scheme – 28 February 2020

Further information

www.cam.ac.uk/musicawards
The sports scene at Cambridge is diverse and welcomes everyone from elite athletes to absolute beginners. Whether you want to continue playing a sport you love or try something new, the University and Colleges offer a variety of facilities and support services to help you lead a healthy and active lifestyle.

More than 80 sports and activities including:
- American football
- athletics
- badminton
- basketball
- boxing
- cheerleading
- cricket
- cycling
- dance
- golf
- gymnastics
- handball
- hockey
- ice hockey
- mixed martial arts
- modern pentathlon
- netball
- orienteering
- pilates
- powerlifting
- rowing
- rugby
- skiing
- snowboarding
- squash
- swimming
- trampolining
- triathlon
- Ultimate Frisbee
- volleyball
- water polo
- windsurfing
- yoga
Sport for all levels
There are College teams for novices and experts alike. You could get involved in the extensive range of sports available via inter-college competition, or try out to represent the University against other universities, and local and national club sides.

Many teams compete in BUCS (British Universities & Colleges Sport) competitions throughout the season, giving them the opportunity to try their talents against the best teams from universities throughout the UK. Varsity matches, played against the University of Oxford across a range of sports, are a highlight of the season.

Staying active
You don’t have to get involved in team sports to stay active while you’re here at Cambridge – you can join our wide range of group fitness classes or take part in our beginners’ strength and conditioning and personal training programmes.

Facilities
The University’s facilities are based at three sites around the city, each providing the space and equipment for a range of activities. Colleges also provide facilities for traditional team games and sports such as tennis and rowing, and many have their own gym and other sports facilities too.

The University’s Sports Centre provides for a range of sports and features:
- a gym (plus flexible student gym memberships and personal training)
- a strength and conditioning room with eight Olympic lifting platforms and plyometric track
- a multi-purpose room for fitness classes, martial arts and dance
- a 37m x 34m sports hall
- team training room
- squash courts
- a physiotherapy and sports injury clinic

In addition, we offer facilities for athletics – including an eight-lane track – three sand-dressed hockey pitches, a cricket pitch and indoor cricket school, and three hard and eight grass tennis courts.

Financial support
Some financial support is available for students studying at the University who play competitive sport at a high level or wish to progress within coaching or officiating. For further details see the Sports Service website.

To find out more about competitive and recreational sport at Cambridge, visit our website and drop into the Sports Fair to meet representatives from many of our clubs.

In and around Cambridge

Cambridge is a vibrant city that embraces the old and the new. It combines the welcoming feel of a small town with the variety and energy of a larger city.

Entertainment and comedy

However you like to spend your time, there’s always something to keep you entertained. Cambridge has four theatres, three cinemas, and two major entertainment venues – The Junction and The Corn Exchange – offering varied programmes that include comedy, drama, dance, concerts and club nights.

Those into comedy won’t be disappointed as, along with student groups and the annual Comedy Festival in July (featuring many Edinburgh previews), Cambridge regularly attracts top stand-up acts. In the last year, the city has hosted Adam Buxton, Reginald D Hunter, Henning Wehn, Zoe Lyons, Sarah Millican, Dylan Moran, Ross Noble, Sarah Pascoe and Nish Kumar.

The city also offers lots of other events, fairs and festivals throughout the year, including:

- Watersprite International Student Film Festival
- History Festival
- Literary Festival
- Eat Cambridge Festival
- Beer Festival
- Strawberry Fair
- Midsummer Fair
- Shakespeare Festival
- Film Festival
- Dragonboat Festival
- Mill Road Winter Fair
Music
Live music is a big part of life in both the city and University, from buskers and pub gigs, to classical concerts and big name acts. Among many others, St. Vincent, Travis, Caro Emerald, The Vaccines, Jools Holland, Agnes Obel, They Might be Giants, Ezra Furman, Razorlight, Orbital and the Royal Philharmonic Orchestra have all performed here in the last year.

The city hosts a growing number of music festivals too. Most well-known is the Folk Festival, but others include the Jazz Festival, Jazz and Brass in the Parks, the Rock Festival and the Buskers and Street Performers Festival.

Pubs, clubs and restaurants
Cambridge has a great range of pubs – there are more than 100 before you start to count the dozens of College and University bars! The city has a mix of clubs offering everything you’d expect – a variety of music nights alongside cheap entry and offers for students.

There’s a great selection of places to eat too. Something for any mood, taste, occasion, and price range. Better still, there are lots of discounts and special deals for students at various restaurants and cafés.

Shopping
Cambridge’s three shopping centres and the city’s central streets house most high street names alongside independent shops and boutiques. The stalls in Market Square sell handmade jewellery, vintage clothes books and much more. You can pick up baked goods and local produce as well as a range of street food.

Just on the edge of the city centre, is an eclectic mix of shops, cafés and restaurants on Mill Road (www.mill-road.com), offering anything from just about anywhere in the world and to suit any budget.

Outside the city
If you want to explore further afield, London is just 50 minutes away by train and there’s plenty to discover in the region, for instance:

- walking and cycling routes
- punting up the river to Grantchester
- Ely and its cathedral
- local National Trust and English Heritage properties
- nature reserves, wildlife parks and zoos
- karting, a real snow slope, and indoor skydiving
Accommodation

Cambridge guarantees most students College-owned accommodation for three years, and many Colleges provide for fourth-year students too, so you don’t have to find private accommodation during that time.¹ Much more than just a hall of residence, your College is where you do a lot of your studying and socialising.

Top 10
for good accommodation (THE Student Experience Survey 2018).

Not far to travel
Accommodation is close to the city centre and within walking or cycling distance of departments.

¹ Accommodation guarantee applies to single undergraduates without children at all Colleges except St Edmund’s. All single undergraduates without children are usually expected to live in College-owned accommodation where possible and all students must ordinarily be available to study in Cambridge for the full duration of their course (with the exception of a year abroad where part of the course).
Shorter contracts

Colleges offer shorter annual accommodations contracts (26-39 weeks), so you don’t pay rent during the vacations unless you choose to stay in Cambridge.

Where is the accommodation?
Some Colleges have all their accommodation on their main College site. Others have some on their main site plus a range of College-owned flats/houses around the city. All College accommodation is within the University ‘precincts’, an area covering a three mile radius around Great St Mary’s Church. During term time, students are required to live in this area unless given permission to live elsewhere by their College. Most accommodation is within easy walking or cycling distance of the University departments and facilities, and the city centre. See the map on p158-9 for locations.

What’s the accommodation like?
There’s a variety of accommodation available – rooms vary from medieval to modern, and you usually express a preference for en suite or shared bathroom facilities. Whatever the style, you have a room of your own and access to a shared kitchen and laundry room. All Colleges provide a library and computer suite too (see also p14-5).

Somewhere to relax
The main social hub of every College is its common room and/or bar (also known as a JCR, or Junior Common/Combination Room), usually offering TVs, newspapers, pool tables, or computer games. Colleges have a wide range of sports and music facilities too – such as playing fields, gyms, music practice rooms and performance venues. See p19-21 for more information about music and sport at the University.

Somewhere to eat
At Cambridge, you don’t have to choose between ‘catered’ or ‘self-catered’ accommodation. Basic self-catering facilities are available if you want to cook for yourself, and all Colleges provide dining facilities where you can buy cafeteria-style meals as well as three-course dinners (known as ‘formal halls’) at a reasonable price (see p31).

The Colleges encourage communal dining; it’s a chance to catch up with friends and meet new people. A small number of Colleges require you to have a certain number of meals in the Buttery or dining hall each term (see College websites for details).

Porters
Every College has a team of Porters to maintain the safety and security of staff and students. One of the linchpins of College life, the Porters are often a first point of contact about any problems in College or if you need any information.

How much does it cost?
The cost varies from College to College, and usually depends on the type and style of your room (size, en suite etc) but the cost generally covers utilities (water, electricity, heating), cleaning, internet access and basic self-catering facilities.

You can find more information about accommodation costs, living costs, tuition fees and financial support on p30-3.

Further information
www.cam.ac.uk/accommodation

College life is nice: it gives you a good environment to meet a whole cross-section of people from around the world with their own unique interests and passions. I’ve made a lot of very good friends here and found it to be a friendly, inclusive place.

Kiran
Corby
If you need a bit of extra support while at the University, we have an extensive welfare system in place, and consistently high retention rates.\(^1\)

Support

There are various University services and within your College community you have a number of people looking out for your academic and personal welfare and supporting you throughout your time at Cambridge. Students who are struggling with a particular problem or feeling a bit lost won’t go unnoticed.

**College welfare**

**Director of Studies**
Your Director of Studies (DoS) is an expert in your subject and usually a Fellow of your College (a senior member of the College whose main duty is teaching, administration or research). Appointed to look after your academic welfare, they:

- advise you on your subject and course choices
- help arrange your supervisions
- monitor your progress and help with any problems arising from your studies

They’re also involved in the admissions process and they usually conduct interviews.

**Tutor**
As well as a DoS, you have access to a College Tutor, who’s also an academic but normally in a different subject from yours. They’re there to protect your interests and provide pastoral support, and can advise you on any personal or financial matters.

**College staff**
Colleges have a variety of people you can turn to for medical or personal support (or just a cup of tea and a chat), such as a nurse, counsellor, and/or chaplain.
Students supporting students

Throughout the University and Colleges, there’s an extensive student-run welfare network. The University Students’ Union (CUSU) provides an independent, professional and confidential Advice Service, offering information, support and impartial advice by phone, by email or in person at the CUSU Office.

CUSU also runs campaigns and initiatives about issues surrounding mental health, sexual health and disabilities. As every student is a member of the Students’ Union, CUSU seeks to represent them all effectively.

In addition, every College students’ union has its own welfare officer or team, and many Colleges assign ‘College parents’ (students in other years) to new students to help them settle in and find their feet.

Further information

www.studentadvice.cam.ac.uk

Counselling

The University’s Counselling Service offers a free and confidential service to all students at the University. Professional counsellors, mental health advisers and the University Sexual Assault and Harassment Adviser are available to talk through any personal or emotional concerns that you might have during your time at the University. More information, as well as a wide range of self-help resources and access to workshops, is available from the Service’s website (www.counselling.cam.ac.uk).

Student parents and childcare

The University’s Childcare Office operates the Information Service that provides comprehensive guidance on family-related matters such as childcare, schooling, health care, financial support and local community resources. The Childcare Office also oversees the facilities and assistance available to student parents, including the West Cambridge and Eddington Nurseries, and the Holiday Playscheme.

Some Colleges can provide family accommodation (see the individual College websites). Where this isn’t available, please refer to the central Accommodation Service (www.accommodation.cam.ac.uk).

Childcare Office

☎ 01223 332249
✉ childcare@admin.cam.ac.uk
☎ www.childcare.admin.cam.ac.uk

98.5% of students continue or complete their degree at the University, compared to 90.1 per cent nationally.¹

I’ve needed a fair bit of support at Cambridge, due to mental and physical illness. During a particularly difficult time when I’d been quite ill, my College organised a Junior Research Fellow from my faculty to help me plan how I was going to get through everything.

Frances
Portsmouth

¹ Higher Education Statistics Agency; all UK domiciled full-time first degree entrants (March 2018).
Disabled students

The Disability Resource Centre (DRC) offers guidance, information and support, and is an essential contact for applicants, including those with a specific learning difficulty or long-term health condition. The DRC supports individuals with an impairment/disability or long-term health condition, including those with:

- specific learning difficulties (including dyslexia and dyspraxia)
- physical/mobility impairments (including people with upper limb disorder/WRULD)
- sensory impairments (eg hearing, visual)
- mental health difficulties (eg depression, anxiety disorder)
- long-term health conditions (eg cancer, chronic fatigue syndrome, HIV, diabetes, epilepsy)
- Asperger syndrome, autism and ADHD

If you’re considering Cambridge, you’re advised to get in touch with the DRC and a College admissions office as early as possible to discuss your application and specific requirements. We strongly recommend that you indicate your disability and provide any relevant information in your UCAS application.

Such disclosures are looked at separately from academic assessment and allow us, for example, to make appropriate adjustments to the interview process, if needed. If a particular College meets your specific requirements we recommend you apply to that College rather than make an open application (see p120).

Location and accessibility

Students are based in Colleges for day-to-day living and go to a faculty/department for lectures, practical work etc. Therefore, we encourage you to visit before applying to assess the suitability of your intended College and department, including their locations relative to each other. The DRC’s online Disability Access Guide is a useful starting point for information regarding facilities and accessibility (www.cam.ac.uk/accessguide).

Study and academic support

With your agreement, the DRC liaises with relevant University and College staff before you start to ensure that appropriate support requirements are established. If you require support workers such as note-takers, specialist one-to-one study skills tutors or mentors, the DRC’s Non-Medical Help (NMH) Scheme may be able to help.

Examination access arrangements

If you require specific arrangements for examinations (such as additional time, someone to write on your behalf and/or use of a computer), the DRC Team can advise how to organise such arrangements via your College Tutorial Office. Please note that arrangements at university may differ from those in place at school/college.

Specific learning difficulties (SpLDs) including dyslexia and dyspraxia

If you have an SpLD you must have a current diagnostic assessment report as evidence for obtaining appropriate adjustments. Information about diagnostic assessments is available from the DRC’s SpLD Team and on the DRC website.

Financial support

Currently, UK students can apply for Disabled Students’ Allowances (DSAs) to cover some of their support costs. It’s important that you begin the application process for DSAs as soon as possible to ensure any available support is in place for the start of term. In addition, there are specific University funds that disabled students from the UK, EU and overseas may apply for (see the DRC website for details). The DRC can advise offer-holders on appropriate funding applications.

Care leavers

There’s a range of support available for care-leaver and estranged students at the University, including financial assistance (eg some care leavers may be eligible for a higher level of Cambridge Bursary) and a guarantee of 365-day accommodation (if required).

In order to ensure you get the support available to you as a care leaver, you should indicate in your UCAS application that you’ve spent time in care. When you arrive in Cambridge, the Cambridge Admissions Office’s Widening Participation Team will also get in touch to provide you with more information.

If you are or have been in care, or you’re supporting a young person currently or previously in care and would like to find out more about visiting or studying at the University and the support available, please see the website or contact the Widening Participation Team.

Money

Going to university is an investment in your future. Whichever university you apply to, you need to consider the cost of your tuition and your living (or ‘maintenance’) costs. These amounts can seem daunting but there’s lots of support available to help you finance your studies.

Extensive Support

The University and Colleges offer a range of financial support. See p32-3 for more details.

1 Islands students (from the Channel Islands and Isle of Man) are usually classified as international students and so charged tuition fees at the international rate (see details on p41) and at: www.cam.ac.uk/uginternationalfees. As overseas students, Islands students have to pay College fees in addition to tuition fees (see p41).
2 Students studying for a second undergraduate degree should refer to the website for information regarding fees (www.cam.ac.uk/ugtuitionfees).
Students undertaking a year abroad pay a different fee during their year abroad (www.cam.ac.uk/ugtuitionfees).
3 Figures rounded up to the nearest £10.
4 Figures based on the most common College accommodation contract (30 weeks) in 2018-19 – see individual College websites for full details and costs.
Costs per year rounded up to the nearest £10.
Tuition fees
The University is committed to providing a world class education and access to the very best teachers, resources and support. Therefore, we invest significantly more than the amount of the maximum government regulated (Home) fee on each student every year.

At Cambridge, the government regulated tuition fee for Home fee status students starting their first undergraduate degree in 2019 will be £9,250 for the year. At the time of going to print the tuition fee for 2020-21 hasn’t been set – it is subject to a major government review and may be higher than the tuition fee for 2019 and will be published on the Undergraduate Study website as soon as it’s available; see: www.cam.ac.uk/ugtuitionfees.

You should check the website for the most up-to-date information on tuition fees before applying and prior to accepting an offer from the University should your application be successful.

Currently, Home students can take out a government loan for their tuition fees. At the moment, students can defer payment of the loan until after they’ve left university and are earning a minimum salary, at which point the loan is repaid in instalments. Refer to the appropriate student finance award agency for details of tuition fee support (p33).

The fee status of EU nationals for 2020 entry onwards has yet to be determined by the UK government. EU students should regularly check for updates at: www.cam.ac.uk/eu. If you’re from outside the EU, please see p41.

Living Costs 2018-19

| Accommodation (including any kitchen charges) | £2,220-£6,180 per year⁴ |
| College meals | £3,330-£6,180 per year⁴ |
| Additional course costs | £4-£7 per meal |
| Transport in Cambridge | Dependent on course (see below) |
|                     | Cheap or free! |

Cost-effective living
‘Living costs’ cover whatever you need to pay for, excluding tuition fees, while you’re at university. For example, accommodation, food, course costs/study materials, personal expenses and transport.

We’ve estimated that in 2019-20 students should allow approximately £9,420² for living costs in Cambridge for the year (though this will vary depending on lifestyle and students should allow for increases in future years). Living costs for international students may be higher. See p41 for more details.

Accommodation
See individual College websites for details about accommodation and costs. As a rough guide, the rent for a 30-week year for single study bedrooms¹ is currently as follows:
- £74-£206 per week with a shared bathroom
- £111-£206 per week with en suite

See also p24-5 for general information about accommodation.

Food
Colleges provide basic self-catering facilities as well as cafeterias/dining halls (see also p25). Some levy a separate charge towards the running costs of the College kitchens – the kitchen facilities charge – while others include this within their accommodation costs.
- Individual meals typically cost £4-£7.
- Many Colleges have regular ‘formal halls’ (three-course dinners) that are also great value, usually at around £10-£15 at most Colleges.

Additional course costs
These costs vary depending on your course but may include:
- equipment (eg calculator, lab coat)
- photocopying
- study materials (eg paper, pens, books)
- travel costs (eg field or dissertation research trips)

The level of additional course costs will usually increase annually in line with inflation, except where a rise in directly attributable expenses warrants an above-inflation uplift. Specific additional course costs can be found on the relevant faculty or department website – see course entries for web links (p44-117).

The University’s numerous libraries and IT facilities (see p14-5) help to keep your costs down and many Colleges and some departments offer grants to help with particular costs.

Personal expenses
What you spend on food, clothing, transport etc depends on your lifestyle. However, there are lots of free recreational facilities plus loads of College-based and student-run activities that don’t cost very much. What’s more, Cambridge is a small place so transport in the city is cheap or free: most students walk or cycle and there’s a ‘Universal’ bus service that offers discounted fares to students.

The University’s plentiful resources include specialist computer rooms and more than 100 libraries which can help to keep your study costs low.
Money

Financial support
You now have a reasonable idea of the costs involved in studying at Cambridge, but what about financial support? Well, there’s currently a range of help available, including:

- government student loans for tuition fees and living costs
- the Cambridge Bursary Scheme
- College awards

Some support is currently available to all eligible Home fee status students.¹ Eligibility for other funding depends on your financial circumstances. However, higher education funding is being reviewed by the UK government; you should refer to the appropriate finance award agency website for the most up-to-date information and guidance (see opposite).

The table opposite outlines the types of support that Home fee status students may be able to access in 2020-21 (information correct at the time of printing, refer to the relevant websites for details and latest figures).

For more information about the financial support available for international students, see p41.

Cambridge Bursaries
The Cambridge Bursary Scheme is a long running initiative, which gives non-repayable bursaries for living costs to eligible students. Elements of the scheme (such as eligibility criteria and bursary value) are currently being reviewed – please check the website regularly for updates.

Further information
www.cam.ac.uk/cambridgebursary

College awards
Additional sources of funding may be available from your College, such as:

- book and equipment grants to help with specific study-related costs
- scholarships and prizes for academic or other achievements
- travel grants for academic work and personal enrichment
- grants and loans to help deal with unforeseen financial difficulties
- Supplementary bursaries for living costs/maintenance

Information on any such funds is available from each College (www.cam.ac.uk/collegeawards).

Part-time work
The University takes the view that our students shouldn’t work during term-time – it’s important that you have an appropriate work-life balance, and we offer a range of financial support to ensure you don’t have to. However, there may be a few opportunities available within the University and Colleges that are exceptions to this, such as working in the College bar, College library or as a student helper during open days.

¹ Non-UK EU nationals should regularly check online for updates (www.cam.ac.uk/eu). For information about costs and support for international/overseas students including those from the Islands (Channel Islands/Isle of Man), see p41.
² This financial support is in addition to any government support that may be available.

Cambridge has one of the highest proportions of graduates entering graduate-level employment or further study in the country. Our dedicated Careers Service helps you to prepare for your future, whatever path you want to follow.

Career destinations

Our courses are respected all over the world and Cambridge graduates of all disciplines are highly employable, so there’s no need to worry about your choice of course limiting you to one career path.

- The majority of employers recruit students with any degree discipline.
- It’s the flexibility, teaching style and demands of your degree, as well as the range of transferable skills that you develop, that are of interest to employers.
- Our degrees don’t just prepare students for employment – 32.3 per cent (compared to 15.0 per cent nationally) progress to further study or training.
- Less than four per cent of our graduates (the national figure is five per cent) are still seeking employment or further study six months after graduation.

Examples of career destinations of recent graduates can be found in the relevant course entry and detailed destination data for every Cambridge course can be found on the Careers Service website (www.careers.cam.ac.uk/dlhe/summary).
The Careers Service
Our team of experienced and impartial Careers Advisers will be here to support you during your studies and beyond, regardless of the subject you’re studying, the year you’re in, your nationality, age or career interests.

Once you’re at Cambridge, we can work with you from day one to explore your options, and help you connect with employers and navigate the complex job market, saving you time and maximising your employability prospects. Whether you are sure of the career you wish to pursue when you graduate or you are just starting to explore your options, we will help you take the next steps.

When you arrive at Cambridge, look out for us at the Freshers’ Fair and at your induction talk, check your College pigeon hole for our Careers Guide and register on our website: www.careers.cam.ac.uk.

How the Careers Service can help you

Career Essentials
We run one-hour ‘Careers Essentials’ workshops, on topics including choosing a career, cover letters, applications, and getting ready for interviews.

Internships and work experience
More than 1,500 internships are publicised across all sectors on our Vacancies & Opportunities database, with bursaries offered to support unpaid opportunities with charities.

Researching occupations and employers
• Over 200 careers events and briefing and skills sessions typically offered by the Careers Service each year.
• 14 major careers fairs, including Work to Change the World, Consultancy, and Engineering, Science and Technology.
• CamCareers email service – key information on specific careers sectors.

Networking with alumni
• GradLink – our alumni database is free to our users and gives access to contact details for Cambridge alumni who can offer first-hand advice.
• More than 50 employment-related skills training sessions.
• Information on occupations, further study courses and funding.

Finding vacancies
• Online vacancy information on more than 5,500 organisations.

The graduate employment market
Cambridge students are ambitious, intelligent, motivated, hard-working, passionate, committed, curious, intellectually creative, independent thinkers, and able to manage their time effectively.

Employers know this and look for the same attributes in potential new employees, which is why our graduates are so sought after.

The diagram below shows the destinations of 2017 Cambridge graduates, six months after graduation (where known).

Destinations of 2017 Cambridge graduates (six months after graduation)

- 58% in employment
- 32% in further study or training
- 4% still seeking employment or further study
- 6% not available for employment/further study (eg year off, travelling etc)
Mature Students

If you’ll be aged 21 or over by 1 October in the year in which you hope to come to Cambridge you’ll be applying as a mature student. We have around 450 mature undergraduates studying for their first degree at Cambridge, many of whom are in their 20s.

Colleges

Mature students can apply to any of the undergraduate Colleges, though most choose one of the four Colleges that are exclusively for students aged 21 or over – Hughes Hall, Lucy Cavendish College (women only), St Edmund’s College or Wolfson College. Mature students who make an open application (see p120) are allocated to one of these mature Colleges.

Supporting mature students

Information about student support can be found on p26-9.

Additional information and advice, including details about events for mature applicants, is available online and from the mature Colleges.

Further information

www.cam.ac.uk/mature

Cambridge Bursary

Some mature UK students may be eligible for a higher level of Cambridge Bursary. See the website for details at: www.cam.ac.uk/cambridgebursary.

Entrance requirements

The nature and demands of Cambridge courses mean they require academic preparation, and mature students must be of an equivalent academic standard to school leavers. Therefore, you’re expected to demonstrate evidence of recent academic achievement at a high level, for example in one or more A Levels, an Access to HE Diploma, or an Open University course (Level 2 or above).

Many of our courses require specific academic preparation. Please read the information on Access to HE Diplomas on p152 carefully, and contact one of the mature Colleges for advice.

Further information

www.cam.ac.uk/mature

UCAS information

www.ucas.com/maturestudents
Applying
Mature students apply in the same way as school leavers (see p6-11). Please also note:
• if you apply from outside the EU you need to submit a Cambridge Online Preliminary Application (see p11) in addition to your UCAS application
• those applying for the Graduate Course in Medicine need to complete an additional application form as well as the UCAS application (see p91)
• apart from those applying for Medicine and Veterinary Medicine (see p90 and p113), applicants to the mature Colleges aren’t required to take any pre-interview written assessments but will take a written assessment at interview (if interviewed) instead

Application deadlines
The standard deadline for applications to be received is 15 October. However, the four mature Colleges consider applications from mature students and for second undergraduate degrees in some subjects as part of a second application round, the deadline for which is 1 March 2020.

Those considering applying in the second application round (or for entry in future years) should consult the mature Colleges’ admissions offices for advice.

Second undergraduate degrees
If you’re a graduate with a first or 2.1 Honours (or equivalent) in an approved undergraduate degree from another university, you can apply to take a second undergraduate degree at Cambridge.

If you wish to take the Cambridge course in a year less than usual, you would apply as an ‘affiliate’ student.

Please note that there are some restrictions:
• affiliate students can’t make an open application or apply for Architecture, History and Modern Languages or History and Politics
• some Colleges may not accept affiliate applications for other courses (see College websites for details)
• only Lucy Cavendish, St Edmund’s and Wolfson Colleges consider affiliate applications for Medicine and Veterinary Medicine

Tuition fees for Home fee status students taking a second undergraduate degree may be different to the standard Home fee – see online for details (www.cam.ac.uk/ugtuitionfees). The fee status of EU nationals for 2020 onwards has yet to be determined by the UK government. EU students should regularly check for updates at: www.cam.ac.uk/eu. See p41 for tuition fees for international students.

Students studying for a second degree normally have to pay a separate College fee as well (see p41; this doesn’t usually apply for Architecture, Medicine and Veterinary Medicine).

You should allow for annual increases to tuition and College fees, and note that there’s very little financial support available. Annual increases will be determined by various factors (e.g., cost of delivering educational and related student services, changes in government and other funding), and will usually be in line with the prevailing UK rate of inflation.

Please note that for Law, applications to St Edmund’s College or Wolfson College must be submitted by the 15 October deadline.
International Students

More than 25 per cent of our undergraduates (around 3,000 students) are from outside the UK, representing more than 90 countries.

Student life
Cambridge has a diverse and vibrant community, making it a great place to be a student. As well as having access to the vast range of societies on offer to all Cambridge students (p16-21), there are also a number of events and societies specifically for international students. So, if you want to meet and socialise with other students from overseas, there are plenty of ways for you to do so! For more details see the Undergraduate Study website and CUSU International website (www.international.cusu.cam.ac.uk).

Each July and August, you can get a taste of student life here by joining the University’s International Summer Programmes, which include the opportunity to live in one of the Colleges (www.ice.cam.ac.uk/intsummer).

Please note that all students should ordinarily be available to study in Cambridge for the full duration of their course (with the exception of the year abroad where part of the course).

Visas and immigration
The UK operates a points-based immigration system and students from outside the European Economic Area (EEA) and Switzerland normally require a Tier 4 visa for study at Cambridge.

To apply for a visa you must be sponsored by the University and issued a Confirmation of Acceptance for Studies (CAS) to support your visa application. You’re also required to demonstrate that you have the funds to meet your tuition fees and living costs.

The University’s International Student Office provides a visa advice service to assist students sponsored by the University in applying for their student visa.

The primary source of information on all matters concerning immigration is the Home Office – check the Home Office website regularly for the most up-to-date information.

It’s your responsibility to ensure that you understand and fulfil the immigration requirements for your Tier 4 visa application and comply with the conditions of your visa during your studies.

Further information
International Student Office
www.internationalstudents.cam.ac.uk

Home Office
www.gov.uk/tier-4-general-visa
Entrance requirements

In order to make a competitive application, you need to be in the top one or two per cent of your year group and doing very well in your subjects most relevant to the course you’d like to study.

Typical offer levels for a range of qualifications can be found on p151-2. If what you’re studying isn’t listed, you should check our website (www.cam.ac.uk/uginternational) for guidance on the appropriateness of your qualifications for admission to Cambridge.

English language requirements

If English isn’t your first language, a reasonable standard of spoken English would be required for interview. You may also be asked to achieve a formal qualification, such as one of those listed below, as part of the conditions of an offer. If you don’t have one of these formal qualifications but are currently being taught in English, please contact one of the College admissions offices for advice.

• IELTS – normally a minimum overall grade of 7.5, usually with 7.0 or above in each element.
• EU students – a high grade in English taken as part of a leaving examination (eg the European/French Baccalaureate, Abitur etc) may be acceptable.
• Cambridge English: Proficiency – grade A, B or C.

See the website for more details and other acceptable English language qualifications (www.cam.ac.uk/uginternational).
Applying and interviews
All applicants must complete a UCAS application and Supplementary Application Questionnaire (SAQ, see p7) online by the relevant deadlines (see below). In addition to the UCAS application, students applying from outside the EU must submit a Cambridge Online Preliminary Application (COPA) by the relevant deadline.

The University conducts a number of interviews overseas. For 2020 entry, it’s anticipated that these will take place in Canada (Toronto), China (Shanghai), Hong Kong, India (Mumbai), Malaysia (Kuala Lumpur), Singapore and the USA (New York). To be considered for interview overseas, you must submit both your COPA and UCAS application by a deadline which may be earlier than 15 October (depending on where you wish to be considered for interview). See online for details and restrictions.

<td>22 October 2019</td>
<td>N/A</td>
</tr>
</tbody>
</table>

Restrictions apply to overseas interviews – see online for details (www.cam.ac.uk/overseasinterviews).

---

1 There’s an international/overseas application fee associated with the COPA as well as an interview fee for those interviewed overseas. See the website for information and guidance on paying these fees (www.cam.ac.uk/copa).
2 Earlier application deadlines may apply to students who are applying for certain scholarships as well. See the information online from: www.cam.ac.uk/uginternationalsupport.
Costs

International student costs at Cambridge include tuition fees, College fees and living costs. Visa applications require you to prove in advance that you can finance all these costs. Colleges also ask for financial guarantees. The University takes the view that students should not work during the academic session, as it’s important that you have an appropriate work-life balance.

Tuition fees

The fee status of EU nationals for 2020 onwards has yet to be determined by the UK government and EU students should regularly check for updates at: www.cam.ac.uk/eu.

Students who don’t qualify for Home fee status3 are currently charged the international/overseas fee rate which varies by course. For information on international/overseas tuition fees for 2020 entry, please see the website where fee details will be published as soon as they are available: www.cam.ac.uk/uginternationalfees. See also p31 regarding additional course costs.

If you’re uncertain about your fee status, please request a fee status questionnaire from any College admissions office (see p121-49).

College fees

All international/overseas fee status (including most Islands)3 students, and those Home fee status students who aren’t eligible for tuition fee support (eg affiliate students), normally have to pay College fees in addition to University tuition fees (www.cam.ac.uk/ugcollegefees).

Annual College fees may vary between Colleges and in many cases are fixed for the duration of your course. Net fees in 2019-20 range between £7,116 and £9,702, see individual College websites for fees for 2020-21 onwards.

Living costs

Your living expenses may be higher than for a UK student (eg if you stay in Cambridge/the UK during vacations). In 2019-20, the minimum resources needed in Cambridge for the year (excluding tuition and College fees) are estimated to be approximately £10,950⁵, depending on lifestyle (you should allow for increases in future years).

Financial Support

The financial support available for international undergraduates is limited but at Cambridge this includes Cambridge Commonwealth, European and International Trust awards; College awards; and country-specific scholarships. Few full undergraduate scholarships are available – most support is a partial contribution and is means-tested. Details about these funding sources are available from: www.cam.ac.uk/uginternationalsupport

Please pay particular attention to the application requirements and deadlines.

---

3 Most Islands students – from the Channel Islands and Isle of Man – are classified as international/overseas fee status.
4 The tuition fee during a year abroad (where part of the course) is 50 per cent of the full fee for that year.
5 Figure rounded up to the nearest £10.
Courses

One of the most distinctive characteristics of our courses (also called Triposes at Cambridge) is that they cover the subject area very broadly in the initial years and then offer a wide range of options in which to specialise in later years.

If you know what you want to focus on you can start to specialise early on or, if you’re undecided, you can delay specialising until you’ve had the chance to fully explore the breadth of your subject and developed your interests. Either way, by graduation you’ll have the same depth of understanding and specialist knowledge as other graduates in the field.

Generally, the number of subject options to choose from increases each year. In addition, some papers (topics) are offered in numerous courses (see course outlines). For example, some Classics and language papers are available in the English course. Beyond any compulsory papers you can usually tailor your course to your own specifications.

If the subject you’re looking for doesn’t appear in any of our course titles check the Index (p160-2), where all of our subjects – and the course(s) they’re offered in – are listed.
Course requirements

Essential subject requirements are given in each course entry (p44-117) and are defined as follows:

- **all Colleges require** – subjects that are essential for all Colleges
- **some Colleges require** – subjects that are essential for some Colleges
- **useful preparation** – subjects that aren’t required by any Colleges (so won’t affect admissions decisions) but which can provide useful preparation for the course

The Colleges expect required subjects to be passed, normally with an A* or A at A Level/grade 7 or 6 at Higher Level of the IB (or equivalent). For courses that don’t have particular subject requirements, high grades are expected in your subjects most relevant to the course.

See p150-2 for further guidance on entry requirements. General information about what our Admissions Tutors look for in applicants can be found on p8.

All undergraduate admissions decisions are the responsibility of the Cambridge Colleges, so please check College-specific requirements/preferences with the College(s) you’re considering applying to.1

Admission assessments

Most applicants are required to take a subject-specific written admission assessment.

- Pre-interview assessments will be taken in late October/early November at a centre local to you (usually your school/college) – you must be registered in advance for any pre-interview assessment.
- At-interview assessments are taken when in Cambridge for interview, if interviewed.
- Apart from assessments for Medicine (see p90) and Veterinary Medicine (see p113), applicants to mature Colleges aren’t required to take any pre-interview assessments. For courses with a pre-interview assessment, you take a written assessment at interview (if interviewed) instead.
- In addition to any subject-specific pre- or at-interview written assessment, some Colleges require applicants for some courses to take an additional College-set assessment at interview, if interviewed. See individual College websites for details.

Further information

www.cam.ac.uk/assessment

Course statistics

Application and admission statistics for 2018 entry are noted in the course fact files and you can find further statistics on our website (www.cam.ac.uk/ugstatistics).

How you’re assessed on our courses

At Cambridge, the main form of assessment is written examinations. Most students have exams at the end of each year and it’s not usually possible to resit any of these. Our assessment methods are explained in the information about our courses on our Undergraduate Study website and the course outlines you will find in the forthcoming pages.

Changing course

Most students stay on the same degree course but it may be possible to change (with agreement from your College). See the course entries on our Undergraduate Study website for more common changes and contact a College for advice.

Please check the Undergraduate Study website and the course websites (listed on the following pages) for the most up-to-date course information before applying or accepting an offer.

Further information

www.cam.ac.uk/assessment

Part-time and short courses

The University only offers full-time undergraduate degree courses. However, our Institute of Continuing Education (ICE) offers a wide range of part-time and short courses for academic progression, or personal or career development. See the ICE website for details at: www.ice.cam.ac.uk.

1 Although you may be considering a number of Colleges, you can only make one application to the University in a year – either indicating one preference College or selecting the open application option in the UCAS application. Applying to more than one College, or applying to a preference College and also making an open application isn’t possible. Once the UCAS application is submitted, your choice can’t be changed.
Anglo-Saxon, Norse, and Celtic

If you’re fascinated by medieval history, literature and languages, and you relish the prospect of doing your own research using original source materials, this course – unique in the UK to Cambridge – will appeal.

A voyage of discovery
From the history and culture of Anglo-Saxon England, and Celtic languages to Viking exploits – Anglo-Saxon, Norse, and Celtic (ASNC) allows you to explore a range of cultures, and to look at history, language and literature side by side.

ASNC focuses on the history, material culture, languages and literature of the peoples of Britain, Ireland and the Scandinavian world in the earlier Middle Ages.

ASNC students discover medieval history while learning one or more languages and reading great works of literature in the original languages, such as the Old English poem Beowulf, the epic medieval Irish tale Táin Bó Cúailnge (The Cattle Raid of Cooley) and Icelandic sagas. Exactly which areas you study and to what depth is largely up to you, and to support your learning Cambridge has rare and exceptional resources to offer in the University Library, the College libraries, and in the Fitzwilliam and other museums.

What are we looking for?
No previous knowledge of the subject is expected or required; all languages are taught from scratch and we don’t assume that students have studied early medieval history or literature at school. However, we do require passion and commitment, and look for evidence of your general ability in arts and humanities subjects.

After ASNC
This unusual and challenging degree develops your powers of argument and sharpens your powers of analysis. It equips you for a wide range of careers where intellectual and analytical skills are important.

‘Asnac’ (as they like to be called) graduates can be found in a wide range of careers. Some take advantage of the specialist opportunities open to them and do research and teaching in schools and universities, or work in museums and libraries; while many others go into careers including journalism, publishing, banking, law, the Civil Service, industry and business, and even software development.

In two years I’ve studied a broad range of topics, most of which I’d never considered before, and students have lots of contact time with staff.

Clare
Course outline
Teaching is provided through lectures, classes, seminars and supervisions and you can expect between 10 and 15 hours of lectures and classes per week during Part I.

Years 1 and 2 (Part I)

Year 1
In the first year, you study the various disciplines which form the core of ASNC studies. There are no compulsory papers – you choose six subjects from a range of 10, and take an examination in four of them and departmental tests in the other two.

Historical subjects:
- Anglo-Saxon history
- Scandinavian history
- Gaelic history (Scotland, Ireland and the Isle of Man)
- Brittonic history (Wales, Brittany, Cornwall, the Pictish kingdoms and the North Britons)

Language and literature subjects:
- Old English
- Old Norse
- medieval Welsh
- medieval Irish
- medieval Latin
- palaeography (the study of manuscripts and handwriting)

Year 2
In your second year, you may continue to study your chosen subjects and take an examination in all six of them. Alternatively, you have the option to replace up to three of your first-year subjects with a dissertation and/or one or two papers from related courses – currently these include subjects from Archaeology, English, and Modern and Medieval Languages.

Year 3 (Part II)
This is where you develop and use the skills you learned in Part I, exploring your chosen fields and applying your newly acquired knowledge in original and imaginative ways. You study four subjects selected from a range of 17 papers including, for example:
- The Conversion of Scandinavia
- Beowulf
- Germanic Philology

These are designed to give you the opportunity to pursue more detailed study in your chosen areas. You may replace one of your four Part II ASNC papers with a paper from another course. The range of subjects available varies each year but currently includes medieval English literature, medieval French literature, historical linguistics, and a subject from the Faculty of History. You may also replace one of your Part II subjects with a Part I paper that you didn’t offer for the examinations at the end of your second year.

In addition, you write a dissertation of between 9,000 and 12,000 words on a specific subject of your own choice within the scope of the course.

After Cambridge

Our course offers the theoretical foundation and training in standard methods and specialised techniques required for academic and professional practice.

The intellectual versatility and transferable skills that our students develop — such as the ability to think critically, analyse texts, handle data and work collaboratively — mean they’re widely sought after by employers in many related and unrelated fields. Graduates have gone on to work in the commercial archaeology sector as well as museums, commerce, diplomacy, advertising, media, conservation, health and further academic study among others.

The department facilities, the labs, Museum and library are amazing; and the staff are incredibly helpful, friendly and supportive.

Emma
Course outline
In Year 1, you have between six and eight lectures and one or two supervisions each week, plus weekly language classes and/or practicals (where appropriate).

You’re assessed each year, principally through written exams but some papers include assessed practicals/fieldwork. Fieldwork from Year 2 is compulsory unless otherwise stated. Most students also write a 10,000-word dissertation in Year 3.

Year 1 (Part I)
You pick three from seven core archaeology, language and biological anthropology options (certain papers are advised for some Year 2 subjects) – see details online. Your fourth can be another core subject paper, or you can choose a psychology, social anthropology, politics or sociology option. All students go on a compulsory two-and-a-half-week training dig with the Cambridge Archaeological Unit, usually in Cambridgeshire.

Years 2 and 3 (Part II)
You can pursue one of four single-subject tracks (see below) or one of two two-subject tracks – Archaeology and Biological Anthropology, or Assyriology and Egyptology (details online).

Archaeology
Year 2 (Part IIA)
You take two papers in theory and practice, and data analysis; one covering the archaeology of a particular period or region, and either another period/region paper or one from Classics or Human, Social, and Political Sciences (HSPS). Fieldwork consists of a week overseas at Easter.

Year 3 (Part IIB)
You complete four weeks of fieldwork in the summer before Year 3. All students study advanced archaeological thought, archaeology in the wider world and a combination of year-long and one-term Special Topic papers from options within this course, Classics or HSPS. All students also write a dissertation.

Assyriology
Year 2 (Part IIA)
You take four papers: Mesopotamian archaeology, Babylonian language, and two from other course options (one can be from Classics or HSPS). You also undertake a four-week study tour and/or fieldwork.

Year 3 (Part IIB)
You take advanced Babylonian language and Mesopotamian archaeology papers; and one on Mesopotamian history or culture, or Sumerian language. For your fourth paper, you choose from around 20 options or complete a dissertation.

Egyptology
Year 2 (Part IIA)
You take papers in Egyptian language and archaeological methods and concepts, plus two papers on society, religion and death in Ancient Egypt. You also undertake a four-week study tour and/or fieldwork.

Year 3 (Part IIB)
Alongside a core Egyptian language paper and two Egyptian archaeology papers, all students write a dissertation.

Biological Anthropology
Year 2 (Part IIA)
You take four papers which explore behavioural ecology, human origins, health and disease, and biological anthropological methods. You may replace one of these with an option offered elsewhere in this course, HSPS or Psychological and Behavioural Sciences.

Year 3 (Part IIB)
You take a core theory and practice paper and write a dissertation. You also take between two and four option papers (depending on length). These can include a paper from HSPS.

Architecture

The only Cambridge degree that combines the intellectual challenges of both arts and sciences with the opportunity for creative design.

Exceptional learning environment
The Department of Architecture at Cambridge is an exciting place to study. Regularly lauded as one of the leading architecture schools in the world, students study under the guidance of world-renowned researchers and ground-breaking practitioners.

Creativity, curiosity and strong intellectual grounding are central to the course. Our innovative design programme – delivered by tutors working at the cutting edge of contemporary architecture – is balanced with outstanding teaching in the history and philosophy of architecture, contemporary culture and urbanism, as well as construction, structural design and environmental design.

Our small, friendly Department has a very good staff to student ratio, and the supportive community atmosphere gives students the opportunity to push the boundaries of the field and to extend their own abilities in exciting new directions. Facilities include a superb library, reprographics areas, workshops, studios and spaces for larger installations.

Professional qualification
Successful completion of our full three-year undergraduate course carries exemption from the Architects Registration Board (ARB)/Royal Institute of British Architects (RIBA) Part 1 – the first stage in qualifying as an architect.

The Department also offers a Masters in Architecture and Urban Design, which carries exemption from ARB/RIBA Part 2, and a ARB/RIBA Part 3 course (the final qualifying stage). When you have completed all three parts of the ARB/RIBA requirements, you will be able to register as an architect with the ARB.

What we’re looking for
You must have an enthusiasm for both the arts and the sciences. The ability to draw and an interest in the history of art and architecture are essential, as is a knowledge of mathematics to at least a good GCSE standard.

Portfolio
Admissions Tutors want to see something that illustrates your interests, experience and ability in the visual and material arts. This may include drawings, paintings, sculpture and/or photography. See the Department website for more advice.

Careers and research
Many graduates continue into professional training, but some enter other creative fields or research. We have a long-standing tradition of research excellence in areas such as history and philosophy of architecture, environmentally responsible design, architecture and the moving image, urban design and transport planning, and disaster relief.

Architecture at Cambridge doesn’t only deal with buildings – we think of people, places, materials, philosophy and history, and only then consider the actual building!

Kathryn
Course outline

You’re taught in our studio – where you have your own dedicated design space – two days a week, during which you’re set projects that require you to produce models and drawings to communicate your ideas. You’re supervised on studio work in individual tutorials and group critical reviews, which encourage you to explore different approaches and develop essential design skills. The resulting portfolio accounts for 60 per cent of your overall marks each year.

Lectures, classes and visits to completed buildings or buildings under construction/restoration cover the rest of the curriculum. In addition to the two studio days, in the first year you typically attend six or seven lectures each week; and three classes and three small-group supervisions each fortnight, for which you’re required to complete essays and undertake preparation.

Year 1 (Part IA)

The studio work introduces the possibilities of architecture, with an emphasis on understanding and developing proficiency in traditional modes of architectural representation – models, collage, perspectives, elevations, plans and sections. You also master basic CAD skills, used in studio presentations. A compulsory study trip abroad usually takes place during the Easter vacation. You take five lecture-based papers:

- Introduction to Architectural History/ Theory (pre-1800)
- Introduction to Architectural History/ Theory (post-1800)
- Fundamental Principles of Construction
- Fundamental Principles of Structural Design
- Fundamental Principles of Environmental Design

Assessment is through coursework and written examinations.

Year 2 (Part IB)

You choose from various options for studio work, with projects ranging in scale from mapping studies and interior interventions, to reasonable-sized buildings. Emphasis is on integrating the technical skills learnt in Part IA and in the ongoing Part IB lectures with your studio output. A voluntary study trip is usually offered.

In addition, you take four papers that build on your Part IA knowledge:

- Studies in History and Theories of Architecture, Urbanism and Design
- Principles of Structural Design
- Principles of Environmental Design
- Principles of Construction

For the first, you submit two essays and sit a written examination. The remaining three papers are assessed by a written exam in each.

Year 3 (Part II)

You choose from three studio options that vary in approach but all require you to produce a building design at the end of the year, the technical realisation of which is allied to a coherently framed conceptual approach. Again, a voluntary study trip is usually offered.

Four lecture-based papers together carry 20 per cent of your overall marks:

- Advanced Studies in Historical and Theoretical Aspects of Architecture and Urbanism
- Management, Practice and Law
- Advanced Studies in Construction Technology, Structural Analysis and Environmental Design Related to Case Studies
- Architectural Engineering (examined entirely by coursework)

A written dissertation of 7,000-9,000 words on a topic of your choice accounts for the remaining 20 per cent of your marks.
Asian and Middle Eastern Studies

You don’t need prior knowledge of the languages or cultures of East Asia or the Middle East to study them at Cambridge but you do need imagination, perseverance, curiosity and a sense of adventure.

Broaden your horizons

The areas you can study in the Asian and Middle Eastern Studies (AMES) course stretch from Japan in the East to Morocco in the West, and from classical times to the present day. By studying an AMES language and culture, you develop a set of practical skills and knowledge that can be used in many ways and you engage with different understandings of our shared world.

As you do not have to have studied AMES subjects at school, the best preparation is for you to explore for yourself what interests you about the language and culture you choose to study (see the Faculty website for suggestions).

Flexibility: our range of options

Our course is flexible and numerous options and combinations are available. You should indicate which language(s) you’re interested in studying in your SAQ (see p7).

- You can study Arabic, Chinese, Hebrew, Japanese or Persian.
- Chinese and Japanese cannot be combined with another language. However, those studying Japanese may be able to take Korean as an option in Year 4.
- You can combine Arabic, Hebrew and Persian with each other, or with a modern European language (if you have an A Level/IB Higher Level or equivalent in the European language) from Year 1. Students taking one of these languages will have the option to study Hindi from Year 2 or Sanskrit in Year 4. No more than two languages may be studied at one time.
- Persian must be combined with another Middle Eastern language or a European language from the Modern and Medieval Languages course in Years 1 and 2.
- You can study Arabic, Chinese, Hebrew, Japanese or Persian.
- Chinese and Japanese cannot be combined with another language. However, those studying Japanese may be able to take Korean as an option in Year 4.
- You can combine Arabic, Hebrew and Persian with each other, or with a modern European language (if you have an A Level/IB Higher Level or equivalent in the European language) from Year 1. Students taking one of these languages will have the option to study Hindi from Year 2 or Sanskrit in Year 4. No more than two languages may be studied at one time.
- Persian must be combined with another Middle Eastern language or a European language from the Modern and Medieval Languages course in Years 1 and 2.

Chinese gives you China in its own words. You encounter a sophisticated civilisation and the most vibrant economy in the world today. You delve into its 3,500 years of recorded history, poetry and philosophy to understand how they shaped the tumultuous changes of modern times, and to engage with contemporary society.

While rooted in a vibrant cultural history, Japan is one of the world’s most dynamic societies, a leader in industry, technology and popular culture. On our course you gain unrivalled mastery of Japanese while developing in-depth understanding of Japan’s history, literature, society and politics.

Arabic is the language of the Qur’an and of a rich literature covering fields as diverse as the sciences, history and religious studies, and poetry. It’s the native language of around 200 million people in the Middle East and was the key to a medieval culture which kick-started the European Renaissance. Our course gives you access both to this heritage and to the modern societies, cultures and thought fed by it.

Persian is another great language of Islam with a world famous poetic tradition, and a vibrant literary heritage. It is the language of modern Iran and variants of Persian are also spoken in Tajikistan and Afghanistan. Our course introduces you to the classical tradition and to contemporary Iranian culture.

Hebrew offers classical (Biblical) and/or modern Hebrew and its literature, and the history and culture of Israel and the modern Middle East. You can also study Aramaic.
Asian and Middle Eastern Studies (cont.)

Our teaching
Good knowledge of the language(s) is central to our course. Part I (Years 1 and 2) gives a strong grounding, and in Part II (Years 3 and 4) you study advanced language so that by the end of it you can speak fluently and read confidently. Alongside the language(s), there’s a wide range of topics on offer (depending on language) to choose from looking at history, literature, religion, anthropology, linguistics and film.

Living and learning abroad
The third year is spent abroad – a great opportunity to immerse yourself in the culture you’re studying and improve your language skills. Various Faculty-approved institutions are available. Chinese and Japanese students study at a university in the appropriate country. Arabic, Persian and Hebrew students have some choice of which country they go to and what they do. Students generally take an approved language course or study at a local university, and some combine this with voluntary work.

Versatility: your choice of careers
The range of career options open to graduates is vast. Besides those who go into research, many graduates use their subject directly in subsequent employment. Examples include the media, business and commerce, tourism, teaching overseas, the Civil Service (especially the Foreign Office), NGOs, or international scientific agencies.

Even if you choose not to stay in a related field, employers are often impressed by your choice to study a difficult language. Our graduates have also gone into banking, marketing and law.

The small class sizes mean you get to know your teachers and classmates really well, so there’s a real sense of community within the Faculty.

Sarah

Fraser

For my dissertation, I was able to investigate any course-related subject attracting my attention, and pursuing those investigations at length was my degree high point.
Course outline
Teaching is made up of lectures, seminars, language classes and supervisions – you can generally expect 12-14 hours of teaching each week.

You are assessed at the end of each year through written and oral examinations, and coursework. Depending on your choice of language(s), you take four to six papers in Years 1, 2 and 4, including a dissertation of 12,000 words in your final year. You spend Year 3 abroad. See the website for full course details.

If you combine a Middle Eastern with a European language, you study both roughly equally in Year 1 but after that you can balance them as you wish. If you combine both to Year 4, you spend Year 3 in the Middle East.

Years 1 and 2 (Part I)
In Year 1 (Part IA), you study your chosen language(s) intensively, in both written and spoken forms. You take introductory papers on East Asia or the Middle East, depending on the language(s) you’re studying.

In Year 2 (Part IB), you continue to study your chosen language(s). There are literature and history papers (compulsory for those taking Chinese or Japanese) and you also choose from a number of optional papers, some borrowed from other courses. The topics offered vary from year-to-year but currently include:
- Chinese or Japanese – East Asian studies, East Asian cinema, linguistics
- Chinese – dynastic and modern China, Chinese thought, popular China, globalisation in China
- Arabic, Hebrew, and Persian – literature, classical Islamic civilisation, formation of the modern Middle East, the anthropology of Islam, Hebrew culture, Hindi, film, linguistics, Islam, Judaism

Years 3 and 4 (Part II)
In Year 3, you spend at least eight months abroad developing your language skills and your understanding of the culture you’re studying.

In Year 4, you write a dissertation and take four further papers, including at least one advanced language paper. You chose your other papers from a list of specialist options, some borrowed from other courses. The topics offered vary from year-to-year but currently include:
- Chinese – early and Imperial China, China during the second world war, modern Chinese literature, contemporary Chinese society, Chinese linguistics, China in the International Order
- Arabic, Hebrew and Persian – classical and/or modern literature (Arabic, Hebrew and Persian), imperialism and Islamic law, the Persianate world, Islamic cities and Muslim kings, the invention of Israeli culture, Semitic linguistics, Sanskrit, Hindi, Islam, Judaism

Chemical engineers design and operate industrial processes that convert raw materials into valuable products. The need for more sophisticated products and sustainable processes means chemical engineers are in great demand.

Chemical Engineering at Cambridge
Our course concentrates on the scientific principles that underpin chemical and biochemical engineering. The aim is to produce graduates that meet the needs of today’s process industries by providing a thorough understanding of the subject, technical competence and transferable skills. The underlying theory is complemented by lectures and projects that teach process and chemical product design.

We have strong links with industry. The course is supported by a consortium of industrial companies which provide input on content and assist with teaching. These links also mean that there are opportunities for vacation placements with some of the world’s top companies.

Teaching and facilities
Our Department enjoys a reputation for excellence in its teaching and research, regularly topping national league tables. The Department moved to a new purpose-built building in 2016 that provides the highest quality teaching and research facilities.

Qualifications and accreditation
It’s possible to graduate with a BA degree after three years. However, virtually all students stay for the fourth year leading to the BA and MEng degrees (progression to the fourth year is dependent on satisfactory performance). The four-year course is accredited by the Institution of Chemical Engineers, meaning that after graduation you can apply for Chartered Engineer status once you have four years of relevant experience without taking further exams.

After Cambridge
Within chemical engineering there are many well-paid career opportunities. You might work as a field engineer, be part of a research team, or become a senior manager within industry. Chemical engineers also secure jobs outside the discipline because of their broad range of skills. About 50 per cent of our graduates go into the chemical, process and food industries; 20 per cent go into finance and management; and 15 per cent go on to further education and research.

I like the real world focus of the course, and the new building for the department is great.

Rebecca
Course outline
You're taught primarily through lectures, which are supported by projects, laboratory classes, supervisions and coursework.

In a typical week you attend 10 lectures and have two supervisions. You also undertake fortnightly projects.

Assessment is by written exams during the final term of each year, and coursework which makes an increasing contribution to your marks each year.

Years 1 and 2 (Part I)
Year 1
Chemical engineers spend their first year studying either Engineering or Natural Sciences. These routes provide equally good preparation for becoming a chemical engineer and are taken up by a similar number of students.

Year 2
From Year 2, you're based within the Department of Chemical Engineering and Biotechnology. You study compulsory topics within five themes:
- fundamentals – fluid mechanics, mass and heat transfer, thermodynamics
- process operations – reactors, separators, biotechnology
- process systems – safety, economics
- mathematical methods – mathematics
- enabling topics – depending on your first-year subject, you have additional lectures and practicals on either chemistry or mechanical engineering

You also take laboratory classes and undertake regular assessed project work. Towards the end of the year, you perform the mechanical design of an item of process equipment such as a heat exchanger.

Year 3 (Part IIA)
The third year includes further compulsory topics within four themes:
- fundamentals – fluid mechanics, heat transfer, thermodynamics
- process operations – reactors, separators, bioprocessing, particle processing
- process systems – process dynamics and control, process synthesis, safety
- enabling topics – materials, mathematics

After the written exams in the third term, you undertake a group project that lasts five weeks of full-time work to design a modern industrial process. You consider all aspects of engineering design (including specification of equipment and control procedures), safety, environmental impact and economic assessment. The design project brings together all the taught subject matter whilst giving you the opportunity to work in a team on an open-ended problem.

Year 4 (Part IIB)
You undertake a project on chemical product design and take a compulsory paper on environmental aspects of chemical engineering.

You choose six further topics from a list of optional papers which changes every year to reflect the research interests of academic staff. Some are advanced chemical engineering topics – past examples have included pharmaceutical engineering, electrochemical engineering, rheology and processing, and computational fluid dynamics – and some are broadening material topics from outside the discipline (past examples have included healthcare biotechnology, a foreign language, and entrepreneurship).

In addition, you undertake a research project. This might involve experimental, theoretical and/or computational work. Some projects support ongoing Department research, while others are ‘blue sky’ investigations leading to new research programmes. Successful projects sometimes lead to students becoming authors of publications in scientific literature.
Classics at Cambridge isn’t just studied as a period in the past, it also looks at how classical culture, language and philosophy have affected the history of Western civilisation right up to the present day.

**Classics at Cambridge**
The Faculty of Classics is one of the most dynamic of its kind, with an exceptional reputation for teaching and research.

Our course encompasses the history, culture, archaeology, art, philosophy and linguistics of classical antiquity and the study of original texts and artefacts. You can either specialise in a particular field or retain the breadth with which the course starts.

**The courses**
We offer a three-year course and a four-year course. The three-year course is usually for students with A Level/IB Higher Level Latin or equivalent (regardless of whether they have Greek). We offer an intensive ancient Greek programme for those with little or no Classical Greek.

The four-year course is for those with little or no Latin, and offers a preliminary year which focuses on Latin language and Roman culture. Years 2, 3 and 4 are identical to the three years of the three-year degree.

If you have A Level/IB Higher Level (or equivalent) Classical Greek but not Latin, you may be advised to take the four-year degree (depending on circumstances – please contact the Faculty/a College admissions office for guidance).

**Facilities and resources**
The Faculty’s facilities include a well-stocked library and our own Museum of Classical Archaeology. In addition, you have access to the holdings of the Fitzwilliam Museum, where some classes take place. There’s a thriving student society, and the renowned Cambridge Greek Play (produced in the original language) is regularly staged by a professional director. We also offer various undergraduate prizes, bursaries and travel grants.

**Careers**
Studying Classics will help you develop transferable skills that are essential for many careers after graduation. Our students are hard-working, articulate, accurate and efficient, take new tasks in their stride and can master situations intelligently.

Some graduates go into research and teaching in schools and universities, or work in libraries and museums. However, most go into other careers – in law, the media, accountancy, the Civil Service, industry and business. Our graduates include bankers, barristers, solicitors, actors, musicians and theatrical artistic directors.

Classics here deserves its world class reputation – ancient languages taught by the field’s best teachers, and opportunity to study everything from warfare and politics to architecture and philosophy.

Emma
Course outline
During Part I, you have an average of eight to 10 lectures a week, and language classes as needed. You also have at least two supervisions a week in which you discuss your work.

In Part II, you may have Faculty seminars as well as lectures, while your College supervisions give you the opportunity to research essay topics of your choice in depth.

Assessment is by end of year exams, although in Year 3 you can substitute an exam for a dissertation.

Preliminary Year (four-year course)
You learn to read Latin confidently through language study and the reading of texts from the Roman world. You also study Roman culture, submit essays for assessment, and undertake some preparatory work for taking up Ancient Greek at the beginning of the next year.

Year 1 (Part IA)
Written texts are a major source of evidence for classical antiquity, so you study texts in the original Greek and Latin from the most familiar periods of ancient literature by central authors such as Homer, Euripides, Plato, Virgil, Ovid and Cicero.

You also study elements of ancient history, archaeology, art, philosophy, philology and linguistics to build the broadest possible understanding of the ancient world and our relationship to it. Reading and language classes directed by specialist language teachers, as required, extend your knowledge of the ancient languages. End of year exams test your linguistic and literary comprehension and essay writing skills.

Year 2 (Part IB)
You take six papers, including a paper from each of the following four compulsory groups:
- Greek translation
- Latin translation
- Greek literature
- Latin literature

The remaining two papers are chosen from four on other subjects:
- history
- philosophy
- art and archaeology
- philology

Further optional papers on prose or verse composition in both languages are available if you wish to develop your confidence and creativity in manipulating language.

Year 3 (Part II)
You can specialise within one discipline (e.g., ancient history) or construct a wide-ranging course particular to your individual strengths and interests. You choose four papers from a broad range of options, including:
- literature, e.g., Women and Greek Literature
- philosophy, e.g., Aristotle’s World, from Tortiles to Tragedies
- history, e.g., Roman Religion: Identity and Empire
- language, e.g., Beyond Classical Art
- a multidisciplinary paper, e.g., Rome, the Very Idea
- papers from another degree course

At the end of the year, you take exams in these subjects or you can substitute one paper with a dissertation on a subject of your choice within the field of Classics. Past dissertations have covered:
- cross-dressing in antiquity
- the phenomenon of Asterix
- classical influences on contemporary American poetry
- Homer and Virgil
- Greek tragedy and politics
- comparative linguistics
- the nature and role of pleasure in human life
- art and archaeology in Roman Egypt

Computer Science

Computer science is a fast-moving field that brings together disciplines including mathematics, engineering, the natural sciences, psychology and linguistics. Our course provides you with skills highly prized in industry and for research.

Computer Science at Cambridge
Cambridge was a pioneer of computer science and continues to lead its development. There are more than 1,000 specialist computing and advanced technology companies and commercial laboratories in the area (known as ‘Silicon Fen’). A number of local firms and start-ups support our teaching and employ our graduates.

Our course is broad and deep – giving skills to create future technology. All aspects of modern computer science are covered, along with the underlying theory and foundations in economics, law and business. You also develop practical skills, such as programming (in various languages, eg ML, Java, C/C++, Prolog) and hardware systems (eg chip design using Verilog).

Facilities and work experience
Our students benefit from the Department’s cutting-edge research and extensive facilities. The purpose-built Department of Computer Science and Technology is packed with the latest technology, advanced lecture theatres, dedicated practical rooms, a well-stocked library, and even a café.

Group projects during the course, where small teams of students deliver a product to an external client, ensure relevant industrial experience. Projects can lead to commercialisation, licensing or employment.

Careers
Our graduates’ knowledge and skills embody principles which will outlast today’s technology, making them highly sought after by industry and commerce alike.

About half of our students go on to work in the computer industry, while a fifth pursue further study and careers in teaching and research. Many graduates have founded companies or gained employment in software, hardware, the games industry, finance, communications and commerce.

To get an idea of what’s currently on offer to our graduates, visit: www.cst.cam.ac.uk/supporters-club.

I’d never studied Computer Science formally, so didn’t know what to expect. I’m convinced I made the best choice and can’t imagine enjoying another course more!

Chloë
Course outline

Teaching is provided through lectures, practical classes and supervisions. In Year 1, you can typically expect 20 hours of teaching every week, including up to 12 lectures and practical classes.

Assessment is by three-hour examinations taken in the final term each year. In Year 3 you submit a dissertation and take two units which may be assessed in a variety of ways. Practical work is undertaken and assessed in all years of the degree programme.

Please note that successful applicants are required to do some preparatory reading and complete a pre-arrival online course before the start of the first term. Students will be sent details after their place is confirmed.

Year 1 (Part IA)

You take four papers, including three compulsory Computer Science papers – covering topics such as foundations of computer science (taught in OCaml), Java and object-oriented programming, operating systems, and digital electronics, graphics, interaction design – and one Mathematics paper.

Year 2 (Part IB)

You take four papers, spanning core topics:
- theory – including logic and proof, computation theory
- systems – including computer design, computer networking
- programming – including compiler construction, advanced algorithms
- applications and professionalism – including artificial intelligence, graphics, security

You also undertake a group project which reflects current industrial practice.

Year 3 (Part II)

You choose from a large selection of topics which allows you to concentrate on an area of interest to you, such as computer architecture, applications (including bioinformatics and natural language processing) or theory. New topics inspired by current research interests include computer music, data science and robotics.

All students also work on a substantial project demonstrating their computer science skills, writing a 12,000 word dissertation on it. Projects are often connected with current Cambridge research and many utilise cutting-edge technology.

Year 4 (Part III, optional integrated Masters)

The fourth year is designed for students considering a career in academic or industrial research. You explore issues at the very forefront of computer science and undertake a substantial research project.

Progression to Part III is dependent on Part II examination achievement. Successful completion of Part III leads to the MEng qualification, as well as the BA degree attained at the end of Part II.
Our Economics course provides a rounded, rigorous education in economics which is valuable for a wide range of career paths.

**Economics at Cambridge**

Our course provides a sound understanding of core, pure and applied economics. However, while you study economics in considerable depth in this specialised degree, you employ ideas and techniques from many other disciplines too; including mathematics and statistics, history, sociology and politics. Therefore, our graduates are extremely well-qualified for a wide range of jobs and further courses.

**Teaching and resources**

Past and present Faculty members, such as Alfred Marshall and John Maynard Keynes, have played a major role in the subject’s development and several have been awarded the Nobel Prize in Economics (Sir John Hicks, James Meade, Sir Richard Stone, Sir James Mirrlees and Amartya Sen). The present Faculty remains committed to using economics to improve public policy and recent staff have been active on, among other bodies, the Monetary Policy Committee of the Bank of England and the Competition Commission, and they advise international agencies such as the United Nations, World Bank, International Monetary Fund and Organisation for Economic Co-Operation and Development.

Other benefits for Cambridge Economics students include access to an extensive range of statistical databases and software, and the Marshall Library of Economics, which holds a comprehensive collection of books, journals and other papers in economics. The student-run Marshall Society organises social events and informal lectures from distinguished visiting speakers.

**Careers and research**

At Cambridge, you develop skills in understanding complex arguments, analysis of practical issues and of data, and effective communication. Such skills are valuable in many careers, but particularly in professional, financial and managerial occupations. They also provide an advantageous foundation for numerous Masters degree courses.

Many graduates go on to professional training in chartered accountancy, actuarial work and similar fields. Others are employed by financial institutions, or as professional economists in industry, government and management consultancy.

I’d definitely recommend Economics here. The teaching’s great and the course is extremely broad in your first year, then you can specialise more in the areas you enjoy.

Ares
Course outline
Teaching is provided through lectures, classes and supervisions and you can expect between 10 and 15 lectures each week in the first year.

Assessment is mainly through formal written examinations that take place at the end of each year and the compulsory dissertation in Part IIB. Typically, you have one three-hour exam for each paper covered that year. In Part I, the British Economic History paper is assessed via an exam paper and a project. There is also a project within the Econometrics paper in Part IIA.

Year 1 (Part I)
Part I provides an introduction to the subject, a common core of knowledge which can subsequently be extended. There are five compulsory papers:
- Microeconomics
- Macroeconomics
- Quantitative Methods in Economics
- Political and Social Aspects of Economics
- British Economic History

Through these papers you cover topics such as supply and demand, the role of prices and markets, employment, inflation, the operation of financial institutions and monetary policy.

The Quantitative Methods paper provides an introduction to the use of mathematical and statistical techniques in economics, and is assessed by a written exam.

Year 2 (Part IIA)
Part IIA consists of three compulsory papers:
- Microeconomics
- Macroeconomics
- Theory and Practice of Econometrics I

You also take one optional paper, chosen from:
- International Trade and Development
- Modern Societies
- Mathematics and Statistics for Economists
- Labour
- Modern State and its Alternatives
- International Conflict, Order and Justice
- History and Philosophy of Economics
- Historical Perspectives on Economic Growth

Through these papers you acquire a knowledge and understanding of a range of key topics and analytical techniques in microeconomic and macroeconomic theory, develop knowledge of key econometric techniques, and learn the IT skills needed to undertake a project in applied econometrics.

Year 3 (Part IIB)
The final year consists of two compulsory papers:
- Microeconomic Principles and Problems
- Macroeconomic Principles and Problems

In addition, you take two optional papers and write a compulsory dissertation of 7,500 words.

One of the objectives of the final year is to extend your knowledge of economic theory and train you to apply this theory to practical issues and public policy. Therefore, the optional papers available can vary from year to year but recent examples include:
- Economic Theory and Analysis
- Political Economics
- Banking and Finance
- Public Economics
- The Economics of Developing Countries
- Industry
- Economic Theory and Analysis
- Political Economics
- Banking and Finance
- Public Economics
- The Economics of Developing Countries
- Industry
- Theory and Practice of Econometrics II
- World Depression in the Interwar Years
- The Politics of Europe
- Global Capitalism
- The Family

Education

Education is a rewarding interdisciplinary degree that allows you to combine the study of educational and social issues with one of three specialist areas: psychology of learning, international development or English, drama and the arts.

Education at Cambridge

Education is one of our most powerful means for change and growth in the modern world. On our course, you follow one of three tracks, studying Education alongside your chosen field of interest, which will include the opportunity to study in other Faculties relevant to your chosen track.

• The Education, Psychology and Learning track focuses on education from a psychological perspective, exploring human development and education in a variety of social and cultural environments. This track is accredited by the British Psychological Society (BPS).

• In Education, Policy and International Development you consider historical and contemporary discussions concerning these areas, and education’s role in economic and social change.

• Education, English, Drama and the Arts combines the study of English literature with key issues in education – such as debates around creativity, learning and culture – while giving you the option of studying practical drama.

Further study and professional qualifications

Our course provides excellent preparation for a wide range of Masters and doctoral research programmes, both at Cambridge – each track has close links to related MPhil programmes within the Faculty – and elsewhere.

Alternatively, for those intending to teach, the course provides a foundation from which to proceed to some initial teacher training courses (eg a PGCE).

After Cambridge

The career options for graduates are extremely varied and they find employment in a wide range of occupations in the UK and abroad. As well as further study and teaching, our students have gone into research, educational psychology and neuroscience, publishing, and the Civil Service. Others now work in government policy and administration, the media, theatre, heritage and museum education, HR, business and consultancy, charities and NGOs, and international development.

Facilities and resources

The Faculty of Education has excellent resources and facilities within a purpose-built building, designed to support teaching, learning and research. There is a psychology laboratory and a library that houses an extensive collection of material on education and related fields. Active research forms the foundation of our teaching so you’re taught by academics at the forefront of their fields and who specialise in cutting-edge research.

Education as a course and as a concept goes far beyond ‘schools’: it is a lens through which we can consider the whole of society.

Bali
Course outline

In your SAQ (see p7) you should indicate which track you're interested in studying.

You attend four to six lectures and seminars, and one or two hours of supervision per week in the first year.

You're assessed at the end of each year. Depending on the papers studied, this will be through coursework, written examination, or a combination of both. In the third year, all students also submit a dissertation.

Year 1 (Part IA)

You take four papers, including two compulsory Education papers:

- Critical Debates in Education – introducing major themes in education and Faculty research
- Language, Communication and Literacies – exploring the social, psychological and material context within which spoken language and literacy are developed

Your two remaining papers are determined by the track you're following:

- Education, Psychology and Learning – Learning and Human Development, and Introduction to Psychology
- Education, Policy and International Development – Education, Global Inequalities and Social Justice; and a paper from choices in the Human, Social, and Political Sciences (HSPS) and Geography courses
- Education, English, Drama and the Arts – Poetics, Aesthetics and Criticism; and either Drama Production and its Contexts or Literature and Culture

Year 2 (Part IB)

In Year 2, you take five papers. Two are compulsory – Designing Educational Research (a project in research design), and The Emergence of Educational Thinking and Systems (covering historical and philosophical perspectives on key aspects of education) – and you choose your third from several other education topics.

Your other two papers are track dependent:

- Education, Psychology and Learning – Formal and Informal Contexts of Learning, and Social and Developmental Psychology
- Education, Policy and International Development – International Issues in Inclusion and Diversity in Education, and a paper from either the HSPS or Geography courses
- Education, English, Drama and the Arts – two papers chosen from: International Literatures, Arts and Cultures; Theatre Practice and Production; a dissertation on a film, drama or English Literature topic; one paper from a range offered by the English Faculty

Year 3 (Part II)

You submit a dissertation of 8,000-10,000 words, then take a further four papers. Two of these are chosen from a list of papers on issues in education.

The next is a track specific paper:

- Education, Psychology and Learning – Education, Neuroscience and Society
- Education, Policy and International Development – Critical Debates in Education, Policy and International Development

For your final paper, you can take another ‘issue in education’ paper, or choose a paper from options in other relevant courses.
Courses
Engineering is about designing processes and making products to solve real-world problems. Our course enables you to develop your engineering knowledge, skills, imagination and experience to the highest levels in readiness for your future career.

Engineering at Cambridge
The Cambridge course is unique. It allows you to keep your options open while equipping you with all the analytical, design and computing skills that underpin modern engineering practice.

Part I (Years 1 and 2) provides a broad education in engineering fundamentals, enabling you to make a genuinely informed choice about the area in which to specialise (many students change direction as a result). Part II (Years 3 and 4) then provides in-depth training in your chosen professional discipline.

Department and facilities
The Department is a leading international centre for research, consistently ranked as one of the highest achieving amongst British universities. We also have strong links with industry, with many research projects funded by industrial companies.

Our facilities are excellent: the new Dyson Centre for Engineering Design provides access to traditional hand and machine tools, as well as modern computer-controlled machinery and rapid prototyping; the Design and Project Office is equipped with more than 80 workstations; and the library has 30,000 books and takes about 350 journals. The Department’s Language Programme offers specialised courses at all levels in French, German, Spanish, Chinese and Japanese.

Industrial experience
You’re required to complete six weeks of industrial experience by the end of the third year, obtained by deferring entry or during vacations. Our full-time Industrial Placement Co-ordinator helps deferred entrants and undergraduates to find suitable placements (in the UK and abroad) and sponsorship.

Exchange programmes
A small number of students spend their third year studying abroad through our exchange schemes with École Centrale Paris and the National University of Singapore (NUS).

Accreditation
The course is accredited by the Engineering Council and by all the major institutions, including the Institutions of Mechanical Engineers (IMechE), Engineering and Technology (IET), Civil Engineers (ICE), and Structural Engineers (IStructE), the Institute of Measurement and Control (InstMC), the Institute of Highway Engineers (IHE), the Chartered Institution of Highways and Transportation (CIHT), the Institute of Physics and Engineering in Medicine (IPEM), and the Royal Aeronautical Society (RAeS). An appropriate combination of Part II papers is required in each case.

The flexibility of the Cambridge course means you don’t commit yourself to one particular area before studying them at degree level.

David
Engineering (cont.)

Careers
When you graduate, you’re fully qualified in your chosen area, knowledgeable across the range of engineering disciplines, and able to apply new technologies in novel situations, giving you an advantage over engineering graduates from other more narrowly focused courses. Prospects are typically excellent, with less than four per cent of our students who graduated in 2017 reporting that they are still seeking employment or further study after six months.

The average starting salary of Cambridge Engineering graduates in 2017 was £32,300.

Our students are in great demand and they go on to careers in all the major industrial and commercial sectors. Positions currently held by some of our graduates include Graduate Engineer, Atkins; Graduate RF Systems Engineer, Airbus Defence and Space; Consultant, TTP plc; Analyst, Goldman Sachs; Real-Time Control and Software Engineer, UK Atomic Energy Authority; Business Analyst, McKinsey & Company; and Manufacturing Engineer, Rolls-Royce plc.

The students on the Engineering course are very friendly, and you get to know lots of people by working on labs together.

Liz

Entry requirements for Engineering

All Colleges require A Level/IB Higher Level Mathematics and Physics

Some Colleges require STEP (see p152)
A Level Further Mathematics is very strongly encouraged. If unavailable or you’ve recognised its desirability too late, we’d advise you to do as much additional pure maths and mechanics as possible, eg by studying advanced material or Further Mathematics AS Level.

All Colleges, except Trinity, welcome applications from students taking A Level Mathematics and a suitable vocational qualification, eg a BTEC Higher National Diploma in an engineering discipline. Applicants are expected to achieve the highest possible grades in A Level Mathematics and the vocational qualification. Those taking the Single Award Applied A Level in Engineering or the Principal Learning components of the Advanced Diploma in Engineering must also be taking A Levels in Mathematics and Physics.

All Colleges welcome applications from students wishing to defer entry in order to pursue an Engineering related gap year. Some colleges are particularly keen to support such applicants, please see the Department website for details.
Course outline

Teaching is provided through a mixture of lectures, practicals, projects and supervisions, and in Year 1 you can typically expect around 22 hours of teaching each week. You’re assessed each year through coursework and written exams.

A few students graduate after three years with the BA (Honours) degree. However, most continue to the fourth year (Part IIB), successful completion of which leads to the BA and MEng degrees. Progression to Part IIB is dependent on achievement in Parts IB and IIA.

Year 1 (Part IA)

The broad foundation of the first two years (Part I) gives you an understanding of the basic principles of a wide range of subjects, together with an appreciation of the external pressures under which these ideas are likely to be applied.

In Year 1, you take four papers and sit a three-hour written exam in each:

- Mechanical Engineering
- Structures and Materials
- Electrical and Information Engineering
- Mathematical Methods

You also undertake several coursework activities and projects on topics including structural design, product design, presentation skills, drawing, laboratory experiments and computer programming.

Year 2 (Part IB)

You study eight papers on core subjects at a more advanced level:

- Mechanics
- Structures
- Electrical Engineering
- Information Engineering
- Materials
- Mathematical Methods
- Thermofluid Mechanics
- Business Economics

In the third term, you select two topics from seven engineering disciplines, or one engineering topic plus a language option. These topics are application-focused, emphasise engineering design and introduce the more specialised work of the third year.

Coursework includes laboratory experiments and computing exercises. Several experiments are linked around the common theme of earthquake-resistant structures. A highlight of the year is the compulsory integrated design project where you work in teams of six to design and build robot vehicles which are then tested against each other.

Year 3 (Part IIA)

Professional specialisation begins in earnest and you study 10 papers from an extensive portfolio, from which a core is associated with one of the following disciplines:

- Aerospace and Aerothermal Engineering
- Bioengineering
- Civil, Structural and Environmental Engineering
- Electrical and Electronic Engineering
- Electrical and Information Sciences
- Energy, Sustainability and the Environment
- Information and Computer Engineering
- Instrumentation and Control
- Mechanical Engineering

Alternatively, you can choose (General) Engineering, in which there are fewer restrictions on paper combinations.

In addition, you take an Extension Activity (selected from several topics, usually relevant to your professional discipline) and, in the final term, choose two from a variety of design and computer-based projects or projects in a foreign language.

Year 4 (Part IIB)

In Part IIB, further specialisation is possible and you select eight papers from nearly 100 options which vary each year. These papers benefit from the Department’s research and are taught by experts in the particular field.

A major individual project occupies about half of your time. Many projects are associated with current Department research and have direct industrial input and application. Recent projects include super-tall timber high-rise design, nanotubes and graphene for polymer optoelectronics, a fitness predictor for racing cyclists, and whole-system design of tidal turbines.
If you have a passion for literature, we have a challenging course that will inspire you in your reading and develop your critical and imaginative abilities.

English at Cambridge
Over the centuries, many writers have studied in Cambridge: Spenser, Marlowe, Milton, Wordsworth, Coleridge, Byron, Tennyson, Forster, Plath, Hughes, Byatt and Zadie Smith. When established, the Cambridge course was considered daringly innovative and this ethos continues to shape teaching and research.

Today’s course balances a strong grounding in the core of English literature with the chance to explore literature from around the world, other art forms, the English language, and related intellectual traditions.

Teaching and resources
You are taught by some of the most eminent writers and thinkers who, between them, teach and research almost every aspect of literature. We have no set approach beyond instilling the valuable skills of critical thinking, scholarly rigour and good writing.

You have access to the vast resources of the University Library as well as the Faculty library, which houses around 80,000 books and provides computer facilities, skills training and welcoming features such as ‘Tea @ 3’. Our modern Faculty building also includes a drama studio and garden.

Socially, many English students pursue interests in creative writing, journalism and the performing arts.

What we’re looking for
English students need an intellectual curiosity which drives them to try new things and ask probing questions. We look for reading beyond the syllabus, and for independent, well-informed critical thinking.

After English
Our students develop the skills of critical thinking, close reading and effective communication. Many draw directly on their subject and pursue careers in arts management or information management, or go into academia or teaching.

Those same skills are valued by employers in many other professions too, such as the Law, the Civil Service, industry, accountancy and social work. And, unsurprisingly, many graduates go on to work in the media, theatre and film – such as Jeremy Paxman, Emma Thompson, Stephen Fry and Sam Mendes – or become poets, novelists and playwrights.

Different lecturers cater for a wide range of interests and subjects. There’s something for everyone, and a healthy emphasis on pursuing your own interests that’s intellectually liberating.

Camilla
Course outline
Teaching is provided through lectures, seminars, and small-group supervisions and classes.

You typically attend at least six hours of lectures or seminars, and two to three hours of individual, paired or small-group supervision each week. You normally write one or two short essays per week which you then discuss with your supervisor.

As well as unseen exams, there's a compulsory dissertation and over the three years you can replace three more of the written exams with coursework. Prizes are awarded for the best work.

Year 1 (Part IA)
You take two compulsory papers:
- Practical Criticism and Critical Practice
- Shakespeare (assessed by a portfolio of essays submitted in Easter Term)

You also start work on two of the period papers, which will be examined in Part IB.

Year 2 (Part IB)
You take one compulsory paper (English Literature and its Contexts 1300-1550) and a further three papers from the following list:
- Early Medieval Literature and its Contexts 1066-1350
- English Literature and its Contexts 1500-1700
- English Literature and its Contexts 1660-1870
- English Literature and its Contexts 1830-1945 or English Literature and its Contexts 1870-Present

One of these papers (with the exception of Early Medieval Literature and its Contexts 1066-1350) can be replaced by a dissertation.

Year 3 (Part II)
You take two compulsory papers:
- Practical Criticism and Critical Practice II
- Tragedy, which ranges from ancient Greek drama to contemporary writing

You also write a compulsory dissertation (of 6,000-7,500 words) and either submit a second dissertation (of 6,000-7,500 words) and take one optional paper, or choose two optional papers. The optional papers change regularly – the following are available in 2018-19:
- Chaucer
- Medieval English Literature 1066-1500
- The Medieval Supernatural
- Material Renaissance
- Lyric
- Modernism and the Short Story
- The Ethical Imagination
- American Literature
- Postcolonial and Related Literatures
- History and Theory of Literary Criticism
- Literature and Visual Culture
- Contemporary Writing in English
- Early Modern Drama 1588-1642
- Special Period of English Literature 1847-72

Subject to certain restrictions, it’s possible to take papers from the Anglo-Saxon, Norse, and Celtic; Classics; or Modern and Medieval Languages courses. Further details of these papers are available on the Faculty website.

Globalisation, environmental politics, urbanisation, conservation, climate change, glaciation, volcanology, Quaternary science, the future of developing regions, cultural differences – just some of the topics you can study on the Cambridge Geography course.

A wider world
All societies rely on relationships with each other and the physical environment. Increasingly these are fragile interdependencies presenting intellectual and practical challenges. Our Geography course tackles these issues from a broad base, but also allows you to specialise.

Facilities and resources
We have one of the UK’s largest geography libraries, containing around 20,000 books, journals and periodicals, and the Scott Polar Research Institute is an integral part of the Department. There are extensive computing resources, where you receive formal teaching in geographical information technology including Geographical Information Systems and remote sensing, and the Department’s intranet provides further online resources.

Fieldwork and travel
Fieldwork is an important part of our course and there are several one-day excursions and field trips in Years 1 and 2. A compulsory week-long residential field class in Year 2 leads to a piece of assessed practical work. Recent locations include Switzerland, Ireland, Germany, Denmark, Morocco and Spain. Students are required to contribute to the cost of field trips, but the costs are very substantially subsidised, and financial help is available.

Your Part II dissertation requires your own research, supported by the Department, usually carried out in the summer vacation following your second year. Dissertation subjects and locations vary widely: some students travel abroad, others stay in the British Isles.

Many students organise their own overseas travel, some with the University Expeditions Society. Department and College travel awards are available for this.

Careers
While Geography isn’t directly a ‘vocational’ degree, Cambridge Geography graduates are trained to deal with multivariate problems, are skilled in information retrieval, data management and computing, and are used to working on their own initiative, and as such are highly employable in a variety of professions.

Our graduates enter many different careers, including industry and commerce, charities, planning, teaching, finance, social and community work, environmental management and conservation, the media, politics, and the Civil Service. Positions currently held by graduates include entrepreneurs in international companies, analysts for major organisations (e.g., the International Organisation for Migration, the Royal Institution), House of Commons researchers and news journalists.

Geography’s a really varied course and it’s very difficult to get bored or frustrated with a topic because the focus changes regularly through the term.

Joe
Course outline
You typically have six to eight lectures each week (with associated reading), as well as practicals, laboratory work and field classes. In addition, you normally have three supervisions a fortnight at which you discuss a topic, usually following preparatory reading and essay writing.

Year 1 (Part IA)
You’re introduced to key themes and issues by studying two core papers:
- Human Geography – topics include globalisation; cultural geography; sustainable development; historical geography; urbanisation; geopolitics; uneven economies
- Physical Geography – topics include tectonics and volcanism; coastal processes; glacial processes; Quaternary coastal processes; Quaternary climate change; biogeography; atmosphere and climate

You’re assessed by one written examination for each paper.
You also submit Geographical Skills and Methods projects that cover numerical methods; survey techniques; documentary and archival data; spatial data; and field, laboratory and desk-based skills.

Year 2 (Part IB)
All students take a compulsory Living with Global Change paper addressing key concepts and current issues in geography, assessed through both coursework and written examination. In addition, you can begin to specialise and select three papers from a choice of six (also assessed by a combination of coursework and examination). Each year, three human geography papers and three physical and environmental geography papers are available. The lists below give examples of Part IB papers that may be offered.

Human geography:
- Austerity and Affluence
- Development Theories, Policies and Practices
- Citizenship, Cities and Civil Society

Physical and environmental geography:
- Glacial Processes
- Biogeography
- Quaternary Climates and Environments

Building on Part IA Skills and Methods, you also undertake project work involving field, lab and computer skills and techniques.
You participate in a one-week residential field class that contributes to your final year dissertation research by inspiring your choice of topic and developing specific field research skills. Following the field class, you submit a report on it and a dissertation proposal as part of your second-year assessment, along with statistics/spatial data analysis coursework and written examinations.

Year 3 (Part II)
You can either specialise further or maintain a balance across the subject as a whole. You select four papers from 12, which are assessed by either written examination or by a combination of written examination and coursework, which typically takes the form of an extended essay or laboratory report or poster presentation. Papers on offer vary each year but recent examples include:

- The Geographies of Global Urbanism
- Political Ecology in the Global South
- Landscape and Power
- Muddy Coasts and Estuaries
- Biogeography
- Glaciology
- Quaternary Climates and Environments
- The Political Geography of Postcolonialism
- Geographies of the Arctic
- Environmental Knowledges and the Politics of Expertise
- Volcanology
- Political Appetites: Geographies of Food and Power
- Legal Geographies

You also write a dissertation of 10,000 words on a topic of your choice, which you start work on during the summer between Years 2 and 3. The topic is defined by the second term of Year 2 and the proposal is assessed as part of your second-year coursework.
History

Also History and Modern Languages, and History and Politics.

Our History course offers a huge range of options that span three millennia and circle the globe. It allows you to combine breadth – exploring many different aspects and periods of history – with depth – focusing in on the topics that particularly interest you.

Across centuries and continents
Cambridge has one of the largest and best history faculties in the world, and our course reflects the quality and breadth of interest of our teaching staff. The History degree gives you the opportunity to explore the past from many different angles – including political, economic, social and cultural history – and to explore the interaction between history and other disciplines, such as politics, anthropology and archaeology.

There’s ample scope throughout to pursue personal interests and experiment with different historical approaches. Some paper options are shared with other courses, such as Asian and Middle Eastern Studies and Classics, and specialist papers allow you to work with source materials as varied as Hollywood movies and Renaissance art.

Facilities and resources
Our major resource is our teaching staff of more than 100 leading experts. In recent years Cambridge has consistently been among the top three of the world’s best universities for History in the QS World University Rankings, and both the Times and Guardian currently rank our course the best in the UK.

The Seeley Library and the nearby University Library mean that finding the right book is rarely a problem, and there is a wealth of rare materials and manuscripts suitable for students’ research. All undergraduate historians (not just those taking History and Modern Languages) are also encouraged to take up or improve foreign languages, and they have access to both the University Language Centre and specialist language teaching.

Careers and research
Cambridge historians acquire a range of skills that are attractive to employers: the ability to work independently, to evaluate evidence, and to present arguments clearly and persuasively.

In the past, our graduates have had no difficulty in securing rewarding jobs in a wide variety of sectors, ranging from journalism and broadcasting to teaching and research, finance, consultancy, law and public administration.

History at Cambridge is unique and challenging. You cover such a wide geographical and historical scope and receive the very best teaching from experts in their field.

Andrew
Course outline
Teaching is provided through a combination of Faculty lectures and seminar classes and College supervisions. On average, you attend eight to 10 lectures/classes each week.

Your weekly supervisions, for which you typically write an essay, give you the opportunity to debate and develop your ideas with a senior historian and expert supervisor.

Years 1 and 2 (Part I)
Part I lasts two years (six terms) and comprises six papers, the first five of which are broad survey papers designed to give you an overview of a period in history. You study one each term for the first five terms and sit a written examination in each at the end of Year 2.

- You take at least one paper in British political history and at least one paper in British economic and social history.
- For the other three papers it’s possible to study any period of British or European history from the Greeks to the present; global and imperial history; the history of North America and the United States; and/or the history of political thought. If you wish, you can begin to specialise, for example in ancient and medieval papers, or almost entirely in the twentieth century.

For the compulsory sixth paper – Themes and Sources, an introduction to the handling of primary sources – you submit a 3,000-5,000 word essay. There’s a wide choice of topics, typically investigating a major comparative theme in history (such as the environment, money and society, or the history of the body). The essay is written over a period of some months and involves individual research.

Year 3 (Part II)
You take five papers, three of which are compulsory:

- Historical Argument and Practice – a general methodological paper that reflects on the broad issues of historical argument and practice arising out of work throughout the degree course (themes range from empire to gender, and from revolutions to race)
- For your remaining papers, you can either choose two options from a list of Specified Subjects and Political Thought papers, or choose one such paper and write a dissertation of 10,000-15,000 words on a topic you have devised.

Specified Subject papers cover many different time periods and parts of the world, from the Roman world to the twentieth century, and from the history of the Pacific and Indian Oceans to Latin America.

Though the dissertation isn’t compulsory more than half of our students take the opportunity to write one, and many find it one of the most rewarding aspects of their time here at Cambridge. Recent examples of dissertation titles include Crime and the Entertainment Industry in Chicago 1921-33, The Decline of Vauxhall Gardens 1780-1859, and Robert Clive and the ‘Gift’ in Eighteenth-Century India.
History and Modern Languages

This superb joint Honours degree gives you the language skills and historical awareness to better understand foreign cultures and societies – in Europe and beyond.

Course outline
Language options are German, Italian, Russian and Spanish from scratch or post-A Level; Portuguese from scratch; and French post-A Level. You should indicate in your SAQ (see p7) which language you’re interested in studying.

Teaching is provided through lectures, intensive language classes, seminars and College supervisions. You can typically expect around 14 hours of teaching each week, alongside which you complete translation and other assignments, as well as supervision essays which you discuss with a subject specialist.

There are written exams at the end of each year, plus an oral examination in your chosen language. In the final year, you can offer a dissertation of 10,000 words in place of a written exam.

Year 1 (Part IA)
You receive intensive language training (including translation and conversation) and take an introductory paper on the literature, history, film and philosophy of the country where your language is spoken. You also choose two broad papers in history (European and/or global).

Year 2 (Part IB)
You continue with classes to improve your language skills, and also choose three advanced papers, including at least one in your chosen language (eg literature, history, film, art, thought) and history (European, global or intellectual).

Years 3 and 4 (Part II)
Year 3
You spend the third year abroad, studying, teaching or on a work placement, while gaining near-native proficiency in your language. You also complete a project; normally on a topic related to the history or culture of the country you’re staying in.

Year 4
In the fourth year, you continue with advanced language work, and take three specialised papers from a range of topics related to your language (eg literature, history, film, thought) and history (covering a variety of periods and parts of the world). You must take at least one from each subject.
History and Politics

This exciting joint Honours degree allows you to study a range of subjects from our highly regarded History and Politics and International Relations courses, together with bespoke papers which explore the relationship between the two disciplines.

Course outline
You take four papers in each year. Teaching is provided through Faculty lectures and classes and College supervisions, for which you typically write an essay and which give you the opportunity to discuss your ideas with a senior academic. In the first year, you can expect between eight and 10 hours of lectures and classes a week, along with one or two supervisions.

You're assessed at the end of every year – mostly by three-hour written exams, though some papers are assessed by coursework and in the final year you can replace one paper with a dissertation.

Year 1 (Part IA)
In Year 1, all students take Evidence and Argument, The Modern State and its Alternatives, and International Conflict, Order and Justice. You also choose a history paper from a range of topics, including various periods of British political history (covering 1485 to the present day), European history, and North American history.

Year 2 (Part IB)
In Year 2, students choose one paper in each of the following categories:
- a paper in the history of political thought
- a paper in international organisation or comparative politics
- a further history paper from a range of options, including British social and economic history, European history, North American history, and world history

For the fourth paper, you can either study Statistics and Methods or write two 5,000 word essays on questions drawn from a wide range of topics in history and politics.

Year 3 (Part II)
All students take an interdisciplinary paper that considers general and thematic issues in history and politics and the relationship between them.

You then choose three papers from a wide range of options, including third-year Politics and International Relations papers and History Special and Specified Subjects. The papers available each year may vary – see the Department website for those currently offered. Alternatively, you can replace one of these three papers with a dissertation of 10,000-15,000 words on a topic of your choice within the scope of the course.

I’ve really enjoyed exploring how History and Politics relate to one another. It’s great to have the opportunity to study such a broad and exciting range of topics.

Emma
History of Art

Fine collections of works of art, well-stocked libraries and the spectacular architectural environment on your doorstep mean that studying History of Art at Cambridge is particularly rewarding.

History of Art at Cambridge
Our course covers a wide spectrum of art and architecture, from the medieval to modern and contemporary periods. The aim is to foster a wide and deep understanding of art and architecture, and to help you develop visual literacy and awareness, as well as a range of critical and analytical skills.

A treasury of resources
There’s no substitute for looking at the real objects and we take full advantage of Cambridge’s outstanding resources, including the Fitzwilliam Museum and its picture conservation department, Kettle’s Yard and the Colleges’ art collections. The Department’s comprehensive library houses a rich collection of books, and you have access to the University Library and the Fitzwilliam Museum’s reference library (among others) as well. During vacations, students may wish to travel to see works of art and architecture, although this is not required. College financial support is usually available for this. Any core departmental trips – for example, to museums and galleries – which form part of the course, are funded by the Department.

Preparation
We advise that you visit museums, exhibitions and buildings, such as churches or country houses, and take descriptive notes or sketches of what you see. Try to analyse the effect works of art or architecture have on you. Some familiarity with history, classical mythology and the Bible is invaluable for the study of the meaning of works of art in the western tradition. The admissions area of the Department website suggests other preparatory reading.

After Cambridge
Our graduates are well-equipped for employment in museums and art galleries, agencies for the care and conservation of monuments and heritage management, fine art dealing, publishing, advertising and the visual media, as well as for teaching.

Our prominent graduates include the artists Antony Gormley and Marc Quinn; the model and actress Lily Cole; Dr Philip Rylands, former Director of the Peggy Guggenheim Museum in Venice; Sir Charles Saumarez Smith, former Director of the National Portrait and National Galleries, and former Chief Executive of the Royal Academy; Sir Nicholas Serota, former Director of the Tate Gallery and now Chairman of the Arts Council; and the Hon James Stourton, former Chairman of Sotheby’s UK.

The Department offers engaging lectures and ‘hands on’ experience with some of our country’s most beautiful paintings, sculptures and buildings. It’ll be a shame to graduate!

Bobby
Course outline
Teaching is provided through lectures, seminars and supervisions. First-year students typically have up to six hours of departmental teaching each week, as well as a supervision linked to your weekly reading and essays.

Particular attention is paid to the first-hand study of works of art and architecture – lectures and classes are regularly held in museums, taught by curatorial staff and other visiting experts – and you receive exceptional attention and support throughout your degree.

Assessment varies according to the paper being studied but typically includes written examinations and visual analysis tests (comparing and contrasting works of art), and a dissertation in both Year 1 and Year 3.

Year 1 (Part I)
Part I provides you with a broad introduction to the history of art, and to the making and meaning of art objects, with special emphasis on the architecture of Cambridge and the collections of the Fitzwilliam Museum. These run from the art of Ancient Egypt to modern times, and include major examples of medieval, Renaissance and post-Renaissance art as well as non-Western items.

During the year you take five compulsory papers and complete a short dissertation:
- The Objects of Art History – a survey of art and architecture that introduces the history of art from antiquity to the modern era
- The Making of Art – two papers covering issues of manufacture, technique and style in painting and sculpture in the context of their historical development
- The Meaning of Architecture and Art – two papers concerned with how works of architecture and art are interpreted in light of cultural traditions
- the short dissertation is 5,000 words on a work of art or architecture in or around Cambridge

Year 2 (Part IIA)
Part II deepens your knowledge and understanding by focusing in greater depth on specific issues. In Part IIA, you take one compulsory paper along with two pairs of papers on Special Subjects:
- Approaches to the History of Art and Architecture – the compulsory paper covers the history of the discipline and its critical methodologies from antiquity to the present day
- Special Subjects – chosen from a range of up to 10, each pair of papers deals with a particular person, subject or period. These currently include English Renaissance art and architecture, art and architecture in medieval Italy, British Architecture 1750-1830, Russian painting, art in Paris 1799-1870, Surrealism, contemporary art, and Islamic art

Year 3 (Part IIB)
In Part IIB, you take one compulsory paper, two further pairs of Special Subjects papers, and submit a dissertation:
- The Display of Art – the compulsory paper explores the ways in which art is collected, displayed and experienced in society
- Special Subjects – the options available are the same as Part IIA, but you take two subjects that you haven’t studied before
- the dissertation is 7,000-9,000 words on a topic of your choice, as agreed with your Director of Studies

Human, Social, and Political Sciences

Human, Social, and Political Sciences includes politics and international relations, social anthropology and sociology. You can specialise in one or two of these, but the flexibility of the course also enables exploration of a variety of subjects in the first year.

Explore subjects you like and experience new ones

Human, Social, and Political Sciences (HSPS) at Cambridge can be tailored from the start. This means it’s suited both to those with specific subject interests, and to those looking for a multidisciplinary degree.

The course comprises three core disciplines, taught by globally respected departments.

- Politics and International Relations explores politics within and between countries, covering issues from human rights and democracy, to financial crises and international conflict.
- Social anthropologists address ‘what it is to be human’ by studying social and cultural diversity – how people live, think and relate to each other around the world.
- Sociology focuses on the nature of modern societies and the processes that shape social life, by examining social institutions and topics such as power and inequality.

Depending on the track you choose, there may be options to take individual papers in the other HSPS subjects or from other courses as well.

Why choose Cambridge?

Cambridge offers a world class undergraduate education, and excellent teachers and learning facilities. The Faculty has three libraries and superb teaching resources including the Museum of Archaeology and Anthropology, computing facilities, multimedia-equipped teaching rooms, and a rare collection of ethnographic films.

And after Cambridge?

The analytical and critical skills, intellectual versatility, multicultural sensitivity and international outlook you develop through this course are widely sought after by employers. Recent graduates have pursued careers in academic and policy research, the Civil Service (including the Foreign Office), journalism, management consultancy, museums, national and international NGOs and development agencies, law, teaching, publishing, health management, and public relations.

During the first year, the different subjects vary broadly and you have time to decide which to specialise in from the second year.

Jonathan
Course outline
Teaching is delivered through lectures, supervisions and seminars. In the first year, you have around eight lectures and one or two supervisions a week.

You’re assessed at the end of each year – mostly through three-hour written exams, though some papers are assessed by coursework. In Year 3, you can substitute one paper for a 10,000 word dissertation.

Year 1 (Part I)
In Year 1, you take four papers. At least three must be from the core subjects – politics, international relations, social anthropology and sociology. Your fourth can be another core subject paper, or you can choose an archaeology, biological anthropology or psychology option.

Years 2 and 3 (Part II)
You choose one of three single-subject tracks (see below), or one of four two-subject tracks – Politics and Sociology, Social Anthropology and Politics, Sociology and Criminology or Sociology and Social Anthropology (details online).

Please note that it’s not possible to change track between Years 2 and 3, unless switching from a two-subject track to one of the subjects within it. Some final year papers require you to have taken a relevant Year 2 paper.

Politics and International Relations
Year 2
You study Comparative Politics, International Organisation, and History of Political Thought. Your fourth paper can be two 5,000 word essays on politics and international relations; a statistics paper; or one offered in another HSPS subject or from others such as History or Psychology (please see the website for the full range).

Year 3
You take a general paper in politics and international relations, plus three optional papers. One of these can be a 10,000 word dissertation, and one can be from selected papers in another subject. You can choose from a broad range of papers in politics and international relations, covering diverse themes, regions and contemporary issues.

Social Anthropology
Year 2
You take The Foundations of Social Life, Anthropological Theory and Methods papers and a paper on the anthropology of an ethnographic area. Your fourth is an optional paper.

Year 3
You take two advanced anthropology papers – Ethical Life and the Anthropology of the Subject; and Power, Economy and Social Transformation – and choose a further two from a combination of optional papers, an ethnographic area paper and a 10,000 word dissertation.

Optional paper topics in Years 2 and 3 usually include urban anthropology, gender, development, science and society, media and visual culture, as well as choices from related subjects such as Politics and Sociology.

Sociology
Year 2
You take Social Theory, Modern Societies II, and Concepts and Arguments in Sociology or a statistics and research methods paper.

Your fourth paper can be a further sociology paper, or one from another HSPS subject, Archaeology, History, History and Philosophy of Science, or Psychological and Behavioural Sciences (PBS).

Year 3
You choose three papers from a range of sociology and sociology theory topics – these might cover subjects such as media and culture, gender, war and revolution, global capitalism, criminology, race, religion. One paper can be replaced by a 10,000 word dissertation. Your final paper can be another in Sociology, or from another HSPS subject, Archaeology or PBS.

Land Economy is intellectually challenging – encompassing law and economics, with aspects of the environment, business finance and resource management – and offers many excellent career opportunities.

A challenging combination
Law, economics, and their relationship to the built and natural environments are central to Land Economy, along with other areas such as public policy, planning, the financial aspects of real estate and international development.

The multidisciplinary nature of the course is particularly relevant in the twenty-first century where the environment, law and economics and the control of scarce resources affect the daily lives of people around the world.

Teaching and resources
Our lecturers are specialists in their own field and include lawyers, economists, planners and experts in environmental policy, finance and quantitative methods. Many are involved in research projects of national and international concern.

The Department has a comprehensive library and an extensive range of computing facilities, including an intranet store of wide-ranging teaching, careers and other useful information.

Professional training
This degree differs from similar courses (such as Town Planning) offered elsewhere because it’s not wholly vocational, and the emphasis is on intellectual and academic content which appeals greatly to employers.

The degree is accredited by the Royal Institution of Chartered Surveyors (RICS) and allows graduates to progress directly to the Assessment of Professional Competence to become a full member of the RICS. It can also give partial exemption from the academic requirements of the Bar Council and Law Society for those intending to be lawyers. An appropriate combination of papers is required in each case.

Exceptional employment prospects
The Department has one of the strongest records for graduate employment across the University; a reflection of its focus on topics relevant to real-world problems, and its emphasis on the development of a broad range of skills.

Our graduates go on to become lawyers, economists, civil servants, and to work for national and international agencies. Many go into financial or business careers, and others enter public service with local or national organisations, or proceed to further study and research.

There are lots of options available.
I can tailor the course to my own strengths and interests and it opens up all kinds of fantastic job prospects.

Elaine
Course outline
Teaching in the Department is a mix of lectures, seminars, project work and supervisions. In a typical week, you can expect 10-15 hours of lectures and two or three supervisions.

Assessment is by written examinations and through coursework and projects, as well as a dissertation in Year 3 (Part II).

Year 1 (Part IA)
Part IA provides the framework for later specialisation. You acquire a thorough grounding in the core disciplines of law and economics and are introduced to the multidisciplinary nature of the degree through four compulsory papers:
• Economics
• The Public Sector: Institutional and Legal Frameworks
• Quantitative and Legal Methods for Land Economists
• Land Economy, Development and Sustainability

During your first year you develop a sound numerical base, computer literacy, and skills in oral presentation and report preparation.

Year 2 (Part IB)
In Part IB, you can continue studying a broad range of law, environmental policy and economics topics, or choose to specialise more closely in one of the three disciplines.
You take five papers, including at least one paper from a choice of two on law, and select your other four papers from a choice of six. Current options include:
• Environmental Economics and Law
• Fundamentals of Finance and Investment
• The Built Environment
• Land and Urban Economics
• The Law of Real Property: Principles, Policy, and Economic Implications

Year 3 (Part II)
Part II continues the work of the second year, with further opportunity for breadth or depth.
You’re required to take four papers chosen from a wide range of options which currently includes:
• Law and Economics
• Landlord and Tenant Law
• Planning Policy and Practice
• Land, Food and Ecosystem Services
• Land Policy and Development Economics
• Advanced Techniques in Finance and Investment for Real Estate

You also write a 10,000 word dissertation on any aspect of the Department’s work of your choosing.
Dissertation topics have covered all the research interests of Departmental staff and this is the opportunity to specialise in a topic that particularly interests you.
The choice is very broad and in the past students have written on, for example:
• the economics of gentrification
• Aboriginal land claims in Australia
• catastrophic risk management in capital markets
• the social perception of population density
• the future prospects of virtual currencies
• the upgrading of slums in Brazil
• road traffic and house prices
• financial institutions in sub-Saharan Africa
• the affordable housing legacy of the London Olympics

Management Studies 116
Law

Questions of analysis and interpretation, logical reasoning, ethical judgement, political liberty and social control: Law at Cambridge allows undergraduates to see law in its historical and social contexts, and to examine its general principles and techniques.

Law at Cambridge
Although our course (referred to elsewhere as LLB) is primarily concerned with English law, there are opportunities to study other legal systems, including civil (Roman) law, EU law and international law. You can also study theoretical and sociological aspects of law such as jurisprudence or parts of criminology.

Facilities and resources
The present Faculty teaching staff has expertise across nearly every aspect of English law and its history, as well as EU, international and civil law, legal philosophy and criminology.

The Faculty building houses lecture theatres, seminar rooms and a moot court, as well as the comprehensive Squire Law Library, offering an extensive collection of printed and electronic resources and excellent computing facilities.

The Faculty and University Law Society organise numerous activities including formal meetings, informal barristers’ and solicitors’ evenings, social events, lectures and moots (debates about hypothetical legal cases).

Erasmus Scheme
The Faculty currently has exchange agreements with universities in France, the Netherlands, Germany and Spain. About 15 undergraduates spend a year abroad studying the law of one of these European countries. See the Faculty website for details and updates on the Scheme.

After Cambridge
Currently, a Law degree alone isn’t a qualification for practice but ‘qualifying law graduates’ (who’ve passed the seven ‘foundation’ subjects) may proceed directly to vocational courses that lead to professional examinations. The foundation subjects are Constitutional Law, Criminal Law, Law of Tort, Law of Contract, Land Law, Law of Trusts (Equity), and Law of the EU. Please note that professional bodies are in the process of changing the requirements for qualifying as a solicitor or barrister.

Our graduates go on to qualify as barristers and solicitors, and find employment within the legal departments of the Civil Service, local government, industrial and commercial firms, banks, and international organisations. Others stay in academia or seek careers in administration, management, politics or finance.

The Cambridge Law degree is academically stimulating, challenging and rewarding; and provides the foundations for a successful future career.

James
Course outline
For each subject, you attend lectures given by teaching members of the Faculty. The typical number of lecture hours for each paper is 36 per year, mostly timetabled for the first two terms of each year, which equates to about 10-12 hours of lectures a week. You normally have a fortnightly College supervision in each subject as well.

With the exception of the Legal Skills and Methodology paper, for which you submit an extended essay, each paper is assessed by a written examination at the end of the year. In the third year, you have the option of substituting one paper for a dissertation.

Year 1 (Part IA)
In Year 1, all students take the same papers:
- Criminal Law
- Constitutional Law
- Civil Law

- Law of Tort
- Legal Skills and Methodology – a half paper providing training in legal methodology and research

Year 2 (Part IB)
In your second year, you choose five papers from a wide range of options. Most students take Contract Law and Land Law.

Other options are:
- Family Law
- International Law
- Administrative Law
- Criminal Procedure and Criminal Evidence
- Legal History

- Civil Law II
- Criminology, Sentencing and the Penal System
- Comparative Law
- Human Rights Law

Year 3 (Part II)
In the third year, you select and study five papers from an even more extensive range. Most students take Equity and European Union Law but you can develop your interests in, for instance:
- commercial law
- public law subjects
- labour law
- more theoretical aspects of law, such as jurisprudence

You can take certain half papers as well. In recent years, papers available have included:
- Landlord and Tenant Law
- Law of Succession
- Personal Information Law

- Law and Development
- Banking Law

You can also participate in a seminar course, submitting a dissertation in place of one paper. Seminar courses vary each year but in the past have included Crime and Criminal Justice, Women and the Law, Law and Ethics of Medicine, Public Law, and Select Issues in International Law.
Linguistics

Are you curious about our most crucially human attribute, language? Is a subject that combines the arts and sciences appealing? If you’ve found yourself asking ‘why?’ or ‘how?’ in relation to language, then Linguistics is for you.

Language and linguistics
Linguistics is the systematic study of human language. Superficially, there’s huge variation among the world’s languages, and linguists not only describe the diverse characteristics of individual languages but also explore properties which all languages share and which offer insight into the human mind.

The study of linguistics draws on methods and knowledge from a wide range of disciplines. For instance, the study of meaning draws on philosophy, the analysis of the speech signal uses methods from physics and engineering, and the study of language acquisition draws on psychology.

This variety is one of the things that makes linguistics fascinating: one day you might be poring over a medieval text for evidence of how the grammar of a language has changed, and the next, learning about how the larynx creates sound energy for speech or how we can record brain responses in a categorisation task.

Linguistics at Cambridge
Cambridge Linguistics is internationally recognised as world leading, having come fourth in the QS World University Rankings by Subject 2018, the highest position attained by a British university. Situated within the Faculty of Modern and Medieval Languages, Linguistics benefits greatly from colleagues specialising in the linguistics of particular European languages.

After Linguistics
The broad interdisciplinary training we offer provides our graduates with transferable skills that are greatly sought after by employers; for example, students learn to analyse quantitative data, construct abstract grammatical models, and test alternative hypotheses. Linguistics graduates find employment in a wide range of professions, from journalism to banking.

Linguistics provides particularly good preparation for vocational training too, in fields such as speech therapy, teaching, speech and language technology (eg developing speech recognition and translation software), law, translation, interpreting and even forensic linguistics.

Familiarity with a range of human languages is also a huge advantage in careers where rapid learning of unfamiliar languages may be involved, such as in the Diplomatic Service.

Studying Linguistics I can explore the full scope of a discipline which is still developing in many exciting directions, and focus on areas which I really enjoy.

Amelia
Course outline
Linguistics is divided into a one-year Part I and a two-year Part II, and teaching is delivered through a mixture of lectures, supervisions and practical sessions. A typical week involves four hours of lectures, two hours of supervisions (in groups of six students in Part I, and two students in Part II), and one to two hours of practical classes.
Assessment is by written examination, and practical exams in phonetics, as well as a dissertation in the final year.

Year 1 (Part I)
Part I provides a foundation across a wide range of linguistics taught within the Faculty.
You take the following four papers:
- Sounds and Words – an introduction to phonetics, phonology and morphology
- Structures and Meanings – looking at topics including sentence construction, semantics and pragmatics
- Language, Brain and Society – considering language and its relation to cognitive and social phenomena
- History and Varieties of English – a linguistic analysis of contemporary variation and historical change in English

Year 2 (Part IIA)
Part II allows you to specialise in the areas which particularly interest you. There’s a wide choice of topics to choose from, taught by the Department as well as other faculties and departments.
In Part IIA, you take four papers chosen from a wide range of options dealing with different linguistic levels and perspectives, which may include the following (not all options are offered every year):
- Phonetics
- Phonology
- Morphology
- Syntax
- Semantics and Pragmatics
- Historical Linguistics
- History of Ideas on Language
- History of English/History of French
- Language Acquisition
- Psychology of Language Processing and Learning
- Computational Linguistics

Year 3 (Part IIB)
In Part IIB, you take:
- Linguistic Theory – a general theory paper
- two further papers from the remaining Part IIA options
For your fourth paper, Part IIB also includes an element of individual research as you write a dissertation of 8,000-10,000 words on a topic of your choice.
Mathematics
Including Mathematics with Physics

Cambridge is renowned for the excellence of its Mathematics course. Equally challenging and rewarding, it offers the opportunity to study a wide range of subjects, from abstract logic to black holes.

Flexibility: a course that suits you
Two aspects of the course that our students greatly appreciate are its flexibility and the breadth of subjects offered. The amount of choice increases each year and after Year 1 you can choose the number of options you study. Some students take as many options as they can; others take fewer and study them very thoroughly.

This structure allows you to keep your options open, giving you the opportunity to discover your strengths, extend your knowledge and develop your interests before specialising.

Our Faculty
Since Sir Isaac Newton was Lucasian Professor (1669-96), mathematics teaching and research here have been enhanced by a string of brilliant mathematicians, including seven Fields Medallists and several Nobel Prize winners. Most current Faculty members are leading international authorities on their subject.

Careers
A Cambridge Mathematics degree is versatile and very marketable. The demand for our mathematicians is high in business, commerce and industry, as well as the academic world.

Around 45 per cent of our students go on to further study, while others follow a wide variety of careers. Recent graduates include a meteorologist, architect, sports statistician, journalist, cybersecurity analyst, and an avionics, radar and communications engineer, as well as teachers, actuaries, accountants, IT specialists, financiers and consultants.

STEP
For information about STEP, see p152. The University offers a free online STEP support programme (www.maths.org/STEP) designed to help prospective applicants develop advanced problem-solving skills and prepare for the STEP exams.

My Mathematics degree at Cambridge was inspiring and demanding, but most importantly academically rewarding, and it opened up opportunities I never knew existed.

Zoe
Course outline
In Year 1, you typically have 12 lectures and two supervisions each week. In the following years, the greater choice and flexibility means that the pattern of lectures and supervisions is more irregular, but the average load is roughly the same.

You sit four written examination papers each year in the first three years. In addition, there are optional computer projects in Years 2 and 3. In the fourth year, each course is examined individually, and you have the option of submitting an essay on a current research topic.

Year 1 (Part IA)
In the first year, there are two options to choose from:
- Pure and Applied Mathematics, for students intending to continue with Mathematics
- Mathematics with Physics, for students who may want to study Physics after the first year

You should state in your SAQ (see p7) which option you wish to take, though it’s possible to change when you start the course. You can still continue with Mathematics in the second year if you take Mathematics with Physics.

Part IA introduces you to the fundamentals of higher mathematics, including:
- the study of algebraic systems (such as groups)
- analysis of calculus
- probability
- mathematical methods (such as vector calculus)
- Newtonian dynamics and special relativity

You take eight subjects. Those taking Mathematics with Physics replace two Mathematics subjects with Part IA Physics from Natural Sciences, covering, for example, kinetic theory, electromagnetism, and practical work in a laboratory.

Year 2 (Part IB)
In Part IB, you choose from around 16 options available. In most, the topics of the first year are studied in much greater depth, but some new topics are offered, for example:
- geometry
- electromagnetism, quantum mechanics and fluid dynamics
- numerical analysis

There is also a computational projects course (assessed by means of reports and programs submitted before the summer examinations), using computational techniques to investigate mathematical problems.

Year 3 (Part II)
Year 3 gives you the opportunity to explore your mathematical interests in detail. There is a very wide choice, for example:
- cryptography
- algebraic topology
- number theory
- cosmology
- general relativity
- stochastic financial models
- waves
- automata and formal languages
- mathematical biology

There is also a computational projects course.

Year 4 (Part III, optional integrated Masters)
Part III has a world-wide reputation for training the very best research mathematicians. Progression to Part III, in which around 75 to 80 options are offered, normally requires a first in Part II or a very good performance in Parts IB and II, and successful completion leads to a BA with MMath. See the Faculty website for more details.
Medicine

At Cambridge, we offer two medicine courses – the Standard Course and the Graduate Course. Throughout, our aim is to educate students to become compassionate, thoughtful, skilled members – and leaders – of the medical profession.

Hard work, very rewarding

Success in medicine requires application and hard work, both while studying and when in practice. However, Medicine brings great personal rewards, offering a breadth and variety of career opportunities and excellent job satisfaction. No day in the life of a doctor is the same! The application of knowledge and research evidence to patient care provides a unique opportunity to combine scientific expertise with the human interactions that lie at the heart of the profession.

Our courses are intellectually stimulating and professionally challenging. As a medical student, you’ll experience a rigorous, evidence-based medical education within the research-rich environment of the University. Students have opportunities to pursue research and project work throughout the course.

Careers

We enable students to develop the excellent communication, clinical, interpersonal and professional skills required for good medical practice. Our focus on combining training in the core medical sciences with a broad-based clinical curriculum, encompassing primary, community-based and hospital care, prepares our students for a range of careers across general practice, medicine, psychiatry and other specialties.

The MB/PhD Programme

Designed for Standard Course medical students who are interested in a career in academic medicine, the MB/PhD Programme intercalates three years of research between Years 4 and 5. See online for more details (www.medschl.cam.ac.uk/education).

UK Foundation Programme and Medical Licensing Assessment (MLA)

Graduates are entitled to hold provisional registration with the General Medical Council (GMC) with a licence to practise, subject to demonstrating to the GMC that they are fit to practise (please note this may be subject to change). To apply for full registration as a doctor, you must satisfactorily complete the first year of a Foundation Programme post and continue to meet fitness to practise requirements. For more information visit www.foundationprogramme.nhs.uk.

A national MLA, to be taken by students in the final year of Medical School, will be introduced in 2022. Further information can be found at www.gmc-uk.org/education.

NHS Bursaries

NHS Bursaries (www.nhsbsa.nhs.uk/students) are currently available for eligible Medicine students from Year 5 of the Standard Course, or from Year 2 of the Graduate Course.

Medicine here is incredible. In the first year, we have full body dissection (offered in very few UK medical schools), which is an amazing way to learn anatomy.

Mhairi
Course outline – Standard Course

At Cambridge, you study the medical sciences first, before learning to apply that knowledge to medical practice as a clinical student.

The first three years (pre-clinical studies) involve lectures, practical classes (including dissections) and supervisions, with typically 20-25 timetabled teaching hours each week. The emphasis during clinical studies (Years 4, 5 and 6) is on learning in clinical settings: at the bedside, in outpatient clinics and in GP surgeries, which is supported by seminars, tutorials and discussion groups.

Assessment, both formative and summative, plays a significant role throughout. Your ongoing progress is reviewed weekly and termly by your College supervisors. Formal assessment, which determines your ability to proceed with the course, includes written and practical examinations, coursework submission and clinical assessments.

Successful completion of the first three years leads to a BA degree and on successful completion of the clinical studies in Cambridge you are awarded two degrees, the Bachelor of Medicine and the Bachelor of Surgery (MB, BChir).

Years 1, 2 and 3 (pre-clinical studies)

Years 1 and 2
In Years 1 and 2, you study the medically-relevant core scientific knowledge and skills needed as a medical professional.

Surrounded by some of the world’s best academic biomedical scientists, we provide you with the scientific basis that will allow you to develop your medical career to the full, whether your aim is to deliver outstanding patient care or you wish to contribute to clinical academic medicine, combining research and teaching with clinical duties to push forward the boundaries of health care.

Read more about Years 1 and 2 online at: www.biology.cam.ac.uk/undergrads/MedST.

Year 3
You specialise in one of a wide range of other subjects offered by the University (sometimes known elsewhere as intercalation) to qualify for the BA degree. Options include:

- Part II Biological and Biomedical Sciences (see p104)
- a subject less obviously related to medicine, such as Biological Anthropology, Management Studies or Philosophy

You will continue Preparing for Patients in Year 3, visiting community-based, health-related agencies.

Years 4, 5 and 6 (clinical studies)

Clinical studies are based at the Cambridge Biomedical Campus and Cambridge University Hospitals NHS Foundation Trust (Addenbrooke’s and the Rosie Hospitals). As a student, you normally spend at least half of your time on clinical placements in other regional NHS hospitals throughout the East of England and in general practices in Cambridge and the surrounding region.

Throughout your clinical studies, you build on your biomedical science education; developing the knowledge, skills and attitudes required to practise clinical medicine. Following an introductory course, each of the three years has its own focus – core clinical practice (Year 4), specialist clinical practice (Year 5) and applied clinical practice (Year 6) – and is built around several major themes, including:

- communication skills, patient investigation and practical procedures
- therapeutics and patient management
- Improving Health
- core science, pathology and clinical problems
- evaluation and research
- professionalism and patient safety

You have weekly small-group clinical supervisions with junior doctors to develop and monitor your clinical skills.

Read more about the clinical course online at: www.medschl.cam.ac.uk/education/prospective.

Fact file

Duration
Standard course
Six years – MB, BChir

2018 entry
Applications per place: 6
Number accepted: 265

Typical offers require
A Level A**A
IB 40-42 points, with 776 at Higher Level
Other qualifications See p151-2
See p90 for subject requirements

Admission assessment
BMAT, pre-interview (see p43 and www.cam.ac.uk/assessment)

Age
Applicants must be 18 by the start of the second term of Year 1

Colleges
Standard Course available at all Colleges except Hughes Hall

Location
Map references D, M (see p158-9)

Open days 2019
College open days (sciences)
Cambridge Open Days – 4 July, 5 July (see p154)

Related courses
Engineering 65
Law 82
Natural Sciences 98
Psychological and Behavioural Sciences 108
Entry requirements for Medicine

You may enter up to four medical courses in your UCAS application. Your remaining choice can be used for an alternative course without prejudice to your commitment to medicine. ‘Science/mathematics subjects’ refers to Biology, Chemistry, Physics and Mathematics. It does not include Psychology.

A Levels
- A Levels in Chemistry and at least one of Biology, Physics, Mathematics.
- Most applicants have at least three science/mathematics A Levels and some Colleges require this and/or particular subjects. See College websites for details.

Please note that in the past three admissions rounds, 96 per cent of applicants for Medicine offered three or more science/mathematics A Levels and, of these, 29 per cent were successful in obtaining a place. Of the three per cent of applicants who offered only two science/mathematics A Levels, just three per cent were successful in gaining a place.

International Baccalaureate
A Level subject requirements also apply to the IB – Higher Level subjects satisfy A Level subject requirements.

Other examination systems
See p151-2 and consult any College Admissions Tutor for further advice.

Admission assessment
All Standard Course applicants (including applicants to mature Colleges) are required to take the Biomedical Admission Test (BMAT) pre-interview (www.cam.ac.uk/assessment).

You should be registered (by your assessment centre – often your school/college) for the BMAT by 1 October 2019, and take the test on 30 October 2019. Alternatively, you can take the BMAT in September 2019, for which you must register yourself in advance. See website for details and please note you must only take the BMAT once.

Work experience
To develop understanding of what a career in Medicine involves and your suitability for your intended profession, you are strongly advised (though not required) to undertake some relevant work experience, either paid or voluntary, in a health or social care organisation.

We are not prescriptive about how this is obtained, recognising the widely differing opportunities available.

Graduate entry
Graduates may apply for the Standard Course as an affiliate student (see p37) to one of Lucy Cavendish, St Edmund’s or Wolfson Colleges with:
- a good Honours degree (2.1 or above) in any discipline
- passes at A Level (or equivalent), as left UK and EU graduates from any academic discipline with a good Honours degree (2.1 or above) and A Level Chemistry (normally passed within seven years of entry) may apply to the accelerated Graduate Course in Medicine (see opposite) at Lucy Cavendish, Hughes Hall, St Edmund’s or Wolfson Colleges.

Overall, graduate medical students with an undergraduate degree in an arts or humanities subject perform equally well on the course as those with biomedical sciences degrees.

Selection
Applicants must be keen scientists with a sound scientific understanding. As selection for medical school implies selection for the medical profession, admissions decisions are informed by national guidance on what makes a good doctor.

In addition:
- trainee doctors must satisfy the GMC’s fitness to practise requirements, both when applying and throughout the course
- offer holders are required to undergo an enhanced Disclosure and Barring Service (DBS) check
- successful applicants are required to complete a confidential occupational health questionnaire and be immunised against certain infectious diseases

See full details at: www.undergraduate.study.cam.ac.uk/courses/medicine.

If you are an applicant with a disability, including specific learning difficulties or a long-term health condition, you should contact a College Admissions Tutor as early as possible to discuss your needs and the course requirements. Such disclosures will be considered independently of your academic qualifications and the interview process.

I chose Medicine because it’s very academically and scientifically driven at the outset and more clinical towards the end, which opens up options when I leave.

Simon
Graduate Course in Medicine

In addition to the Standard Course, we also offer the Graduate Course in Medicine. Open to UK/EU graduates of any discipline (see opposite for entry requirements), successful completion of the accelerated Graduate Course leads to the MB, BChir degrees in four years.

The Graduate Course integrates core medical science with clinical medicine, with an emphasis on the development of clinical skills through direct patient contact in hospital and community environments throughout the East of England.

Please note that all applicants for this course need to complete the specific Graduate Course in Medicine application form in addition to their UCAS application.

You can find full details about the Graduate Course online at: www.medschl.cam.ac.uk/cgc.
Modern and Medieval Languages

Cambridge offers exceptional opportunities to study the languages and cultures of most European (and many non-European) countries. Our students acquire advanced linguistic and critical skills, as well as intercultural sensitivity, which makes them extremely sought after in the job market.

Modern and Medieval Languages (MML) at Cambridge

The Cambridge course is hugely flexible and offers a broad and multifaceted approach to the study of language and culture. You can pursue your interests in many areas – from Italian Renaissance art to contemporary Brazilian cinema, medieval German folk tales to socialist realism in Stalin’s Russia. MML also includes options in linguistics, such as the historical and cognitive dimensions of the languages you’re studying.

All our students study two languages (see p94), one of which can be learnt from scratch (the exceptions being French and Latin, for which A Level/IB Higher Level standard is required). No matter what your proficiency when you arrive, you leave with near native-speaker competence in at least one of your languages. Most of our language classes are run by native speakers.

We are a large and diverse Faculty which consists of six sections, whose members are internationally renowned experts in their fields. In the Guardian University Guide 2019, Cambridge came top for modern languages and linguistics.

Facilities and resources

Our students make good use of the Faculty library, the Media Centre (equipped for film studies) and extensive online Computer-Assisted Language Learning (CALL) resources, as well as bespoke language teaching and learning materials available at the Language Centre.

A year in...

MML students spend their third year abroad in one of three ways: they attend a foreign university, become an English-speaking assistant at a school, or do an internship with a firm. In the past, some have:

• worked at a lifestyle TV channel in Paris
• studied history at the Humboldt University in Berlin
• taught English as a British Council assistant in Buenos Aires
• conducted an orchestra in St Petersburg

You can tailor your year abroad to suit your own interests and later career goals, providing you spend at least eight months abroad and are constantly immersed in one of the foreign languages you are studying. If you wish, you can split the year between two countries, spending at least three months in each (www.mml.cam.ac.uk/ya).

The teaching staff are so welcoming and give up loads of time to ensure the most productive experience possible. The year abroad is the icing on the cake.

Rory

Continued overleaf
Modern and Medieval Languages (cont.)

Careers
Fluency in a foreign language, an understanding of foreign cultures, analytical and research skills are all in great demand on the job market. Employers – even those who are not primarily interested in languages – particularly value the experience, independence and cross-cultural awareness our graduates have gained during their year abroad.

Most graduates use their languages in their work, and all build on the many skills developed during their degree.

Our graduates find an array of different jobs open to them. Recent destinations include the BBC World Service, international law firms, UNICEF and KPMG.

For a small number, the degree is more directly vocational: they become professional linguists (language teachers, translators or interpreters), usually after further specialised training. For further information on what our graduates go on to do, see: www.mml.cam.ac.uk/applying/careers.

You can study two of:

- French
- German
- Italian
- Portuguese
- Russian
- Spanish

Alternatively, you can combine any of these with either Classical Latin (if you’re taking it at A Level/IB Higher Level) or Classical Greek (which can be studied either post-A Level or from scratch).

If you wish to combine one of these modern European languages with Arabic, Hebrew or Persian, you can do so within the Asian and Middle Eastern Studies degree course (see p51-3).

It is also possible to combine one of these modern European languages with History – see History and Modern Languages (p74).

Want to study more than two languages?

In the second and fourth years, it may be possible to take an introductory course in a language and culture you haven’t studied before. The languages offered are subject to availability but may include Catalan, Dutch, Modern Greek, Polish, Portuguese and Ukrainian.

Another possibility (open to any member of the University) is to take a one-year course at the University’s Language Centre (see p15) to obtain a further language qualification. Courses are currently available in basic Arabic and Mandarin, and in basic, intermediate and advanced French, German, Italian, Russian and Spanish.
Course outline
Teaching is made up of lectures, seminars, language classes, intensive oral work in small groups, and supervisions. For your language classes, you receive individual feedback from your teachers, outlining how you can improve further. For your supervisions, you prepare written work which you then discuss with a specialist in the field. In your first year, you can generally expect around 12-14 hours of teaching each week.

You’re assessed at the end of each year, primarily through written and oral examinations, and the submission of an extended research project (usually a dissertation) at the end of Year 3. You may also offer a second dissertation instead of one of the Part II written examination papers.

Year 1 (Part IA)
You study two languages, at least one at post-A Level/IB Higher Level standard. You should indicate which languages you’re interested in studying in your SAQ (see p7). The choice isn’t final, and some students change their mind before (or after) they start.

The main emphasis in Year 1 is on developing your language skills by studying a wide variety of authentic texts and audio visual material, as well as through a variety of teaching methods including Faculty classes of up to 15 students, and supervisions in groups of two or three.

You also take an introductory paper in which you explore three or more of the following topics:
- literature
- linguistics
- history
- thought
- film
- art

Year 2 (Part IB)
In your second year, you take five papers in total. You continue intensive language study with the aim of acquiring native or near-native fluency in both languages, and choose from a wide range of papers covering topics such as:
- literature
- linguistics
- history
- thought
- film
- art
- an introduction to a language and culture you haven’t studied before

You have the option to replace one exam with coursework in the second year.

Years 3 and 4 (Part II)
Year 3
In the third year, you spend at least eight months abroad, during which time you prepare a project that counts as one sixth of your final mark. This can be a dissertation, a translation project or a linguistics project.

Just before the fourth year starts, you take an oral examination back in Cambridge.

Year 4
You take six papers and are free to specialise in one language, to combine options from two or more languages, to take comparative options, and/or to take up to two options from certain other courses (eg English, History).

You do advanced language work and focus on topics such as literature, linguistics, thought, history, politics, film etc. in one or two of your languages.

There are also a number of comparative papers on offer which allow you to combine the study of both of your languages. These may include papers on European film, and the linguistics of the Germanic, Romance and Slavonic language families. Many students replace one of their written papers with a further dissertation (currently 8,000-10,000 words).
Music at Cambridge
Over recent decades many of the most significant figures in British music have studied or taught at Cambridge: composers such as Alexander Goehr, Judith Weir and Thomas Adès; performers like Joanna MacGregor and Mark Padmore; conductors including John Eliot Gardiner and Nicholas Collon; writers and broadcasters, including Alexis Petridis (rock and pop critic for The Guardian) and Sara Mohr-Pietsch (Radio 3); and crossover artists such as Delia Derbyshire and Clean Bandit.

Our undergraduate course has a strong academic component, particularly focusing on history, analysis, composition and performance, but also offering a range of other topics (see the course outline).

Facilities and resources
As well as providing a location for lectures, seminars and research activities, the modern Faculty building also houses:
- a professional concert hall (seating 500)
- an extensive library of music, books, periodicals and recordings
- a purpose-built recording studio
- music computing laboratories

Students can borrow period instruments and make use of the Faculty’s Javanese gamelan, and the Faculty organises a weekly Composers’ Workshop and regular Practising Performance Masterclasses that are open to all students.

In addition, the Faculty hosts several resident and associate ensembles (the New Music Ensemble, Collegium Musicum, The Endellion String Quartet, Britten Sinfonia, The Academy of Ancient Music, the Ligeti String Quartet and Voces8) which perform regularly and offer masterclasses, coaching and further composition workshops for students.

These facilities and resources are complemented by the University Library and by the libraries, practice rooms and computer suites available in Colleges. College funds are available for instrumental or vocal lessons for those taking a performance course.

Careers
Music graduates are extremely attractive to employers and can follow a career in a wide range of fields thanks to the transferable skills they acquire on our course. In recent years, graduates have pursued successful careers in publishing and the media, academia, arts administration, banking, law, public service and the charity sector.

Many of our students do enter the music profession in one guise or another. Recent graduates include pianist Tom Poster, Royal Harpist Anne Denholm, composer Cheryl Frances-Hoad, jazz musician Misha Mullov-Abbado, and record producer and audio engineer Myles Eastwood.

As well as studying one of the best music courses in the country, I’ve had opportunities for conducting, singing and acting that I just wouldn’t have had elsewhere.

Emma

Our course covers a broad range of music, from medieval plainchant to the blues, and a great range of approaches to thinking about and understanding music, from advanced analysis to the study of music and science.
Course outline
Teaching is provided through lectures, seminars and supervisions. In your first year, you can typically expect to have six lectures, three supervisions, and aural and keyboard skills classes each week. In later years, lectures decrease to make way for more seminar, small-group and one-to-one teaching.

Assessment takes place at the end of each year through written examinations; the submission of portfolios, compositions, essays and dissertations; and through recitals.

Year 1 (Part IA)
The first year consists of three major components:

- *historical and critical studies* – two and a half papers covering issues involved in understanding music and its relationship to society and culture. This includes tracing historical developments in Western music and contemporary approaches to thinking about music through a wide-ranging selection of case studies
- *tonal skills* – two papers giving you a thorough technical grounding in music of the Western tonal tradition through the acquisition of basic harmonic skills at the keyboard, aural work and writing music in a range of historical styles. This is a foundation for more advanced work in all musical fields
- *music analysis* – one paper that gives you an understanding of what makes music work through hands-on familiarity with a range of styles. This creates a bridge between your work in historical and critical studies and in tonal skills

For your final half paper, you have the choice of giving a 15 minute recital, submitting an original composition or writing an extended essay.

Year 2 (Part IB)
You take a further paper in each of the core Part IA areas (historical studies, analysis and applied tonal skills), which together take up half of your time.

For the remaining half, you choose three papers from a range of different topics. Subjects available change from year to year but normally include:

- in-depth historical topics
- jazz and popular music
- ethnomusicology
- notation
- keyboard skills
- music and science
- performance studies (including recital)
- composition
- a dissertation of 5,000-7,000 words

Year 3 (Part II)
In the final year, you have even more choice. There are no compulsory papers – you choose six papers from a wide selection of options which reflect your own interests and which may also develop the skills and knowledge needed for your chosen career path. Options available may vary each year but recent examples include:

- advanced performance
- advanced performance skills (keyboard or choral)
- a dissertation of 7,000-10,000 words
- composition
- Beethoven: the Late String Quartets
- Musical Countercultures of the 1960s
- Exploring Music Psychology
- Parisian Polyphony
- Music, Nationalism and Politics in Spain
- Issues in Music and the Moving Image
- Brahms’s *Ein Deutsches Requiem* in Context
- *Boris Godunov* and its Contexts
- Decolonizing the Ear

You can also work with individual staff members on your own projects, whether as an advanced performer, composer, historian, analyst, ethnomusicologist or music scientist. In this way, while our course gives you the solid understanding of the subject which a music degree should guarantee, it also offers you the flexibility you need to prepare for life after Cambridge.
Natural Sciences

Natural Sciences is the framework within which most science subjects are taught at Cambridge. The course offers the biological and physical sciences listed opposite, and the option to specialise or to study a range of subjects.

Natural Sciences at Cambridge
Natural Sciences (NST) offers a wide range of physical and biological science subjects from 16 departments in a unique and demanding course. A broad first year is combined with increasing specialisation in the second year, and the possibility of total specialisation from the third year.

The breadth of the course reflects the blurring of boundaries between the different sciences and before committing yourself to one department you study a variety of subjects, some of which may be new to you. This means you can change your mind about which subject to specialise in.

Visit the Departments’ websites for in-depth subject information and details about current research. All of these sites, as well as suggested reading for prospective students, can be accessed from the Natural Sciences website at: www.natsci.trips.cam.ac.uk.

Flexibility and choice
The flexibility of the course makes it possible to take purely biological sciences, purely physical sciences or a combination of both, according to your interests.

Many students discover a passion for the new subjects that they start in the first year, such as Earth Sciences or Materials Science, and continue with these in subsequent years.

Most students pursue a single advanced subject in Year 3 (Part II), and undertake a research project or dissertation in that field. Alternatively, you can take the broader Biological and Biomedical Sciences option or the Physical Sciences option (see p104).

After Natural Sciences?
Many of our graduates continue with further study and research, either in Cambridge or at other universities, in the chemical industry, pharmaceuticals, infection and immunology, biotechnology, environmental management or nanotechnology. Natural Sciences prepares you well for the challenges of research, especially in emerging interdisciplinary areas.

Natural Sciences students develop a range of skills that are highly valued by employers and they go into a wide range of careers; for example recent graduates include a maths teacher, a product development scientist, an investment banking analyst and a management consultant.

I wasn’t sure which area of science to specialise in and the first year allowed me to get a better insight into my strengths and weaknesses before deciding.

Tom
Course overview
Natural Sciences allows you to experience new areas of science, discover the interconnections between apparently diverse subjects, and gain an insight into different scientific methods.

See the course outline on the following pages for more information and the website (www.natsci.tripos.cam.ac.uk) for full details.

Year 1 (Part IA)
You choose three science subjects from:
- Biology of Cells
- Chemistry
- Earth Sciences
- Evolution and Behaviour
Plus one Mathematics option from:
- Mathematics
- Materials Science
- Physics
- Physiology of Organisms
- Mathematical Biology

Year 2 (Part IB)
You choose three subjects from:
- Biochemistry and Molecular Biology
- Biology of Disease
- Cell and Developmental Biology
- Chemistry A
- Chemistry B
- Earth Sciences A
- Earth Sciences B
- Ecology, Evolution and Conservation
- Evolution and Animal Diversity
- Experimental Psychology
- History and Philosophy of Science
- Materials Science
- Mathematics
- Neurobiology
- Pharmacology
- Physics A
- Physics B
- Physiology
- Plant and Microbial Sciences

Years 3 and 4 (Parts II and III)
Follow a broad curriculum:
- Biological and Biomedical Sciences
- Physical Sciences
Or specialise:
- Astrophysics¹
- Biochemistry¹
- Chemistry¹
- Earth Sciences¹
- Genetics
- History and Philosophy of Science¹
- Materials Science¹
- Pathology
- Pharmacology
- Physics¹
- Physiology, Development, and Neuroscience
- Plant Sciences¹
- Psychology
- Psychology, Neuroscience and Behaviour
- Systems Biology (Part II only)
- Zoology²

¹ These subjects offer a fourth year/Part III option, leading to an MSci degree.
² In Year 3, it is possible to focus on Ecology through either Part II Plant Sciences or Part II Zoology.

Entry requirements for Natural Sciences

'Science/mathematics subjects' refers to Biology, Chemistry, Physics, Mathematics and Further Mathematics. It does not include Psychology.

**All Colleges require** A Levels/IB Higher Levels in at least two science/mathematics subjects, see also subject requirements for Year 1 options (right/opposite).

**Some Colleges require** AS or A Level/IB Standard or Higher Level in a third science/mathematics subject and/or particular subjects. See individual College websites for details.

**A Levels**
Most students have at least three science/mathematics A Levels and having just two will restrict your Part IA subject choice. In these circumstances you’ll normally be expected to achieve A* in both of the science/mathematics subjects and encouraged to take an additional science/mathematics AS Level. The more useful combinations are:

- A Level Chemistry, A Level Mathematics, and AS Level Biology or Physics
- A Level Physics, A Level Mathematics and AS Level Further Mathematics
- A Level Biology, A Level Chemistry, and AS Level Mathematics or Physics

If you don’t have A Level Mathematics, you’re required to complete some preparatory work before the start of the course and must take Mathematical Biology as your mathematics subject in Year 1 (see opposite).

**International Baccalaureate**
The A Level subject advice above also applies to the IB.

**Other qualifications**
See p151-2 and consult any Admissions Tutor for further advice.

**Admission assessment**
Pre-interview written assessment (see p43 and www.cam.ac.uk/assessment).

**Year 1 (Part IA)**
You study three experimental sciences (from seven, 1-7 below/opposite) plus one mathematics (from two, 8-9), chosen at the start of the first term. Some Part I subjects have a competitive entry due to limited space.

You should indicate in your SAQ (see p7) whether your interests lie broadly in biological or physical sciences. The choice isn’t absolute, and many students change direction before they start or as they progress.

For each option, you usually have three hours of lectures, some practical work and one supervision per week. Assessment varies depending on the option taken but always includes written examinations. There may also be practical examinations or continuous assessment of practical work.

1. **Biology of Cells**
   **Highly desirable** A Level Chemistry
   **Useful preparation** A Level Biology
   - Biology of Cells introduces you to cell biology – topics such as cell structure and dynamics, macromolecules, biochemistry, genetics, molecular biology, development and cell communication.
   - This option is for biological and physical sciences students who wish to explore the topical and rapidly advancing fields of cell biology, genetics and bioinformatics.

2. **Chemistry**
   **Essential** A Level Chemistry (A Level Mathematics is essential to continue to Chemistry A in Part IB)
   **Highly desirable** AS/A Level Mathematics
   - Chemistry is concerned with how and why molecules form, and what determines their properties and the way in which they react.
   - You learn about the key concepts and theories which help us to understand and rationalise a wide range of molecular phenomena.

3. **Earth Sciences**
   **Essential** A Levels in at least two science subjects
   **Note** No previous subject knowledge necessary
   - Earth Sciences introduces the processes that create terrestrial planets such as ours – you learn about the forces driving plate tectonics, volcanic eruptions, climate change and biological evolution, and discover why other planets are different to Earth.
   - Practical experience is gained in the laboratory and on a compulsory one-week field course in Scotland.
   - Earth Sciences offers a wide scientific perspective and leads onto a broad range of careers. See the introductory course film on the Department website.
4. Evolution and Behaviour

**Highly desirable** A Level Biology
- This option explores the origin, evolution and diversity of life on Earth; major transitions such as the origin of eukaryotes and multicellularity; and the evolution of behaviour, intelligence, sociality and culture.
- You develop practical biological skills through practical classes and a field course.
- Evolution and Behaviour is relevant to the study of Cell and Developmental Biology, Ecology, Evolution and Diversity; Genetics, Plant Sciences, Psychology and Zoology.

5. Materials Science

**Essential** A Level Mathematics, and either Chemistry or Physics
- Materials Science is based in the physical sciences but is an interdisciplinary subject, combining elements of physics, chemistry, biology and engineering.
- Materials Science studies how properties arise from the structure and processing of materials, in an effort to develop new and improved materials for advanced technological applications.
- In Part IA you will learn about a wide range of topics, including atomic structure, mechanical properties, liquid crystal displays, jet engine turbine blades and spiders’ silk.

6. Physics

**Essential** A Level Mathematics and Physics or Mathematics and Further Mathematics, including the section on Mechanics

**Useful preparation** AS/A Level Further Mathematics
- Physics encompasses topics including Newtonian statics and dynamics, oscillations and waves, electric circuits, and gravitational and electromagnetic fields.
- It also introduces new themes such as special relativity and quantum mechanics.
- Part IA Mathematics (8, right) must be taken in parallel with this option.

7. Physiology of Organisms

**Useful preparation** AS/A Level Biology and/or Physics
- Physiology of Organisms explores and compares the physiology of a wide range of organisms by studying the different solutions developed by animals, plants and microbes to the problems of survival.
- Topics include respiratory and osmoregulatory systems, homeostatic mechanisms, and how plants and animals detect and respond to changes in their environments.

8. Mathematics

**Essential** A Level Mathematics
- Mathematics focuses on mathematical techniques used in the physical sciences.
- Subjects covered include vector calculus, vector algebra, matrices, complex numbers, ordinary and partial differential equations, elementary probability theory and computing techniques.

9. Mathematical Biology

**Highly desirable** A Level Mathematics
- Mathematical Biology focuses on mathematics relevant to biologists, particularly mathematical modelling.
- Subjects covered include differential equations, compartmental analysis, coupled non-linear systems, probability, statistics, matrix algebra and ecological modelling.
- Weekly computing practical classes teach simple programming via biological examples.
- A significant amount of A Level Mathematics material is needed to understand Mathematical Biology. Therefore, if you don’t have A Level Mathematics you’re required to complete 20–40 hours of preparatory work before you arrive, and are given alternative teaching and support during the first term in order to develop necessary mathematical skills.

Further information about the options and the various teaching and assessment methods can be found at: www.natsci.tripos.cam.ac.uk/subject-information/part1a.

Being taught by your subject’s leading minds is an experience in itself, and who can explain ideas better than the people who actually came up with them!

Nick
In Part IB, you choose three of the following subjects. Some build directly on Part IA subjects and some introduce what are essentially new areas. For most subjects you can typically expect to have three lectures, some practical work and a supervision each week. For timetabling reasons not all combinations are possible.

**Biochemistry and Molecular Biology**
- This option studies biological processes at the molecular and cellular level, building on Part IA Biology of Cells.
- Topics explored include gene structure and expression, enzyme catalysis, protein engineering, and control of cell growth and differentiation.
- Practicals teach important skills that are developed in subsequent years.

**Biology of Disease**
- This option is concerned with the scientific study of disease and encompasses all aspects of disease, including causes and effects, and the organism’s response to disease.
- Biology of Disease involves a broad range of biological disciplines, including cellular and genetic pathology, immunology, microbiology, parasitology and virology.

**Cell and Developmental Biology**
- The subject consolidates and extends your knowledge from Part IA Biology of Cells of how cells work and interact.
- It covers sub-cellular structure and function, signalling within and between cells, the development of multicellular tissues and organisms, and the experimental approaches to these.

**Chemistry A**
- Chemistry A focuses on the theories used to understand chemical bonding, structures and reactivity.
- This option introduces quantum mechanics and demonstrates the use of this and related theories to make sense of many chemical and physical properties.

**Chemistry B**
Chemistry B focuses on three main topics:
- organic (carbon-based) chemistry, which forms the basis of molecules as diverse as pharmaceuticals and synthetic polymers
- the enormous range of compounds and structures formed by other elements (inorganic chemistry)
- the chemical processes which are the basis of life

**Earth Sciences A**
- This option covers the surface environments of the Earth – the atmosphere, hydrosphere and biosphere – together with their geological products.
- It encompasses sedimentology, palaeobiology, oceanography, tectonics and sedimentary basins.
- You have laboratory work and compulsory field courses in Cumbria and Southwest England.

**Earth Sciences B**
- Earth Sciences B deals with our planet’s formation and examines the chemical and physical processes in its interior.
- It covers mineral growth and crystallisation under different conditions; and the role of plate tectonics in igneous and metamorphic rock formation and its influence on surface volcanism.
- You have laboratory work and compulsory field courses in Cumbria and Southwest England.

**Ecology, Evolution and Conservation**
- Ecology explores the relationships between plants, animals and their environment.
- It covers marine, freshwater and terrestrial systems; human impact on climate change and aerial pollution; ecological genetics and ecological dynamics; and the world’s biodiversity, its origin and conservation.
- Practical work includes a field course in Surrey.

The third-year research project helps you to see if you want a career in research, and the lab experience is highly appreciated by employers and institutes.

**Sophia**
Evolution and Animal Diversity
- Explore the evolution and diversity of animals, and look at how their form, function and behaviour are adapted to their lifestyle and their environment.
- Comprises sections on Behaviour and Ecology, Brains and Behaviour, Insect Biology, Vertebrate Evolutionary Biology and Evolutionary Principles.

Experimental Psychology
- Experimental Psychology is the study of the mind, brain and behaviour through experimental and observational methods.
- Teaching is supported by practical classes.
- Topics covered include sensory processes and perception, learning, reasoning, cognitive and social development, psychopathology, social psychology, and intelligence.

History and Philosophy of Science
- This option explores the historical, philosophical and social dimensions of the sciences.
- Topics covered extend from early astronomy and alchemy to the discovery of DNA and climate change.
- We examine what is so special about science and what is the role of social and historical context in the production of knowledge.

Materials Science
- Part IB Materials Science builds on the topics covered in IA and introduces new areas such as chemical and electrical properties of materials.
- You learn about how different materials are fabricated, including metals, polymers and ceramics, and how these materials function in service.
- This option also covers the behaviour of functional materials, such as semiconductors and superconductors.

Mathematics
- Mathematics incorporates topics including more advanced matrix theory, Cartesian tensors, more advanced theory of differential equations, Fourier transforms, calculus of variations, complex analysis and group theory.
- Some topics involve continually-assessed practical work, using computers to illustrate and exploit numerical techniques.

Neurobiology
- Neurobiology covers the development, function and plasticity of the nervous system.
- You explore the different sensory systems, the motor system and higher functions of the nervous system (including motivation, emotion, language and memory).

Pharmacology
- Pharmacology deals with the effects of chemicals on biological materials.
- The option covers how receptors work at the molecular level, intracellular messengers, synaptic pharmacology, drug discovery, antimicrobial and anti-cancer drugs, steroid receptors, and the use of drugs to control inflammation, immune responses, the central nervous system and cardiovascular system.

Physics A
- Physics A provides a rigorous grounding in the principal themes of modern physics.
- The option deals with waves and optical systems, quantum physics and an introduction to condensed matter.
- A module on experimental methods supports your practical work.

Physics B
- Physics B lays the foundation for a professional understanding of physics and is built on the three key areas of classical mechanics, electromagnetism and thermodynamics.
- All students also take an introductory course in C++ programming, with associated practical exercises.

Physiology
- In Physiology, you study systems physiology in detail, concentrating on mammals, in particular man.
- The option covers function at the cellular level to the complex operation of major body systems at the level of the whole organism, and how these systems respond to challenges.

Plant and Microbial Sciences
- Plant and Microbial Sciences considers the fundamental biology of plants and microbes.
- Studying plants and microbes is essential to deliver sustainable solutions to global issues including food security, disease control, drug discovery and bioenergy supplies.

Further information about the options and the various teaching and assessment methods can be found at: www.natsci.tripos.cam.ac.uk/subject-information/part1b.
Students can retain a broad study of science, though most pursue a single subject to a depth matching that of single science degrees elsewhere.

In Parts II and III, lecturers are often actively researching the topics being covered and many are world leaders in their field. Practical work is open-ended and most students carry out a significant research project which is assessed as part of the final examination.

Specialising in Part II is appropriate for continuation to a fourth year (Part III) and progression to Part III is dependent on a satisfactory level of performance.

Some Part II subjects have a competitive entry due to limited space.

A BROAD CURRICULUM

Biological and Biomedical Sciences
- Maintain a breadth of study by taking a major subject in a biological option and a minor subject from options in biology, biological anthropology, sociology and the history and philosophy of science.
- A dissertation replaces the practical laboratory-based research project.

Physical Sciences
- This option allows you to continue your studies in a chosen discipline together with another subject.
- You essentially take half of one of Part II Chemistry, Earth Sciences or Physics, alongside a further Part IB subject not already taken and write a dissertation.

PURSUE A SPECIALISM

Astrophysics
- Part II Astrophysics introduces a range of contemporary astrophysics topics, such as relativity theory, physical cosmology and stellar dynamics.
- Part III students choose from options offered in Part III of the Mathematics course and by the Department of Physics, and undertake a substantial project.

Biochemistry
- Part II Biochemistry covers macromolecule structure and function, gene expression, and molecular cell structure and function of prokaryotic and eukaryotic organisms, and includes a practical project.
- Part III features a two-term research project carried out alongside a research team directed by a leading scientist, and discussion of advanced topical papers.

Chemistry
- Part II Chemistry offers various options in which to specialise, ranging from synthetic organic chemistry to atmospheric science, and from theoretical chemistry to chemical biology.
- In Part III, you join a research group in the Department and work on your own project for two terms.

Earth Sciences
- Some specialisation is possible within tectonics and geophysics, petrology, climate science and surface processes, palaeobiology and mineral sciences.
- Part II features an independent mapping project and a field course in Greece (both compulsory trips).
- Part III involves a major research project and a compulsory field course in Spain.

Genetics
- Part II Genetics covers how genetic information is passed from generation to generation, how genes work and control organism development and behaviour, and processes that give rise to genetic change.
- More informal sessions explore the social aspects, and implications, of genetic knowledge.

History and Philosophy of Science
- Part II offers a broad range of papers concerning the historical development of science, medicine and technology, the methods of scientific enquiry and the social and political dimensions of scientific knowledge.
- Part III students have the opportunity to carry out focused research on the topics that interest them.

Materials Science
- Part II builds on the topics covered in previous years, advancing your understanding of the links between the processing, structure and properties of materials such as modern alloys, composites and devices.
- Part III features a range of optional modules and concentrates on recent developments, modern experimental techniques and cutting-edge research.
- Part III students carry out an in-depth research project in one of the department’s research groups.

Pathology
- Pathology combines numerous biological disciplines and in Part II you choose two from: Cancer and Genetic Diseases, Dynamics of Infectious Diseases, Immunology, Microbiology and Parasitology, and Virology.
- An important element of the course is a project in which you join a research group.

Pharmacology
- Part II Pharmacology covers contemporary topics taken to the level of current research.
- Subjects covered include intracellular messengers, ion channels and transporters, anti-cancer drugs, strategies for drug discovery, and the control of neurodegenerative disease.
- A research project enables you to join an active research group.
Physics
• Part II encompasses the core areas of electrodynamics, relativity, advanced quantum theory and statistical physics.
• Part III options include astrophysics, particle physics, and soft matter and biological physics.
• You also undertake a substantial project within a research group.

Physiology, Development and Neuroscience
• Physiology, Development and Neuroscience are broad but interlinked subjects.
• In Part II, you focus on Development and Reproductive Biology, Integrative Physiology or Neuroscience, or combine topics from all three.
• You take part in cutting-edge research during a two-term research project.

Plant Sciences
• Plants are increasingly the focus of key global issues: maintaining food, fuel and biodiversity despite climate change.
• You specialise in areas of your choice. Lecture modules include workshops and discussion groups, and you conduct a research project embedded within one of our labs.
• It is possible to focus on Ecology in Year 3. You will choose four modules and conduct a research project to address the challenges we face in understanding and guarding our natural environment.

Psychology
• Part II Psychology enables you to pursue interests within biological, comparative and evolutionary psychology or human psychology.
• You choose from various options and work with leading scientists on an original research project.

Psychology, Neuroscience and Behaviour
• This option covers developmental neurobiology, molecular neurobiology, sensory transduction, central mechanisms of sensation and behaviour, neural circuits, control of action, memory and higher functions, and neural degeneration and regeneration.
• Technical workshops and an experimental research project of your choice provide practical training.

Systems Biology (Part III only)
• Systems Biology determines how parts interact to make a working organism, using computer models to describe the interaction networks and predict their performance.
• The option comprises lectures, computer-based practicals, seminars and a research project working alongside leaders in the field.
• You will need to have studied Mathematics or Mathematical Biology at IA or Mathematics at IB to take Systems Biology at Part III.

Zoology
• Zoology encompasses cell and developmental biology, behaviour and behavioural ecology, molecular approaches to evolution, palaeontology, population biology and conservation science.
• You choose options from these areas and some other Part II subjects and carry out research projects, working with leading scientists in these fields.
• It is possible to focus on Ecology in Year 3. You will choose four modules and conduct a research project to address the challenges we face in understanding and guarding our natural environment.

Further information about the options and teaching and assessment methods can be found at:
www.natsci.tripos.cam.ac.uk/subject-information/part2
Philosophy

Do you enjoy arguments on the pros and cons of general issues? Do you relish puzzle-solving? Do you like subjects that emphasise rigorous thought? Our Philosophy course encompasses all of these and much more besides.

Why Philosophy at Cambridge?
Philosophy explores human thought, the basis of knowledge, the nature of reason, consciousness and cognition, as well as the foundations of value and political theory. Its questions are intriguing and its study requires complex critical thinking, rigorous analysis and consideration of new perspectives.

Cambridge occupies a distinguished place in the history of philosophy. It was here, in the early twentieth century, that Russell, Moore, Wittgenstein, Ramsey and others developed the analytic style of philosophy that is now prominent in much of the world. Today, the Faculty retains a strong commitment to this analytic tradition, combining it with study of the history of philosophy from Plato to the present day to offer one of the most far-reaching courses of its kind available anywhere in the world.

Teaching and learning
Our approach emphasises the values of the analytic school: rigour, clarity and independent thought. But its content extends well beyond the analytic tradition and its main preoccupations. For instance, we currently offer papers on Greek and Roman, and early modern philosophy, as well as political philosophy and aesthetics.

You don’t need to have studied philosophy previously, but we do recommend you do some preliminary reading (see the Faculty website for suggestions).

The Faculty has close links with related faculties such as Classics, History, and History and Philosophy of Science, so you can take advantage of a wide range of specialised lectures and seminars. You also have access to many excellent libraries.

After Philosophy
Although a Philosophy degree isn’t an essential qualification for any particular career, the analytical and critical skills developed through its study (eg rigour, precision, creativity) prepare our graduates for a variety of professions including business, computing, journalism, administration and law. Around a quarter of recent graduates have gone on to further study, with others starting careers in publishing, teaching, banking and investment, arts and recreation, IT and public services.

I was drawn to philosophy because of the depth of the questions it tries to answer, and also because of the breadth of topics within the course.

Mat
Course outline
Much of the teaching takes the form of lectures, with additional classes for some subjects (such as first-year Logic).

You have weekly supervisions, for each of which you’re given topical reading and asked to write an essay which you then discuss with your supervisor. Although it varies throughout the year, each week you typically have between six and 12 lectures, and between one and three supervisions and/or small classes.

Assessment is predominantly by written examinations. However, in Parts IB and II one written examination can be substituted with two extended essays of 3,000–4,000 words. Part II offers the additional alternative of submitting a dissertation of 6,000–8,000 words on a subject of your choice.

Year 1 (Part IA)
The course is designed to accommodate the many students studying philosophy for the first time.

In the first year, you acquire the reasoning skills that enable you to tackle philosophical problems and to think intelligently about abstract questions generally, not just gather information about who said what. Therefore, you’re encouraged to approach topics in your own way and we organise regular discussion groups for first- and second-year students.

Part IA gives you an introduction to philosophy through the study of five core compulsory papers:
- Metaphysics and Philosophy of Mind
- Ethics and Political Philosophy
- Meaning
- a half paper on philosophical methods
- Set Texts, such as Plato’s Meno, Descartes’ Meditations on First Philosophy and J S Mill’s On Liberty and The Subjection of Women

Year 2 (Part IB)
Years 2 and 3 focus on areas that particularly interest you. Part IB is about exploring the philosophical aspects of a range of issues, both practical and theoretical.

There’s one compulsory paper – Knowledge, Language and the World – and you choose three or four (depending on the combination) further subjects from:
- History of Analytic Philosophy
- Ethics
- Greek and Roman Philosophy (from Classics)
- Early Modern Philosophy
- Philosophy of Science
- Political Philosophy
- Experimental Philosophy (from Natural Sciences, involving practical work)
- a general paper

Year 3 (Part II)
Our objective in Part II is to provide you with an understanding of various contemporary debates and to familiarise you with current philosophical concepts. Lectures explore current and new positions on debates and you participate in seminar discussions on advanced subjects.

There are no compulsory papers and you choose four from an extensive range of subjects. These include most of those mentioned above, studied at a more advanced level, as well as several papers covering new areas. Papers recently available include:
- European Philosophy from Kant
- Mathematical Logic
- Philosophical Logic
- Aesthetics
- Philosophy in the Long Middle Ages

It’s also possible to take one or two papers from another course, such as Classics or Theology.
Our course
Psychology is very diverse – overlapping with and contributing to many other disciplines such as anthropology, archaeology, linguistics, neuroscience, philosophy and sociology.

Psychological and Behavioural Sciences (PBS) at Cambridge gives you the opportunity to study cognitive, social, developmental and biological psychology within the broader context of the behavioural sciences.

The course covers, for example, cognitive psychology, psychopathology, language, brain mechanisms, gender, family relationships and influences, personality, and group social behaviour. A wide range of optional courses allow you to study the topics that interest you most in greater depth.

Teaching and facilities
In the Department of Psychology, you’re taught by lecturers and researchers of international excellence. Subject societies and seminar programmes offer regular talks from guest speakers too.

In addition to this academic expertise, you have access to the Department library and specialist collections held in associated departments’ libraries – amounting to around 50,000 books and more than 150 periodicals – as well as other resources and computing facilities.

Professional accreditation and careers
The University’s teaching of psychology is accredited by the British Psychological Society (BPS). This means that students who successfully graduate (with at least second class Honours) achieve the ‘graduate recognition’ needed to pursue a career in psychology.

Many students continue with further study and research, and graduates are eligible for admission to professional courses in clinical, educational, forensic or applied psychology. Recent graduates of psychology at Cambridge have gone on to positions in psychology and related fields, as well as careers in social, community and charity work, research and teaching.

Our course also equips you with skills and knowledge applicable in a range of professional sectors, including the media, management, the Civil Service, finance, law and business.

Not all courses here give you the opportunity to cross the boundary between science and humanities – be prepared for the PBS fun!

Quain
**Course outline**
Teaching is provided through lectures, classes or seminars, and supervisions. Some papers include a practical element, which takes place in laboratories. You can typically expect two lectures a week for each paper.
You also have one or two supervisions a week to discuss your work and develop your reasoning and ideas.

**Year 1 (Part IA)**
In Part IA, you take a total of four papers, two of which are compulsory:
- Introduction to Psychology
- Psychological Enquiry and Methods (this includes practical demonstrations and exercises)
The remaining two papers are chosen from a selection of up to nine options. The optional papers available each year may vary but subjects include:
  - biological and social anthropology
  - education
  - evolution and behaviour
  - politics
  - philosophy
  - sociology
At the end of the year, you sit a three-hour written examination in each paper.

**Year 2 (Part IB)**
Part IB provides a foundation for the research-led teaching of the final year while also allowing you to begin to specialise in those areas that most interest you.
You take four papers in total. All students take:
- the Social and Developmental Psychology paper
- the Cognitive Neuroscience and Experimental Psychology paper, which teaches research methods and includes laboratory work
The optional papers are selected from a broad range. The subjects may change from year to year but typically include papers in:
  - biological and social anthropology
  - education
  - history and philosophy of science
  - neuroscience
  - philosophy
You sit written exams in each paper at the end of the year.

**Year 3 (Part II)**
In your final year, you undertake a research dissertation of 7,000 words on a psychology topic of your choice. You also choose a further three papers from a selection available, each of which is assessed by a written examination.
The subjects of these papers may change from year to year but typically include the following topics:
  - social and developmental psychology
  - cognitive and experimental psychology
  - behavioural and cognitive neuroscience
  - criminology
  - linguistics
  - selected subjects from those offered at Part IB
Theology, Religion, and Philosophy of Religion

This fascinating course enables you to combine the study of world religions with philosophy, ethics, history, literature, languages, sociology and classics. It explores contemporary and historic thought, culture and texts.

A relentless pursuit
The study of theology and religion is increasingly important in a world where religious belief is a driving force behind social and political events.

Theology, Religion, and Philosophy of Religion is a broad and demanding degree that addresses fundamental questions through a range of religious traditions and philosophical standpoints. Encompassing the history, practice and thought of the major world religions of Buddhism, Christianity, Hinduism, Islam and Judaism, the course develops your understanding of the significance of religion and its cultural contexts.

You have considerable freedom to create a varied programme of study by exploring a diverse range of topics. Alternatively, you can follow a particular pathway if you wish to specialise in a specific area of interest.

World class resources
Cambridge is an excellent place to study religion – offering access to the latest research and historic resources in the Faculty, College and University libraries. For example, the University Library holds the Codex Bezae (an important early version of the Gospel) and the Genizah collection (a globally significant source for medieval Judaism).

Our outstanding teaching is delivered by world experts in a variety of faith traditions and in the study of religion, religious practice, and philosophy of religion.

Excellent career prospects
Our course equips students with significant transferable skills that are highly valued in a wide range of professions. Around 40 per cent of our students continue to further study in theology or related disciplines, teacher training or law conversion courses. Our graduates commonly choose professional career routes in business, public services, the media and education.

Theology combines breadth and depth, allowing a huge variety of options for different people – I’m always amazed at the number, range and quality of the papers offered.

Dominic
Course outline
Teaching is provided through lectures, classes and supervisions. You can expect up to nine hours of classes and lectures each week (including six for non-language papers and three for languages), as well as a weekly supervision. Assessment is mainly by three-hour written examinations, but some papers are assessed by coursework.

Year 1 (Part I)
You take five papers designed to give you a broad introduction to the concepts, knowledge and skills required in the main areas of study. There are two compulsory subjects:
- one scriptural language (studied from scratch, no prior knowledge is expected) – Hebrew, New Testament Greek, Qur’anic Arabic or Sanskrit
- a paper in biblical studies, either David: Israel’s Greatest Hero? or Jesus and the Origins of the Gospel (you can take the other in place of one of the choices below)

Plus three other papers from a choice of six, currently:
- Christianity and the Transformation of Culture – the study of processes of conversion and Christianization in the late Roman world
- The Question of God – exploring some of the major themes of Christian theology
- Understanding Contemporary Religion – an introduction to the sociological study of religion
- World Religions in Comparative Perspective – looking at the history, beliefs and practices of the main world religions and the problems scholars face when comparing them
- Philosophy of Religion, and Ethics – these two papers introduce key questions in philosophy of religion and ethics, ranging from antiquity to contemporary controversies

Year 2 (Part IIA)
A wide choice of options is available, enabling you to develop a course suited to your own interests (scriptural languages are optional at this stage). You choose four papers out of 17, currently including:
- Introduction to Islam
- Ethics and Faith
- Philosophy of Religion: God, Freedom and the Soul
- The Johannine Tradition
- Life and Thought of Religious Hinduism and of Buddhism
- Christianity in Late Antiquity
- Theology and Literature
- Theology of Natural Sciences: God and Creatures
- Political Theology
- Judaism and Western Philosophy
- Self and Salvation in Indian and Western Thought

You can also choose to take the Part IA Meaning paper from the Philosophy course, which will be taught alongside Philosophy students.

Year 3 (Part IIB)
In your final year, you choose four from a wide range of Special Subjects and interdisciplinary papers (topics may vary), such as:
- Bible, Myth, and History: Theology and Text from Napoleon to World War One
- Truth, God and Metaphysics
- Jews, Christians and Muslims Before and After Muhammad
- Theology and Natural Sciences: God and Creatures
- Political Theology
- Judaism and Western Philosophy
- Self and Salvation in Indian and Western Thought

You can choose to write a dissertation of 10,000 words in your third year instead of one paper. You may also continue with a scriptural language.

Veterinary Medicine

Cambridge offers a world class opportunity to study the scientific basis of veterinary medicine and clinical veterinary science. Our course provides the fundamental building blocks on which to develop and excel in any veterinary field.

Veterinary Medicine at Cambridge
The Department of Veterinary Medicine has an international reputation as a centre of excellence, and is performing world class veterinary research.

A major strength of the Cambridge course is the extensive use of practical teaching and the emphasis on small-group teaching from Year 1. Our staff includes world leaders in their field and our facilities include state-of-the-art equipment, a five-theatre small animal surgical suite, an equine surgical suite, an active ambulatory farm animal unit, a diagnostic unit, a superb post-mortem unit, all available for students during their clinical studies, and a Clinical Skills Centre that’s available to students in all years. We also have one of Europe’s leading cancer therapy units with a linear accelerator for delivering radiotherapy.

Selection
We are looking for committed students who are interested in the scientific principles that underlie both the health and disease of animals. In addition:

- trainee veterinary surgeons must satisfy the Royal College of Veterinary Surgeons’ fitness to practise requirements, both when applying and throughout the course
- offer holders are required to undergo an enhanced Disclosure and Barring Service (DBS) check
- successful applicants are required to complete a confidential occupational health questionnaire

See full details and guidance at: www.undergraduate.study.cam.ac.uk/courses/veterinary-medicine.

If you are an applicant with a disability, including specific learning difficulties or a long-term health condition, you should contact a College Admissions Tutor or the Director of Teaching at the Department of Veterinary Medicine as early as possible to discuss your needs and the course requirements. Such disclosures are considered independently of your academic qualifications and the interview process.

Careers
The Cambridge course equips you with the clinical skills and scientific understanding required to enter practice and other areas of veterinary work.

There are also many opportunities to enter research in universities, Research Council institutes and private companies, and to obtain specialist postgraduate qualifications. In addition, career openings are available with government agencies, animal charities (RSPCA, PDSA etc), pharmaceutical companies, and in academic clinical posts.

The course is great! I’ve really enjoyed learning all the science background, while the third year allows you to focus on something that really interests you.

Josie
Entry requirements for Veterinary Medicine

You may enter up to four veterinary medicine/science courses in your UCAS application. Your remaining choice can be used for an alternative course without prejudice to your commitment to veterinary medicine.

'Science/mathematics subjects' refers to Biology, Chemistry, Physics and Mathematics. It does not include Psychology.

A Levels
- A Levels in Chemistry and at least one of Biology, Physics, Mathematics.
- Most applicants have at least three science/mathematics A Levels and some Colleges require this and/or particular subjects. See College websites for details.

International Baccalaureate
A Level subject requirements also apply to the IB – Higher Level subjects satisfy A Level subject requirements.

Other examination systems
See p151-2 and consult any College Admissions Tutor for further advice.

Admission assessment
All applicants (including applicants to mature Colleges) are required to take a pre-interview written assessment (see p43 and www.cam.ac.uk/assessment).

Work experience
Work experience is not a requirement for applicants but some experience is useful to understand the profession and what is required of its members. We recommend applicants acquire two weeks of work experience, if possible.

Graduate entry
Graduates may apply as an affiliate student (see p37) to one of Lucy Cavendish, St Edmund’s or Wolfson Colleges with:
- a good Honours degree (2.1 or above, science subjects are desirable)
- passes at A Level (or equivalent), as above

Veterinary Medicine (cont.)

Course outline
At Cambridge, you study the basic veterinary sciences first before learning to apply that knowledge to veterinary practice as a clinical student.

During your pre-clinical studies (Years 1-3), you are taught through lectures and practical classes (including 120 hours of dissection across the three years) in the central science departments, and College supervisions – you can typically expect 20-25 timetabled teaching hours each week. The clinical studies teaching is a mixture of lectures (in Years 4 and 5), practicals, tutorials, supervisions and clinical rotations.

In addition, you must complete a minimum of 12 weeks’ work experience (pre-clinical extramural study) during the University vacations in Years 1 and 2 to gain knowledge of animal husbandry. During your clinical studies, you must complete at least 26 weeks of clinical extramural study, some of which may be undertaken abroad.

Your progress is continually reviewed by your supervisors and your Director of Studies. Formal assessment, which determines your progression through the course, takes a variety of forms including written essays, short answer questions and practical examinations.

Years 1, 2 and 3 (pre-clinical studies)

**Years 1 and 2**
In Years 1 and 2, you are taught the core scientific knowledge and skills needed as a veterinary professional.

Taught by some of the world’s top academic scientists and veterinary surgeons, we provide you with the scientific and practical basis that will allow you to develop your veterinary career to the full, whether your aim is to deliver outstanding care or to push forward the boundaries of academic veterinary medicine.

In addition to core science, you follow the Preparing for the Veterinary Profession course (an introduction to the ethical, social and professional responsibilities of the profession) and courses in animal handling and management.

You can read more about Years 1 and 2 online at: [www.biology.cam.ac.uk/undergrads/VetST](http://www.biology.cam.ac.uk/undergrads/VetST).

**Year 3**
- You specialise in one of a wide range of other subjects offered by the University to qualify for the BA degree. Options include:
  - a single Part II Natural Sciences subject (see p104-5)
  - Part II Biological and Biomedical Sciences (see p104)
  - a subject less obviously related to veterinary medicine, such as Anthropology or Management Studies

This feature of the course gives you the opportunity to specialise in an area of interest to you, expanding your knowledge and preparing you for a career after graduation. Following this, you then continue to the three years of clinical studies at the Department of Veterinary Medicine, which is just a short walk or bike ride from the city centre.
Years 4, 5 and 6 (clinical studies)

Year 4

The emphasis of the clinical studies is to give you sufficient clinical knowledge and skills to begin to practise veterinary medicine (‘day one competencies’) and also to provide you with the scientific background you need to benefit from future trends and advances in veterinary medicine.

In Year 4, you study topics including:

- animal breeding, nutrition and welfare
- anatomical and clinical pathology
- microbiology and veterinary parasitology
- clinical pharmacology
- radiography
- anaesthesia
- gastroenterology
- respiratory system diseases
- communication skills
- practical clinical skills

You also learn about veterinary public health, including food hygiene, state veterinary medicine and the medicine of rabbits, rodents, reptiles and birds.

Clinical tuition begins with basic clinical methods and integrated teaching in the husbandry/management and medicine of horses and farm species. Two mornings each week are given over to practical clinical work including basic clinical examination of the main domestic species, radiography and post-mortem investigation. You also develop a range of technical and practice-related skills in the Clinical Skills Centre.

Year 5

You continue the different courses in species medicine started in Year 4, and instruction is given in subjects including:

- cardiology
- neurology
- oncology
- endocrinology
- various surgical topics
- communication skills
- practical clinical skills
- practice management

Five mornings every week are set aside for practical clinical work across various species and clinical disciplines. This includes visits to external establishments such as the RSPCA clinic, and opportunities to further hone your consultation and practical skills in the Clinical Skills Centre.

Year 6

This is a 40-week lecture-free year with tuition centred on clinical teaching, in which groups of just three or four students rotate through different disciplines in the hospital with individual clinicians. The small size of these groups means each student’s caseload is higher and they are given the maximum possible responsibility for the management of clinical cases. This allows you to develop your clinical and problem-solving skills and client communication skills in a real clinical practice environment.

Finally, you have a period of eight weeks’ elective study in which to explore a special interest.

Achievement of the VetMB degree allows you to become a Member of the Royal College of Veterinary Surgeons (MRCVS), which is the professional qualification required to enter practice.
Management Studies

Management Studies is offered as a Part II-only course. Students at any College can apply to transfer to Management Studies after two or three years of studying another subject at Cambridge.

A management environment
No undergraduate business degree by itself can teach someone how to be a competent manager: that comes with experience and then further education. What Management Studies enables you to do is to study the subjects relevant to management and the environment in which the manager operates, whilst still a full-time student.

You develop a sound understanding of the fundamentals of management and various aspects of management practice, as well as gain practical experience in a real-life context.

You acquire the skills that a good manager needs, including the ability to apply critical analysis to management issues and an awareness of the responsibilities of managers in an economic, social and environmental context.

A stimulating environment
The Judge Business School – one of the best in the world – is responsible for Management Studies, and provides library and computing facilities for both carrying out coursework and preparing papers and presentations.

However, amongst the most stimulating resources on the course are your fellow students: they come from different subject areas and have contrasting strengths, enabling you to learn from each other.

Teaching, topics and careers
Teaching involves lectures, supervisions and other active learning methods, such as a negotiations workshop.

The six main areas of a manager’s work make up the core subjects of the course:
- business and management economics
- human resources and organisations
- operations and information systems
- strategy and marketing
- finance and accounting
- management science

The value of our course is evident in the successful careers of our graduates. Since its introduction in 1986, Management Studies students have found little problem in finding the type of employment they seek in industry and commerce. Recent graduates have gone on to careers in consultancy (for private equity and trade), marketing and communications, recruitment (in one case, starting their own consultancy), IT and information systems, and the finance sector (including an investment analyst and a risk analyst).

1 Please note that not all Colleges allow students whose original course is three years to stay on to take Management Studies as a fourth year.
Manufacturing Engineering

Manufacturing Engineering is offered as a Part II-only course. Students at any College can apply to transfer to Manufacturing Engineering after completing Part I of Engineering or Chemical Engineering. Applications from other science courses may be considered.

Engineers and entrepreneurs
Successful, wealth-creating industries are increasingly managed by engineers with an appropriately broad education and training. Manufacturing engineers naturally have particular expertise in the design and operation of manufacturing facilities, but increasingly their role is as leaders of multidisciplinary teams. Manufacturing Engineering gives you a thorough grounding in manufacturing technology and management, together with an understanding of the full range of activities involved from market analysis through product design and production, to sales and distribution, all set firmly within a financial and business context. As well as the engineering and business sides, you also acquire a sound understanding of the human aspects of industry and develop leadership and people skills.

An international emphasis
Towards the end of the course, students are encouraged to organise a voluntary overseas research tour for the whole group to investigate an area of current relevance. Recent projects have looked at how the manufacturing industry is emerging and evolving in countries such as India and China, and the Californian approach to industrial sustainability.

Teaching
Lecture courses (taught papers) provide the academic framework for the subject, and are complemented by project work, industrial visits, a programme of personal and business skills development, as well as projects based at the University and in industry. Successful completion of the programme leads to the award of the BA and MEng degrees.

Careers
Our graduates are much sought after for demanding jobs, in manufacturing but also in other branches of engineering, consultancy and commerce, and indeed a diverse range of other fields. They’re equally well-placed to start their own companies, having gained a comprehensive understanding of how business works and having acquired contacts within a large number of national and international companies.

Colleges

At Cambridge, as well as being a member of the University, you’re also a member of a College (see p3). Once you’ve decided on a course you’d like to study, you need to consider College choice.

What’s a College?

Your College is your base for the time you’re at Cambridge. It’s where you live (see also p24-5), eat, do a lot of socialising, receive academic and pastoral support, and where you often (though not always) have your supervisions (see p13).

In your UCAS application, as well as listing Cambridge (institution code CAM C05) as one of your options in the ‘Choices’ section, you need to enter a College (campus) code.

You can either choose a particular College or, if you don’t have a preference, you can make an ‘open’ application (see p120) and accept the allocation made by a computer program.¹

In both cases, your UCAS application is sent to a College and that College assesses it.

Are some Colleges better for certain subjects?

Regardless of their College, all students on the same course attend the same lectures, seminars and practicals, and sit the same exams (see p3).

¹ You can only submit one application to the University in a year, either choosing a preference College or an open application, and once you’ve submitted your UCAS application this choice can’t be changed.
How do I choose a College?

Everyone’s reasons for choosing their College differ. Some Colleges don’t take students in all subjects (listed in the course and College fact files) so check availability for your course first. Otherwise, you may want to consider the following points (see also p120):

- **Your age** – four Colleges are exclusively for students aged 21 or older (mature students, see p36-7) and their facilities are geared accordingly
- **Your gender** – three Colleges consider applications from female students only
- **Size** – number of students
- **Appearance and type of accommodation** (eg on-site or College-owned houses)
- **Particular facilities** – eg for certain sports, performing arts etc
- **Personal instinct** – it just ‘feels right’

This section introduces each College. Once you’ve read the College profiles you may wish to:

1. shortlist around half a dozen
2. look at their websites to get more detailed information
3. get in touch with College admissions offices if you have any questions
4. visit a few Colleges so you can meet current students and see for yourself what it might be like to live and study there

Accommodation

The 29 undergraduate Colleges provide accommodation for most students for at least three years.

---

1 Accommodation guarantee applies to all single undergraduates without children at all Colleges except St Edmund’s. All single undergraduates without children are usually expected to live in College-owned accommodation where possible.
How NOT to choose a College

- **Applications statistics** – choosing a College that attracts fewer applications or making an open application won’t increase your chance of receiving an offer.

- **Travelling time** – Cambridge is a compact (and fairly flat!) city so wherever you are, it’s easy to travel between your College and your department on foot, by bike or by bus.

- **Age of the College** – your student experience isn’t dependent on the age of a College. They all provide the facilities and support you’d expect and each has its own traditions and history.

- **Specialisms of College Fellows** – the research specialisms of a College’s Fellows won’t dictate what you can study or guarantee you’ll be supervised by them. You’ll attend supervisions at another College if that’s where the relevant supervisor is based.

Further information

www.cam.ac.uk/choosingacollege

What’s an open application?

If you don’t mind which College you attend then you don’t have to choose – you could make an open application instead.

- After the closing date (15 October), a computer program allocates each open applicant to a College.

- The aim of the allocation is to even out the distribution of applicants for each course across the Colleges.

- Once allocated to a College, your application is treated exactly the same as any other application.

- For equally well-qualified applicants, making an open application or indicating a preference College makes no difference to your chance of being made an offer.

If you’re an applicant with unusual qualifications (eg a non-standard choice of A Levels for your subject), a mobility and/or sensory impairment, or have other considerations that require particular guidance/support, then it’s advisable to apply to a specific College having sought advice about your circumstances at an early stage, rather than make an open application.

Before you submit an open application, be sure that you’ll be quite happy whatever the outcome: we can’t change it once it’s done. If you decide to make an open application, you should select ‘9’ as the campus code in your UCAS application.

See p6-11 and the website (www.cam.ac.uk/apply) for information about the application process.
I chose Christ’s because of the size, location and atmosphere. It’s a medium-small College, so I know everyone in my year, in the centre of town, so nothing was ever too far away, and the atmosphere is extremely friendly.

Shadab
Churchill’s motto is ‘Forward’. We look to the future, not the past. Regularly ranked among the top Cambridge colleges in terms of examination results, and with many Nobel Prize winners to our name, we have an exceptional academic reputation. Our community is also renowned for its openness and diversity: people come here from every background, and from all over the UK and the world.

With one of the largest College campuses in Cambridge, we are able to accommodate all of our undergraduates on site throughout their degree. Our student rooms are large, comfortable and warm – more than 40 per cent are en suite, and all have free wi-fi. Rents range to facilitate student choice and are set bearing in mind our key objective of affordability. Provision for students with disabilities is excellent.

Churchill’s student facilities are fantastic. They include a comprehensive 24/7 library, a dining hall, an all-day coffee shop/bar, a 300-seat theatre/cinema, a music recital room, an art studio, on-site sports pitches, courts, and gym, and a boathouse on the river. Churchill is located adjacent to Cambridge city centre and the University’s thriving West Cambridge Site.

Churchill’s founders placed great emphasis on the study of science and technology, but they also recognised the advantages of a diverse academic community. Whilst we retain a focus on science subjects, students in the arts and humanities are as numerous here as they are in many other Cambridge colleges.

When looking at undergraduate admissions we strongly prioritise academic results while actively encouraging applicants from a wide range of backgrounds. If you are among the brightest, hardest-working, and highest-achieving students in your school or college, you are likely to be a serious applicant. We urge you to consider joining us.

From the moment you walk in it feels open and friendly. You just feel really comfortable here. I mean, this is home.

Cat
Clare is a thriving community that is home to students from all backgrounds and from all over the world. Diverse and inclusive, it’s known for its friendly and supportive environment; its bright, engaged students; and its vibrant College life.

Situated in the very heart of Cambridge, the elegant buildings and gardens of Clare extend to both sides of the river, forming part of the famed Cambridge ‘Backs’.

Accommodation is provided for all undergraduates throughout their time at the College. Clare has its own well-stocked library, sportsground, gym and music practice rooms. The University Library is immediately adjacent to the College site, and many faculties and departments are also nearby.

Clare has a large and active teaching Fellowship, providing inspiration and academic guidance for students. The College accepts applications in all subjects and the Fellows have a vast range of teaching and research interests. Staff and students work closely together, and there are student representatives on all major committees.

There is a wide range of College societies, including politics, drama, comedy, and numerous sports clubs. Societies also bring Fellows and students together for lectures and social events. Clare has a very strong musical tradition, with an internationally renowned choir. In addition, the College bar is a favourite venue for live music.

The College has open days in July, and welcomes school visits. Please see the Clare website or contact the Admissions Office for more information.

Clare has given me simply the best university life I could have hoped for, both academically and socially. What a wonderful College to be part of for three years!

Jess
Corpus Christi College

Founded by the townspeople in 1352, Corpus’ central location and beautiful settings are hard to beat. Underpinned by its close-knit and friendly community, Corpus provides a supportive and inclusive environment in which all students can flourish.

The main site of Corpus is situated in the centre of Cambridge; close to lecture halls, libraries and student facilities. At Corpus the ancient and modern sit side by side. Our Old Court is possibly the oldest surviving court in Cambridge, and has housed students for more than 650 years. In the adjacent Kwee Court you find our modern 24-hour student library, which has extensive holdings and excellent study facilities, as well as our contemporary student café/bar. Our stunning dining hall is located in New Court, as is our Parker Library, which contains a famous collection of ancient manuscripts.

As a Corpus undergraduate, you’re guaranteed accommodation for the duration of your course in single-occupancy rooms, in or close to the main College site. Our graduate site at Leckhampton is a 15-minute walk away and is regularly used by our undergraduates. Here you find large playing fields, tennis courts, a gym, pool and extensive gardens.

Our students come from a wide range of social and educational backgrounds and we value each student’s academic potential while providing the resources to flourish in Cambridge – outstanding teaching by our Fellows and academics, fantastic student facilities and first-rate pastoral support. Students combine their academic studies with our lively social and cultural life. We have a flourishing music scene, many subject societies, and a unique stand-alone studio theatre, the Corpus Playroom.

You can find useful information about admissions and facilities on our website. Better yet, visit us on one of our open days to tour the historic buildings and meet our students and Fellows.

Corpus, being one of the smaller Colleges, gives students from many different backgrounds the chance to come together into a very welcoming community. Its strengths include an ideal location, stunning architecture, private sports and leisure facilities, and lots of interesting history.

Rhys
Founded in 1800, Downing is both the newest of the ‘old’ Colleges and the oldest of the ‘new’. We welcome applications from anyone with talent and commitment to join our friendly, academic community.

Home to about 425 undergraduates, 220 graduates and 50 Fellows, all supported by more than 130 staff, Downing is a diverse and welcoming place. Our beautiful Neo-Classical buildings are set in a spacious landscape of lawns, trees and gardens in the heart of Cambridge, close to many University faculties and departments.

Downing accepts students in all subjects, and our highly-respected teaching and research staff are dedicated to helping students realise their full potential. Our Fellows are at the forefront of their academic fields, and their expertise informs their teaching.

Downing is able to house all undergraduate and graduate students on the main College site. This is unusual in Cambridge and helps build the strong sense of community so characteristic of Downing. The accommodation is exceptional, and all rooms are single occupancy with internet connectivity. More than half are en suite and several are adapted for students with physical or sensory impairments.

Our facilities include the well-stocked Maitland Robinson Library, the magnificent Howard Theatre and the purpose-built Heong Gallery. Downing has a strong musical tradition, with a flourishing Chapel choir and frequent concerts and recitals. Our excellent sporting facilities include a gym, tennis and basketball/netball courts, as well as an off-site sports ground and boathouse by the river. Students also enjoy the lively common rooms and student bar.

Downing is an inspiring place to live and study. Visit us on one of our open days to tour the College and meet students and Fellows.

Wide open spaces, beautiful buildings, great accommodation, fantastic facilities, a lively and friendly student body, and a world class education – what more could you ask for?

www.dow.cam.ac.uk
The reputation of Emmanuel as ‘the friendly College’ has grown over the years. This reputation, like the College’s excellent record of academic achievement, is primarily due to our students.

Emmanuel is a community that lives by principles of mutual support and collective responsibility. Part of the reason for our success, besides the more formal collegiate supervision system, is the striking supportive relationship that has grown up between students in different years of their courses and which persists as one group graduates and another group of freshers arrives.

The result of this is that Emmanuel’s students continue to excel in their exams, their sport and their music, while still finding time to enjoy an active and inclusive social life. The College provides the framework – excellent facilities for sport, computing and music; terrific teachers; a recently rebuilt library and one of the best reading rooms in Cambridge; a student-run bar and so on – but the students do the rest.

Emmanuel is first and foremost an intellectual community in which individuals can develop to their full potential. It’s also aesthetically pleasing: the spaciousness and quiet architectural beauty of the grounds and buildings, in the very centre of Cambridge, surprise everyone who enters. The Head Gardener believes that gardens are to be used, so the two ponds, with their ducks and moorhens, the tennis courts in summer, the swimming pool and the large grass area known as the Paddock, are there for all members of the College to enjoy. However, the grass in Front Court is sacrosanct: only ducks and Dons, and snowmen that appear mysteriously in the middle of the night, are allowed on it.

The inclusive environment of Emma is one of the most important aspects of the College – you feel accepted and ‘at home’ whatever your background or beliefs.

Nicola
Fitzwilliam College

Fitzwilliam College combines the best of Cambridge tradition with a friendly, forward-thinking approach. Our active and diverse student community lives surrounded by some of the most beautiful gardens in Cambridge.

Fitzwilliam was founded in 1869 to broaden access to the University, and we’re proud of our history. We admit students from all backgrounds strictly on the basis of ability and promise. Our intellectually stimulating environment, together with strong pastoral and academic support, enables our students to reach their full potential.

Our location – between the main arts and science sites – is ideal for taking advantage of everything Cambridge has to offer. The setting, around the extensive gardens of a Georgian estate, combines ‘the best of the old and the new’. The Regency house at the heart of the College was once home to Darwin’s widow. More recent buildings include our auditorium (a venue for plays, concerts, debates and lectures) and new, superbly equipped 24/7 library. Students live in rooms in College (many en suite) or in College houses very nearby for all three (or four) years. Our beautiful gardens are there for all – everyone can walk on our grass!

Fitzwilliam has a strong reputation for music, thriving drama and sport, and a varied range of other College societies. There are music practice rooms, allotments, an art studio, the radio studio of CamFM, a new gym and squash courts on site and playing fields nearby. Students participate fully in our key College committees. Our lovely café/bar symbolises the open and welcoming nature of the College: it’s an informal space where students, staff and teaching Fellows meet over coffee and homemade cake.

Come and see for yourself! Explore Fitzwilliam with our students at an open day, or email: admissions@fitz.cam.ac.uk with questions or to book a visit.

Fitz dispels every myth you’ve heard about Cambridge. It’s a down-to-earth and welcoming College, full of friendly faces. What makes Fitz special is our sense of community; students have so many opportunities to get involved in College life.

Sophie
Girton College

Set in beautiful grounds of more than 50 acres just outside the city centre, Girton College’s setting matches its open and informal atmosphere.

Founded on values of equality and diversity, Girton offers every student superb facilities in which to live and learn. Although we are one of the larger Cambridge Colleges, we offer a friendly community where no-one is anonymous. Whatever your subject, you receive top-class tuition, excellent support and an opportunity to exceed your expectations.

There is a wide range of student-run clubs and societies – subject, sporting and social – and some of the best facilities for music in the University.

The College guarantees its students accommodation for all years of their undergraduate degree. The majority of our undergraduates, including all first years, are housed on the historic main College site in a variety of accommodation – ranging from Victorian rooms in the original building, to modern en suite rooms in Ash Court. An option from the second year is an en suite room in the newly built Swirles Court (located between the College and city centre).

At Girton, you can experience all that’s great about being at Cambridge. The College has excellent on-site sporting and leisure facilities, including football, rugby and cricket pitches; squash and basketball courts; a new gym and, uniquely, an indoor heated swimming pool. We have a state-of-the-art library, well-equipped computer rooms, and internet connections across all accommodation. We offer students plenty of flexibility for meals: you can use our very popular self-service cafeteria or, if you want to cook for yourself, every corridor has a communal kitchen.

We maintain roughly equal numbers of men and women amongst our Fellowship and student body, and the relationship between Fellows, students and staff is friendly, lively and supportive.

Were I to choose again, I wouldn’t apply anywhere else. There’s a togetherness like at no other College. Always a friendly face and staff are approachable. One of the unrecognised gems of Cambridge Colleges.

Andrew

Caius is a large, friendly College based around three beautiful courts in the very centre of Cambridge. Founded in 1348, the College is known for its diverse student body, its academic ambition, and its strong sense of community.

Applicants are considered individually and selected solely on academic merit, regardless of school, social or national background. The life of the College is enriched by the diversity which characterises our student body. To help everyone settle in, we operate a full freshers’ programme, and a ‘parenting scheme’ to welcome new students into the College community.

Caius has more than 100 Fellows. The range of teaching and research interests within the College is huge; all undergraduate courses are offered and supported at the highest level and students form close working relationships with academics. Many subjects have their own societies within the College, bringing together students and Fellows for social events, discussions and lectures.

Exceptional accommodation is provided for all students throughout their time at Cambridge. We encourage students to eat together in the College Hall, but all accommodation is equipped with cooking facilities. Every first year has a modern en suite study bedroom. Students in other years ballot for rooms in the medieval Old Courts, or in city-centre College-owned houses.

We have a superb library, containing more than 100,000 books and journals. We also offer excellent music, art and sporting facilities, including our own large, central sports ground and two gyms. In addition, the College supports a wide range of very successful clubs and societies – if you want to do it, you can do it at Caius. Visit us, and see for yourself.

Maybe what’s most impressive about Caius is the general atmosphere of inclusion, development and achievement.

Jack
Homerton is the newest College, one of the largest and most diverse. We have 250 years of history behind us, but our approach to learning is fresh and purposeful, committed to supporting students in today’s world.

For example, we have established an optional programme, Homerton Changemakers, to work alongside academic study and equip our students to be effective agents of positive change. Each new generation of students helps build our community, enhancing what’s already one of the most vibrant, open and inclusive places for living and learning in the University.

Homerton is on the south side of Cambridge, with an orchard, lawns and generous green spaces to walk in. Our buildings mix old and new, with a fine Victorian building and a superb new dining hall at the College’s heart. Living in College is overwhelmingly popular and all undergraduates can be accommodated on site throughout their studies. Most of our study bedrooms have en suite bathrooms, and all have wi-fi. As well as comfortable bedrooms we have a large, modern and well-stocked library, an excellent gym, a theatre, music rooms, fitness studio and exceptional sports facilities close to the College. Our students take full advantage of these to work hard and play hard.

Homerton has always been a welcoming place; somewhere to become who you want to be, whatever your interests and wherever you come from. Our students participate fully in the life of the College, taking part in our decision-making through the Students’ Union and enriching the local and wider society with their multitude of interests, skills and enthusiasms. We’re an evolving community, committed to remaining a place where doors are open, where nobody’s too grand to talk to you, and where each student can develop their full potential in supportive and beautiful surroundings.

It’s just the most buzzing, lively, friendly atmosphere – and I love being a part of it!

Sandy
Hughes Hall is a different type of Cambridge College. We are a friendly and supportive academic community, with around 100 mature or affiliated undergraduates and up to 600 postgraduates. Two-thirds of these students come from outside the UK. We understand the challenges that face mature and affiliated undergraduates, including international students, at the University of Cambridge, and have a pastoral and tutorial team experienced in providing appropriate support and advice.

College Fellows represent the breadth of Cambridge disciplines, as well as incorporating distinguished individuals from business, law, education and policymaking. Across the globe, Hughes Hall alumni include leading business people, engineers and scientists, government ministers, senior members of the legal profession, and a gold medal Olympian. Together, these Fellows and Alumni provide a College network of scholars and professionals that supports our current students.

Cambridge has much to offer in the form of both College and University level societies and sports. Hughes Hall students are strongly involved: they regularly represent Cambridge on University teams, and contribute to a diverse community where all can flourish.

Hughes Hall has many excellent quality public spaces and student rooms, from the grand Victorian main building, to modern accommodation and nearby shared houses. All room rents are set bearing in mind affordability, and as an undergraduate you are guaranteed a room for every year of your course.

The College is situated beside the lively, cosmopolitan area of Mill Road. It is within a 10-minute bike ride of most faculties, yet surrounded by the peaceful green spaces of the University cricket ground and Parker’s Piece. It is also close to the train and bus stations.

I love the diversity of the student body at Hughes Hall. With one of the most international intakes at Cambridge, you are always around friendly people with really interesting backgrounds and experiences.

Sophie
Our students say the best things about Jesus College are the mix of people and relaxed atmosphere, the great accommodation, and the location in the heart of Cambridge.

The best things about Jesus students are their diversity, their strong sense of community and their capacity for hard work.

We admit undergraduates across all subjects studied at the University, with roughly equal numbers in arts and sciences. We welcome applicants from all types of school and background – everyone is considered for admission as an individual on their own academic merit.

All our undergraduates are offered accommodation either in the main College buildings or in College-owned houses just across the road, so all Jesus students live only a stone’s throw from the Porters’ Lodge. The mix of rooms enables individual needs and preferences to be catered for. The College grounds are spacious and tranquil, away from the main tourist routes but only five minutes’ walk from the city centre.

Our students are encouraged to excel in all walks of life, and this leads to a good mix of academic excellence with music, sports and the arts. We’re particularly proud of our award-winning library which provides a superb working environment, our commitment to music of all sorts (ranging from two Chapel choirs to dedicated spaces for practice and performance), and our strong support for the visual arts, including our annual student-run arts festival. There are plenty of opportunities to relax and unwind too, with newly refurbished facilities including a brand new bar, café and common room. Unusually for a Cambridge College, our playing fields are on the main site.

You’re very welcome to come and see the College for yourself – attend an open day or contact us to arrange an informal visit.

*My favourite thing about Jesus College is the supportive atmosphere among students, teachers, and staff. Everyone makes time to have fun and support one another, while also working hard.*

*Amy*
King’s College

King’s has a long history of intellectual, artistic and social innovation. We were among the first of the historically male Colleges to admit women, and we have played a leading role in attracting ethnic minorities and state-educated students to Cambridge. King’s is a vibrant, diverse and tolerant community which actively encourages applications from continental Europe and overseas.

The College has a high ratio of teaching Fellows to undergraduates, and relations between members of the College are traditionally informal. Our academic standards are high and we take intellectual life seriously. King’s makes every effort to support students in their academic work and University lives, providing an excellent library, welcoming work spaces, and a committed tutorial team.

King’s stands in the centre of Cambridge, with its splendid grounds and buildings stretching to the River Cam and beyond. There’s a wide choice of accommodation. Meals are offered in the grand College Hall but you can always eat in the adjoining bar if you prefer something less formal. The bar – used for meetings, musical performances and open mic nights – is the heart of the College social life and the adjoining coffee shop provides a convenient study space. We offer sports facilities, punts and kayaks, music practice rooms, a dark room, clubs and societies, student-run club nights and an Art Centre running classes for all members. Our students are represented on College committees and fully engaged in the College’s rich intellectual and social life.

King’s is renowned for its music and Chapel. In addition to our celebrated male-voice choir, there’s King’s Voices (a mixed choir), a student orchestra and musical society, and countless other groups for different tastes and styles. At King’s, it’s your academic promise that matters most – students from any background can fulfil their personal and intellectual potential and we welcome applicants from any type of school or region of the world.

What struck me when I arrived was how very normal everyone is. But at King’s there’s also a sense that being ‘different’ (be it in terms of interests, race, sexuality or politics) is something to be respected.

Rachel
Lucy Cavendish College

When Lucy Cavendish was founded in 1965, newspapers called it ‘the College without towers, turrets or gatehouse’. We’re still as informal and as open-minded today.

Lucy Cavendish is one of the smaller Cambridge Colleges, and one of the most diverse: our 410 students come from more than 60 countries, and include many affiliate students alongside first-time undergraduates with a wide range of interests, experience and qualifications.

The College lies close to the city centre, in tranquil grounds featuring a wildflower meadow, pond and music pavilion as well as our cluster of Victorian and 1990s buildings. The library is unusually spacious, with a collection designed to encourage reading for pleasure, not just academic study. Students enjoy a well-equipped gym, and interconnecting common room, bar, games room and conservatory. The sunny dining hall opens onto an al fresco eating area and our chefs pride themselves on using seasonal, local produce.

On-site accommodation is offered to all single undergraduates; most rooms are en suite, with a smaller number of twin ‘sets’ sharing a bathroom and kitchenette. Our new Histon Road complex includes one- and two-bedroom flats, increasing the options available to couples and families.

Staff and students enjoy informal, close-knit, non-hierarchical relations; social events involve the whole College. Annual traditions include a garden party, a Christmas carol concert and formal halls to celebrate special events and achievements.

We are known for preparing women for the professions and have good links with industry, and Lucy Cavendish students also excel across the arts and sciences. The College has a growing profile in sport, and values creativity as a complement to scholarship: we run an annual fiction prize, and recent students have included novelists, filmmakers and theatre directors.

I knew I wanted to apply to a mature College. I wanted to be with people who were slightly older and this was all-female as well which is interesting. I came here for the Open Day and really liked it.

Isabelle
Magdalene College

Magdalene College has the advantage of an attractive and convenient location on the banks of the River Cam, less than five minutes’ walk from the city centre.

With buildings that are both beautiful and welcoming, libraries providing everything from first-year textbooks to medieval manuscripts, committed teaching staff and a vibrant community, Magdalene College is a perfect environment in which to live and study.

Magdalene typically admits around 105 undergraduates a year and encourages applicants from all educational and social backgrounds. Every applicant is assessed on their own merits and we take into account both potential and track record. At Magdalene, we want our students to fulfil every gramme of their potential and our Directors of Studies are on hand to help you achieve at the highest possible level.

If you come to study here, you receive a warm welcome as soon as you arrive in Magdalene: there are plenty of activities in the first week and beyond to help you settle in, meet new people and feel at home.

We’re able to accommodate all our students, and a good choice and mix of housing is available; from the formality of First Court, through to the Magdalene village (ranging from medieval study bedrooms to modern sets) and Cripps Court, with its handsome garden and en suite rooms.

College tradition is maintained with candlelit dinners in Hall, though many students also use the informal cafeteria and cooking facilities in the numerous staircase kitchens.

Why not take a look at our website and download the Magdalene prospectus?

All the students appreciate Magdalene’s close-knit, diverse and friendly community. The College has the work-life balance spot-on and offers me everything I want both academically and recreationally. Formal hall seven days a week is also a definite positive.

Murray Edwards College provides academic excellence within a warm and welcoming community. At its heart lies a proactive commitment to improving the opportunities open to women within education and their professional lives.

As a woman at Murray Edwards, you get the best of both worlds – working in a world class co-educational university and in a College with a special focus on women’s learning.

Through our unique Gateway Programme we help you transition to studying in Cambridge, and help build the confidence and skills necessary to succeed. We then support you into the world of work through networking with our diverse body of former students who want to help women get ahead in the workplace.

We have a strong fellowship of both women and men who are dedicated to teaching women and both encourage and challenge you. They provide new ways of thinking about and speaking with the world and allow you to develop those areas of your subject that most interest you as well as helping you to achieve highly. We aid you to drive change in Cambridge and beyond, and we encourage our students to engage fully in all aspects of Cambridge life. Cambridge comes to Murray Edwards too through the events run by the College and by our students.

Our buildings and grounds are light and airy, inspiring not intimidating, and we are able to house all undergraduates on site or very close by, with many en suite rooms, which helps to strengthen the powerful sense of community and which you sense the moment you step inside. Our food, served in the iconic dome, is reckoned among the best in Cambridge and you quickly come to feel that ‘Dome is Home’.

Murray Edwards welcomed me with open arms and has continued to help me every step of the way; from offering Gateway sessions to helping me fund a trip to Italy. Murray Edwards has given me so many opportunities to thrive in my subject.

Hannah
Newnham College

150 years ago, a group of radicals – philosophers, campaigners, scientists, writers – came together to create a Cambridge College unlike any other. They dreamt of a College that would be friendly and challenging, with huge gardens open to everyone, and where Fellows and students would talk on equal terms. Newnham today makes that real.

Our founders wanted a College that would be beautiful and sociable, with warm brick buildings looking out to stunning gardens where students picnic, work and relax. From historic rooms with balconies to stylish modern en-suite rooms, all Newnham undergraduates live on site and are always close to their friends.

Newnham is a College for women, led by women. It’s a place where you’ll see women hold the most senior roles; where you’ll have the support to live life to your full potential. Your teaching and social life will be with women and men from across the University, and you’ll come home to a College that supports women 100 per cent.

Our gorgeous library, one of the best in Cambridge, was first built in 1897, when early women students couldn’t use the University libraries. Old Labs, the original women’s laboratories, are now a performance space.

Our spacious central site is right next to the Sidgwick Site, with the science and engineering departments 5 minutes’ cycle away. Our sports fields, tennis and netball courts are all on site; so is our roof-top glass-walled gym, looking out over the Cambridge skyline.

Students enjoy choosing between well-equipped kitchens to cook with friends, the Buttery for relaxed meals, or dining in style in Hall. And there’s always coffee and cake at our chilled café-bar.

If you want to dream big, and receive practical support for your dreams, join us.

I love Newnham because it makes me feel endlessly capable of trying new things, learning and working, as well as having fun!

Pembroke College

At the heart of Cambridge, Pembroke is a stone’s throw from many departments and everything that the city has to offer. Here you’ll find a warm and diverse community, with a friendly atmosphere that comes from those who work, study and teach here. We welcome students from all backgrounds, and particularly encourage those from backgrounds or schools who might not usually consider Cambridge to think about applying to us.

Pembroke is an oasis, with spacious gardens and a large site. Our students live on the main site or in nearby College-owned houses throughout their undergraduate studies, and accommodation ranges from the old to the new. Our food is renowned for its quality, with lots of choice and flexibility. Students can also catch up with friends or work at Café Pembroke, which serves hot and cold food and drinks throughout the day.

We have a library, computer room, bar, gym, music practice rooms and more on site, and sports fields a short cycle ride away. There are numerous opportunities for students to explore their wider interests, however seriously (or otherwise!) they want to take them. Pembroke students flourish, and we do everything we can to offer the support they deserve.

Members of Pembroke are united by a deep interest in their subject, their intellectual curiosity and their commitment to fulfilling their academic potential. This contributes to the College’s reputation for academic excellence. We also respect one another’s right to be different - our College is inclusive and friendly. All of our academic staff are dedicated to supporting and inspiring students to develop their existing talents so that they achieve highly in readiness for their careers and lives beyond university.

In assessing applications, we place a great deal of emphasis on academic achievement, and we encourage the brightest and most interested students, whatever your background, to consider us.

I couldn’t wish for a better second home. Everyone here looks after you and your wellbeing, not just your academic standards. It feels great to know that there’s always someone around to help me out!

Jay
Peterhouse

Just five minutes’ walk from the city centre, Peterhouse is an exciting and friendly place to live. It’s perfectly situated for student life – close to the arts, engineering and science faculties, but just off the tourist trail.

Peterhouse’s small size promotes plenty of individual attention for students. The College is a supportive community where students quickly make friends and feel at home. Both lively and inclusive, Peterhouse welcomes students with wide-ranging backgrounds, interests and opinions. The only things all our students have in common are high academic ability, dedication to their subject and a willingness to work hard.

We provide a range of excellent accommodation (including en suite rooms) in central Cambridge (on or adjacent to the main site) for all undergraduates for the duration of their course. We offer great food eaten in the oldest Hall in Cambridge, and there’s the option of a candlelit dinner every night during term. Peterhouse has excellent facilities for study, sport, music and social events. These include a spacious and well-stocked library, as well as a theatre, music practice rooms, bar, computer room, gym, boathouse and sports grounds. The beautiful and tranquil Deer Park provides a large space for students to relax and meet friends while enjoying a pause in their busy schedules.

We always look to admit those with the potential to flourish in our nurturing environment and are committed to offering places to the most able, regardless of school or background.

To find out more about Peterhouse, why not come to an open day and meet our students and staff? If you’re unable to attend one of these, individual visits can usually be arranged with the Admissions Team, who are always happy to advise you and answer any questions you may have.

The size of the College makes it easy to know everyone and is less overwhelming! The Deer Park is also a bonus, it’s a beautiful place to be able to run through to get your dinner.

Queens’ College

Queens’ is a large, centrally located College. It is characterised by openness and informality, making it modern, welcoming and comfortable.

We want our students to pursue their academic interests and achieve their full potential. Queens’ has been in the heart of Cambridge for more than five centuries, and today it supports a thriving academic community of undergraduates, graduates and academics.

Queens’ undergraduates are guaranteed accommodation for three years. We offer a full catering service but each landing has a kitchenette for those who want to self-cater. All rooms enjoy internet access and wi-fi is available throughout the site. Queens’ provides superb facilities for the arts. There are also squash courts, a gym and punt hire within College, and the sports ground and boathouse are nearby.

The sole condition for admission to Queens’ is academic potential. We welcome applicants from schools with no prior history of application to Cambridge. We will work hard to ensure that no applicant is prevented from studying here because of a disability, or social or financial disadvantage. We take particular care in selecting students. Applicants are interviewed sympathetically by experienced Fellows who want you to show us your strengths.

Achieving a place at Queens’ brings responsibilities. There is a firm expectation at Queens’ that every student will work hard to fulfil their academic potential and maintain our reputation for academic excellence. We have a detailed programme of support to help first-year students make the transition from school to university.

You are welcome to contact the Admissions Office directly, to look on the web or attend an open day to find out more.

Queens’ is one of the friendliest Colleges, situated in a cracking central location. Despite being a fairly big College, you won’t struggle to meet everyone as we live on the main site for all three years.

Charlie
Robinson College

Founded in 1977, Robinson is one of the most modern and ambitious Cambridge Colleges. Famed for its strong sense of community and relaxed atmosphere, there’s nowhere better to pursue your studies and interests.

Robinson is perfectly located for life in Cambridge – directly opposite the University Library and extremely close to the arts and sciences departments. A short walk or bike ride takes you directly into the city centre. The magnificent College gardens are much loved by students and academics alike.

At Robinson, the student body is truly diverse, coming from all backgrounds and from all over the world. They have the very best academic and pastoral support, allowing them to achieve at the highest levels.

There are students on most Cambridge courses, and a community of scholars with varied academic interests who are keen to help students with their work.

Robinson accommodation is outstanding and all undergraduates live within the College grounds throughout their original course. Around half is en suite and the remaining generally has one or two bathrooms between two or three individuals (no bedrooms are shared). Facilities are exceptional: no matter what your interests, there are opportunities to pursue them here. Our library is accessible 24 hours and boasts a comprehensive collection of books. Robinson also has some of the best College food in Cambridge, whether in the cafeteria-style Garden Restaurant or the optional twice-weekly formal dinners in the Hall.

A copy of the College prospectus and a video about College life can be found on our website. Our open events in March, April, July and September are good times to visit, but we also welcome individuals or school groups throughout the year. If you have any questions or wish to arrange a visit, please contact Francesca Amabile in the College Admissions Office.

All Robinson undergrads live in College and the houses on the main site, which is great as it means we’re often friends with people in different year groups.

Anna
St Catharine’s is a welcoming, medium-size College for men and women, situated right in the centre of town. A lively and diverse community, we have earned a reputation for friendliness and academic success.

Founded in 1473, St Catharine’s is an extremely supportive College, with a strong community spirit between students and staff. We’ve gathered a dedicated and approachable team of teaching staff committed to helping our students realise their academic potential, and excellent pastoral support staff.

Our admissions decisions are based solely on applicants’ academic ability – proven and potential – and we strongly encourage applications from the widest possible range of students, regardless of educational background. We interview most applicants, and do everything we can to make the admissions process as positive as possible.

All students are accommodated throughout their three- or four-year undergraduate course – first- and final-year students live on the main site and those in their middle years live in attractive flats on Grange Road, close to the heart of the University.

The College offers excellent facilities for study and recreation. Our two libraries are among the best in Cambridge, there are well-maintained computing facilities, and all student rooms have high-speed internet access. The College has a small auditorium as well as a larger venue and a new student bar. Our sports facilities include extensive playing fields; squash, badminton and tennis courts; a gym; an all-weather AstroTurf hockey pitch; and an extensively refurbished boathouse. Our active choir records and tours regularly. We were also proud to be the first College to be awarded Fairtrade status.

Our Admissions Office is happy to receive enquiries from and arrange visits to St Catharine’s for any prospective applicants. Further detailed and up-to-date information can be found on our website.

My time at Catz has left me with a wide circle of close friends in many different walks of life, and even after graduating College still feels as familiar and welcoming whenever I return.

James
St Edmund’s has an international and multidisciplinary flavour. Half of our student body are from overseas, with almost 80 countries represented.

Most of our students are postgraduates, but St Edmund’s student community also includes 111 mature undergraduates (aged 21 or over), including affiliate students (who already have a degree from another university). Many students are studying for a degree after a break from full-time education.

The College sits in six acres of parkland and is conveniently placed for the arts faculties, the West Cambridge Site, the Veterinary School, the University Library and the city centre. The College buildings currently house 218 single student rooms (some en suite). A new block of en suite accommodation, Mount Pleasant House, is set to open in 2019. All rooms are centrally heated and connected to the internet, and some are suitable for students with physical disabilities. Our library building includes a large reception/lecture room, teaching rooms, a gym and a music practice room.

Scholars and Fellows of St Edmund’s form a single community with the student body led by a lively executive committee that runs the Combination Room with its bar, pool table and a host of social events. The College kitchen offers up to three meals a day as well as formal meals at least once a week during term time.

The numerous College clubs and societies include the choir and those for Law, sports and music. Many College members participate in their field at University and national level.

The Chapel reflects the Catholic heritage of the College and is open to other Christian bodies. It’s also open to all members of the College as a place of quiet prayer and contemplation. The Von Hügel Institute for Critical Catholic Inquiry also enriches the life of the College.

St Edmund’s offers a supportive environment where Fellows, staff and students work together to make it an enjoyable place to study and socialise. The collective community spirit makes for a welcoming and enriching environment.

Stephen
St John’s College

With its lively mix of undergraduates and guaranteed on-site accommodation throughout your course, St John’s puts students at the heart of a friendly, diverse community in one of Cambridge’s most spectacular settings.

The atmosphere at St John’s is energetic, challenging, inspiring. We’re committed to providing a world class education in an exciting multicultural environment where you can thrive and exceed your own expectations. Whatever your subject, there’s someone here in your discipline to support you.

Our central riverside grounds provide easy access to University facilities and have a strong sense of community – all students can find like-minded people and make lifelong friends. The College also has more than 40 student-run societies and sports teams, so there’s always plenty to do.

One of the most important experiences we offer is the chance to be part of a group that achieves distinction at the highest level. Whether at a concert, in the library, or in conversation over dinner, you’re immersed in a world where the exchange of ideas is enthusiastic, unpretentious and motivating.

‘The people and environment are what makes John’s so special – it’s a big College, but it has a really friendly community.’ Julie

‘Many people where I come from thought Cambridge was far away and socially exclusive. The reality in St John’s is that people from all sorts of backgrounds come here to live and study.’ Tom

‘I applied to St John’s because it’s such a vibrant, diverse place. Now I get to study with people from all over the world.’ Katie

One of the best ways to experience what the College has to offer is to come and see for yourself. Dr Helen Watson, the Admissions Tutor, and the Admissions and Access Team are happy to offer advice or arrange visits for individuals and schools.

Coming here has been a fantastic journey and I’m grateful for all the opportunities that the College has given me as a student. It’s inspired me to encourage teenagers from all sorts of backgrounds to follow their dreams and consider applying.

Michael
Selwyn College

Selwyn College is home to a supportive and exciting community and provides an environment in which students can excel, achieve their potential and enjoy student life to the full. Studying at Selwyn is fascinating and fulfilling.

Selwyn is a medium-size College located a short walk from the city centre. Our spacious site is set in beautiful gardens that create a calm and relaxing environment. We guarantee undergraduates accommodation for the three or four years of their course (70 per cent of rooms are en suite). All are housed on a single site, enabling our students to enjoy learning while sharing in the richness of a full and varied communal life.

The College has produced leaders in many fields and is at the heart of Cambridge’s academic facilities. The University Library and Sidgwick Site, home to many arts and humanities faculties, are adjacent to our gardens; and we’re located between the central and West Cambridge sites where most science departments are found.

We welcome applicants from all social and educational backgrounds and are committed to fairness in all our processes. Academic excellence, strong subject commitment and the potential to do well on the intended course are the criteria for admission.

If you relish the prospect of studying in an intellectually challenging environment, and are willing to put in the time and effort needed to be successful in your studies, we believe you’ll feel at home at Selwyn.

To find out more please see our website or contact us. You can also visit us on an open day, on a school visit, or by making an individual appointment.

My time at Selwyn has been not only academically stimulating but immensely enjoyable. From great facilities to supportive supervisors, I couldn’t have asked for a better place to make the most of university and prepare me for the future.

Sidney Sussex College

Sidney is relatively compact in size, but its sense of community is second to none. We are proud of the atmosphere of inclusion and encouragement we foster: we want our students to excel academically, and to be happy while doing so.

Sidney provides superb facilities for study and for pastoral support. Our library is accessible 24 hours a day, and our library team is helpful and ever enthusiastic. Sidney has a dedicated pastoral team, which includes a nurse, a study skills co-ordinator, and a student welfare specialist. A recent highlight was our award-winning chef sharing his chocolatiering skills with undergraduates looking for a break from revision.

Our Fellows engage with undergraduates not only by teaching but also in nurturing a fruitful intellectual life. The Sidney Greats lecture series is open to everyone who works or studies here, and presents big ideas in an accessible and engaging way. Recent talks have ranged from ‘Silent Aircraft’ to ‘The Horse in Human History’ to ‘Beethoven’s Fifth Symphony’. There is always an opportunity to carry on these conversations together afterwards.

Meals are available in our beautiful dining hall, and from 2020, from a new cafeteria facility too. Undergraduates have access to kitchen facilities in their accommodation. We have a wide range of student rooms guaranteed during your undergraduate degree, from sharing a College-owned house with friends, to study-and-bedroom set combinations in the older parts of Sidney. First year students are randomly allocated a room, so they can get to know other students easily.

The Sidney Students’ Union also work hard to make sure students feel at home. They organise a lively and varied set of activities for freshers, and there is plenty going on throughout the year, from open mic nights, to welfare bouncy castles, to student societies that cater for all interests.

The best thing about Sidney is the community. I’ve spent four years surrounded by the most weird and wonderful people.
All the people I’ve lived with have shaped me and I have so many happy memories I’m never going to forget.

Tom
Trinity provides a large and diverse community in which to live, work and play. We offer high-quality accommodation, a central location on the river, excellent meals in Hall and extensive sports facilities.

Trinity has a long tradition of academic excellence. We welcome all those who have the ability and determination to succeed, whatever their background. Tutors, Directors of Studies and supervisors work closely with our students to engage them in the wide range of educational and research opportunities that the College and the University opens up to them.

The setting of the College serves to inspire. There is some magnificent architecture at the heart of Trinity – Great Court, the Chapel, the Hall, Nevile’s Court, the Wren Library – but there are also fine modern buildings, including an attractive development at Burrell’s Field, a short walk away through the beautiful College gardens.

There is a lively Students’ Union that organises a wide variety of social events, and a popular student centre with common rooms and a bar. Undergraduates can live in College throughout the full length of their course, and all rooms have internet connections.

We are actively committed to widening participation. We host residential and other visits to the College, and work closely with educational charities to encourage applications from all schools, further education colleges and sixth forms, including those with little or no experience of Cambridge.

You can learn more about Trinity by booking a place on an open day, or just by visiting the College informally to have a look round. Our website contains comprehensive information and the Admissions Office is happy to deal with further enquiries.

Trinity College

The best thing about Trinity is the amazing opportunities available to all students. There’s a huge range of College societies and you’ll find friends with similar interests, whether it’s sports, music, art, politics or anything else.

Ellie
The first thing visitors notice about Trinity Hall is its vibrant and informal community atmosphere.

Take a walk from one end of Trinity Hall to the other and you’re bound to meet a friendly face along the way, whether it’s a smiling Porter at the front desk, a group of students sitting on the lawn, or a Fellow on their way to give a lecture.

Trinity Hall is ideally situated for student life in Cambridge, located within easy walking distance of lecture halls, labs, libraries, clubs, pubs and shops. The College library and picturesque gardens back onto the river, making a relaxed environment in which to work and unwind. The Aula Bar and Coffee Shop provides a cozy setting in which to grab a drink, catch up with friends and play a game of pool in the common room next door.

Accommodation is available for all undergraduates for the duration of their course. Across Trinity Hall’s three sites, accommodation ranges from atmospheric buildings steeped in history to newly built housing with en suite facilities.

As well as maintaining a tradition of academic excellence, our students make significant contributions to College and university life through numerous clubs, societies and sports. Trinity Hall students have the use of a free gym, squash courts, tennis courts, playing fields, a boathouse and a music room with a grand piano, electric keyboards, amps and drum kit.

More than just a collection of beautiful buildings, Trinity Hall is a dynamic community of people from all over the world. We encourage applications from all school types, including those with little or no tradition of applying to Cambridge.

To find out more about Trinity Hall, please visit our website or attend one of our open days. Our Admissions Team are always happy to answer any queries you might have.
Wolfson is one of the most cosmopolitan Colleges in Cambridge, with typically 600 mature undergraduate and graduate full-time student members.

We take mature undergraduates as well as affiliate students with a previous Honours degree. Most undergraduates are in their early 20s but we warmly welcome applicants of all ages (21 or older). Wolfson is one of four Colleges that admit students for the Graduate Course in Medicine.

The College has a lively, friendly atmosphere and a uniquely egalitarian character. All of our students bring a richness of experience that benefits their academic work and the spirit of internationalism is fostered by students from more than 70 countries. All subjects are represented among Fellows and the breadth of membership is further extended by distinguished academic visitors who come to Wolfson for periods of research.

The relationship between senior and junior members is informal, with common rooms and social facilities open equally to both. We offer a gym and various sports clubs and societies, including Zumba, football, rowing, yoga and salsa dancing. The humanities and science societies host a series of termly lectures, and a lunchtime seminar attracts speakers from across disciplines. Partners of students actively participate in College life.

Wolfson accommodates all students who wish to live in College and the main College buildings orbit attractive garden courts. All rooms have central heating and are wi-fi enabled, with access to well-equipped kitchens for self-catering. Most are single study bedrooms, with a mixture of shared facilities and en suite. There’s also some accommodation for couples and families. Our spacious library is open 24 hours a day.

The College is close to the University Library, and most faculties and the city centre are a few minutes away by bicycle.

The unique thing about Wolfson is not only that you work with people from different academic backgrounds and levels, but also people from all over the world.

James
Entrance Requirements

If we offer a course you want to study and you decide to apply, then your overall chance of being made an offer of a place at Cambridge is approximately one in five.¹

The following pages give more details on course requirements and typical offers. Additional guidance is available on p8-11, including information used to assess applications and general information about what Admissions Tutors look for in applicants.

Please see the Undergraduate Study and College websites for full conditions of entry (www.undergraduate.study.cam.ac.uk/applying/decisions).

¹ Of the 18,377 applications made for entry in October 2018 (or deferred entry in October 2019), 3,465 students were accepted.
Typical offers and requirements

Whatever system you’re being educated in, we require top grades in the highest level qualifications available for school/college students – most successful applicants ultimately exceed the conditions of their offer.

One of the strengths of the Cambridge admissions system is its ability to assess all applications individually, and all Colleges may modify offers to take account of individual circumstances. This means that some applicants may be set less or more challenging offers than those listed below and in the course entries, and some offers may specify grades to be achieved in particular subjects.

Transcripts

If you haven’t taken six or more GCSEs/IGCSEs or five or more Scottish National qualifications in the last three years, you’re required to submit a transcript outlining details of your qualifications as part of your application. See the College websites for subject requirements/preferences and admissions guidance.

### Entry requirements

<table>
<thead>
<tr>
<th>Qualification</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>GCSEs</strong></td>
<td>• There are no GCSE (or equivalent) requirements for entry to Cambridge.</td>
</tr>
<tr>
<td></td>
<td>• GCSE results are looked at as a performance indicator, but within the context of the performance of the school/college where they were achieved.</td>
</tr>
<tr>
<td><strong>A Levels</strong></td>
<td>• Refer to the relevant course entry/entries (p44-117) for typical A Level offers.</td>
</tr>
<tr>
<td></td>
<td>• Applicants may be required to achieve A* in a particular subject(s), depending on individual circumstances.</td>
</tr>
<tr>
<td></td>
<td>• Students taking any modular A Levels are required to provide details of these qualifications and UMS in the SAQ (see p7).</td>
</tr>
<tr>
<td></td>
<td>• We expect that students taking new A Levels in science subjects will complete the practical assessment.</td>
</tr>
<tr>
<td></td>
<td>• Critical Thinking is worthwhile but not acceptable as a third A Level subject for any Cambridge course.</td>
</tr>
<tr>
<td></td>
<td>• Key Skills and General Studies aren’t included in academic assessment.</td>
</tr>
<tr>
<td><strong>Extended Project</strong></td>
<td>• Applicants are encouraged to undertake an Extended Project but it won’t be a requirement of any offer made.</td>
</tr>
<tr>
<td><strong>International Baccalaureate</strong></td>
<td>• Typical offers are 40-42 points out of 45, with 776 in Higher Level subjects.</td>
</tr>
<tr>
<td>Diploma (IB)</td>
<td>• Applicants may be required to achieve 7 in a particular subject(s), depending on individual circumstances.</td>
</tr>
<tr>
<td><strong>Scottish qualifications</strong></td>
<td>• Offers usually require AAA at Advanced Higher grade; bands may be specified.</td>
</tr>
<tr>
<td></td>
<td>• In some cases, two Advanced Highers and an additional Higher may be acceptable – contact a College for advice.</td>
</tr>
<tr>
<td></td>
<td>• Three Advanced Highers are expected within the Scottish Baccalaureate.</td>
</tr>
<tr>
<td><strong>Welsh qualifications</strong></td>
<td>• Offers are conditional on three A Level subjects studied as options for the Welsh Baccalaureate Advanced Diploma. The Skills Challenge may be taken into consideration in assessment for admission, but would normally not be included as part of an offer.</td>
</tr>
<tr>
<td></td>
<td>• Students taking any modular A Levels are required to provide details of these and their UMS in the SAQ (see p7).</td>
</tr>
<tr>
<td><strong>Irish Leaving Certificate</strong></td>
<td>• Offers are based on achievement in Higher Level subjects, with H1 in subjects most relevant to the course.</td>
</tr>
<tr>
<td></td>
<td>• Courses with a typical A Level offer of A<strong>AA generally require H1, H1, H1, H2, H2, H2; and for courses with a typical A Level offer of A</strong>A*, Leaving Certificate offers are usually H1, H1, H1, H1, H2, H2.</td>
</tr>
</tbody>
</table>
## Entrance Requirements

### Qualification Notes

**Sixth Term Examination Papers in Mathematics (STEP)**
- STEP Mathematics is used to assess aptitude for university study in mathematical subjects.
- It’s used as part of almost all conditional offers from Cambridge for Mathematics. Some Colleges require/may require STEP for other courses needing strong mathematical ability.
- The STEP content is based on core A Level/IB Higher Level/Scottish Advanced Higher (or equivalent) Mathematics material, and is taken immediately after the A Level examination period. You must speak to your school/college about registering for the STEP assessments.
- More information and links to resources (including the free online STEP support programme) are available online at: [www.cam.ac.uk/step](http://www.cam.ac.uk/step).

**AQA Baccalaureate**
- Offers are conditional on achievement in the A Levels (see p151) within the qualification, rather than the overall Baccalaureate award.

**Cambridge Pre-U Diploma**
- Conditional offers are set on an individual basis but are likely to require the achievement of Distinction level grades (D2 or D3) in Principal Subjects.

**Access to HE Diploma**
- Attainment of an Access to HE Diploma with Distinctions in all relevant subject units can be acceptable preparation for most arts subjects and Psychological and Behavioural Sciences (PBS) at Cambridge.
- An Access to HE Diploma alone is not sufficient for sciences (excluding PBS) or Economics at Cambridge.
- Some courses may have additional academic requirements (see online for details).
- In all cases, contact a College admissions office for advice.

**Advanced Diploma**
- The Advanced Diploma in Environmental and Land-based Studies is acceptable for Geography and Natural Sciences (Biological). Conditions apply in all cases (details online).

**European Baccalaureate**
- 85-90 per cent overall, scores of 9 or more in subjects most closely related to the course you want to study.

**French Baccalaureate**
- 16 or 17 (‘mention très bien’) out of 20, with 16 or 17 usually required in individual subjects.

**German Abitur**
- Between 1.0 and 1.2 overall, with 14 or 15 in subjects most closely related to the course you want to study.

**Advanced Placement (AP) Tests**
- Successful applicants normally have high passes in the High School Diploma and the SAT, and 5s in at least five AP Tests in appropriate subjects.

**VCE and Applied A Levels, GNVQs and BTECs**
- These qualifications aren’t an appropriate preparation for most Cambridge courses, although a combination of A Levels and VCE or other qualifications may be acceptable for some courses.
- See the website for guidance and seek further advice from a College Admissions Tutor.

**English language requirements**
- If your first language isn’t English, please see p39.

If the qualification you’re taking isn’t listed here, please look online ([www.cam.ac.uk/uginternational](http://www.cam.ac.uk/uginternational)) as early as possible to check that it provides an appropriate preparation for the course you hope to study.

Applicants taking a mix of qualifications from different examination systems are considered providing that the individual qualifications are acceptable and any subject requirements are met. Conditional offers are made on a case-by-case basis but are normally in line with the typical offers made when the qualifications are taken on their own.
What extra-curricular activities will help my chances of admission?

As our admissions decisions are based on academic criteria (ability and potential), your participation (or not) in specific extra-curricular activities isn’t taken into account (unless it’s relevant to the course you’re applying for) and doesn’t affect your chances of being made an offer of a place at Cambridge.

However, when composing your personal statement you should consider the importance that your other university choices may place on extra-curricular activities.

What work experience do I need to have?

Work experience isn’t expected or required. However, for vocational courses, such as Medicine and Veterinary Medicine, having some relevant work experience is useful and recommended. It demonstrates commitment to your intended career and gives you the opportunity to acquire greater understanding of the realities and pressures associated with that career.

I go to a state/private school – will this disadvantage my application?

No. The University and its Colleges are committed to offering admission to students of the highest intellectual ability and potential, regardless of background (www.cam.ac.uk/admissionspolicy).

We don’t discriminate for or against applicants because of the type of school they attend, and research shows that students from different educational backgrounds do equally well at Cambridge.

Can I take a gap year?

Around six per cent of students accepted to Cambridge take a gap year. You should state your intention to defer entry in your UCAS application and be prepared to talk about your proposed year out at interview (if interviewed).

Please also refer to the specific course pages if you’re considering applying for Engineering (p66), Mathematics (p87) or the Graduate Course in Medicine (p91).

Does the University take part in Clearing or Adjustment?

The University doesn’t enter Clearing, so has no course vacancies available through Clearing. However, we anticipate that places may be available for some students through Adjustment. You can find out more information about Adjustment at www.cam.ac.uk/adjustment.

Can students at other UK universities apply?

Applications to Cambridge from students enrolled on degree courses at other UK universities are not normally considered unless there are exceptional circumstances or there is a change of subject. Any application to study at Cambridge would need strong support from your course director or other academic tutor at your current university. A reference or letter of recommendation from that person would be required before a Cambridge College would consider an application, and such applications would still be subject to the same academic assessment as any other application to the University. Contact a College admissions office for further guidance. Their contact details can be found in the Colleges section of this prospectus (p121-49).
Open Days and Events

You don’t have to visit Cambridge to apply to the University but our open days and events offer opportunities to get a feel for the place, talk to staff and students, and ask any questions.

Cambridge Open Days
4 and 5 July 2019

The Cambridge Open Days for prospective applicants in Year 12 (or equivalent) will be on 4 and 5 July (booking is essential).

All subjects will be offering course presentations and/or information stands. Tours and additional sessions may also be available in subject departments, for which separate bookings may be required.

Many Colleges will be open all day for Cambridge Open Day visitors. However, some will be holding their own College-specific event, for which a separate booking with that College is required.

See the Undergraduate Study website for more details, booking instructions and information about department and College open days.

Further information
www.cam.ac.uk/opendays
College tours
College tours are held throughout the year and are open to students in Year 12 (or equivalent) and an accompanying parent/supporter. Visitors will attend a presentation and take a guided tour of one/two Colleges. For further information, contact CAOEvents@admin.cam.ac.uk.

If you can’t attend an open day or College tour
If you can’t make an open day or College tour, you can visit at another time – College and some department grounds are open for most of the year. However, while Colleges and departments do their best to help applicants to visit them, there are restrictions and/or charges for tourists at certain Colleges and at certain times (such as during exams) so do check with the College/department before you come.

If you’d like to speak to College staff during a visit to Cambridge, please contact that College’s Admissions Office in advance to arrange this.

Other events

Subject Masterclasses
Subject Masterclasses provide an opportunity to explore topics of interest beyond what’s covered at A Level/IB Higher Level, and to experience typical undergraduate teaching at Cambridge. Each subject-specific Masterclass involves two or three taster lectures, an overview of the admissions process and chance to speak to current undergraduates.

Masterclasses are for students in Year 12 (or equivalent) and take place on selected days throughout the year – booking is required, and usually opens approximately two months before each Masterclass.

Events for your students
In addition to those already mentioned, we offer a number of other events that you may wish to consider or highlight to your students in the next academic year:

- The Subject Matters (Years 10 and 11 or equivalent)
- regional Oxford and Cambridge Student Conferences (Year 12 or equivalent)
- subject-specific residential Sutton Trust Summer Schools (Year 12 or equivalent)
- CUSU’s residential Shadowing Scheme (Year 12 or equivalent, and prospective mature students)

Some are open to any students in the relevant school year but some have eligibility criteria, and booking/application procedures vary. See the Undergraduate Study website (www.cam.ac.uk/outreachevents) or CUSU website (www.applytocambridge.com/shadowing) for details.

College Area Links Scheme
The Scheme links every local authority area in England to a specific Cambridge College. There are also links between Cambridge Colleges and Wales, Scotland and Northern Ireland.

It was established to build effective relationships with UK schools and colleges by enabling the Cambridge Colleges to develop knowledge and understanding of particular regions, and providing schools and colleges with specific contact points for the University.

If you’d like information about the University or to arrange a school visit to or from Cambridge, your link College is keen to hear from you! Each College runs its own programme of activities for schools/colleges in their link regions. For more details visit: www.cam.ac.uk/arealinks.

CUSU Target Scheme
The Target Scheme is a student-run initiative whereby current Cambridge undergraduates visit state schools/colleges across the country (where possible, in their home region). The visits are intended to give information to Year 12 (or equivalent) students and provide an opportunity for them to hear about the University from a current student’s perspective. The Target Scheme can also offer sessions on post-A Level choices for younger students.

Information about the Scheme and how to request a visit can be found online at: www.target.cusu.co.uk or by contacting the CUSU Access Officer (see p156).
Finding Out More

Should you have any further questions after reading this Prospectus, please get in touch.

Cambridge Admissions Office (CAO)
The CAO provides general advice to prospective applicants and their advisers about applying to and studying at Cambridge. This Prospectus and information about interviews and student finance are also available online.

01223 333308
admissions@cam.ac.uk
www.undergraduate.study.cam.ac.uk

Cambridge University Students’ Union (CUSU)
CUSU provides information and advice for prospective applicants on their main website and Alternative Prospectus website (which includes the ‘Ask a Student’ facility). CUSU also runs the Target Scheme and Shadowing Scheme (see p155).

Universities and Colleges Admissions Service (UCAS)
Applications to Cambridge are made online through UCAS. Once you’ve submitted your application, you’ll be able to monitor its progress using UCAS Track.

0371 468 0 468
www.ucas.com
Travelling to the University

Cambridge is a small and busy city that wasn’t built with modern traffic flows in mind, so it’s best to visit the centre – where many of the University buildings and Colleges are situated – on foot.

By car
If you’re planning to drive to Cambridge, we strongly recommend that you use the Park and Ride scheme as parking is limited and several city centre roads have restricted access. Information is available online at: www.cambridgeshire.gov.uk/parkandride.

Disabled parking is available in the city’s car parks and on some streets. Please check in advance with the Cambridge Tourist Information Centre (see opposite) or visit www.cambridge.gov.uk/parking.

By bus
Cambridge bus station is centrally located, and there’s a ‘Universal’ bus service which runs from Eddington, next to the Madingley Road Park and Ride site, through to our Biomedical Campus from Monday to Saturday, and from Eddington to Cambridge Railway Station on Sundays.

By train
Cambridge is well-connected by train and the main station is located about one mile from the city centre (around 20 minutes on foot). Buses run frequently between the station and city centre, and there’s a taxi rank outside the station.

By air
The nearest airports to Cambridge are Stansted (30 miles) and Luton (40 miles). There’s a direct train link to Cambridge from Stansted, and Heathrow and Gatwick are also easily accessible by train. In addition, buses regularly run from Stansted, Luton, Heathrow and Gatwick to the city centre.
Map for Prospective Students Visiting the University

Details of open days and booking instructions can be found on the Undergraduate Study website (www.cam.ac.uk/opendays).

The Colleges and some departments are open to prospective applicants at other times of the year but there are restrictions so you should check with the relevant College/department in advance (www.undergraduate.study.cam.ac.uk).

If you're an applicant with a disability, Specific Learning Difficulty or long-term health condition, the Building Access Guide (www.cam.ac.uk/accessguide) provides information about facilities and accessibility. If you require further guidance, please contact the Disability Resource Centre (H6, telephone: 01223 332301; email: disability@admin.cam.ac.uk).

Travelling to Cambridge

Cambridge is a small and busy city – the roads in and around the city centre often get congested and parking is very limited. Therefore, it’s best to travel into the city by public transport.

By car

We advise that visitors arriving by car use the Park and Ride services (www.cambridgeparkandride.info). Visitors from the north can also use the Guided Busway P&R – follow the signs for Longstanton P&R from Junction 29 of the A14 (www.thebusway.info).

Disabled parking is available in the city’s car parks and on some streets. Please check details in advance with the Tourist Information Centre (G5, www.visitcambridge.org).

By train

Cambridge (CBG) railway station (J7) is approximately a mile/20 minutes’ walk from the city centre. There are bus stops and a taxi rank in front of the main entrance – buses run every 10-20 minutes to St Andrew’s Street (returning to the station from Emmanuel Street (H5) or Silver Street (G5), see below).

Cambridge North (CMB) railway station (not on map) is approximately three miles north-east of the city centre. Buses run from Cambridge North to the centre every 10-20 minutes.

By bus

National bus services stop on Parkside, Parker’s Piece (I5).

Getting around Cambridge

The University’s faculties/departments and the Colleges are situated across Cambridge, though most are within walking distance of the city centre.

As Cambridge is fairly compact and better suited to pedestrians and cyclists than vehicles, wherever practical and possible we recommend getting around the city on foot or by bike – these are often the quickest means of transport and also are best for getting a sense of the city.

The Universal bus service runs between Madingley Road P&R and Addenbrooke’s Hospital (Monday to Saturday), linking some departments and Colleges with the city centre and the central train station. For information about the Universal and other local bus services, see: www.cambridgeshire.gov.uk/buses.
Map for Prospective Students Visiting the University

Details of open days and booking instructions can be found on the Undergraduate Study website (www.cam.ac.uk/opendays).

The Colleges and some departments are open to prospective applicants at other times of the year but there are restrictions so you should check with the relevant College/department in advance (www.undergraduate.study.cam.ac.uk).

If you’re an applicant with a disability, Specific Learning Difficulty or long-term health condition, the Building Access Guide (www.cam.ac.uk/accessguide) provides information about facilities and accessibility. If you require further guidance, please contact the Disability Resource Centre (H6, telephone: 01223 332301; email: disability@admin.cam.ac.uk).

Travelling to Cambridge

Cambridge is a small and busy city – the roads in and around the city centre often get congested and parking is very limited. Therefore, it’s best to travel into the city by public transport.

By car
We advise that visitors arriving by car use the Park and Ride services (www.cambridgeparkandride.info). Visitors from the north can also use the Guided Busway P&R – follow the signs for Longstanton P&R from Junction 29 of the A14 (www.thebusway.info).

Disabled parking is available in the city’s car parks and on some streets. Please check details in advance with the Tourist Information Centre (G5, www.visitcambridge.org).

By train
Cambridge (CBG) railway station (J7) is approximately a mile/20 minutes’ walk from the city centre. There are bus stops and a taxi rank in front of the main entrance – buses run every 10-20 minutes to St Andrew’s Street (returning to the station from Emmanuel Street (H5) or Silver Street (G5), see below).

Cambridge North (CMB) railway station (not on map) is approximately three miles north-east of the city centre. Buses run from Cambridge North to the centre every 10-20 minutes.

By bus
National bus services stop on Parkside, Parker’s Piece (I5).

Getting around Cambridge
The University’s faculties/departments and the Colleges are situated across Cambridge, though most are within walking distance of the city centre.

As Cambridge is fairly compact and better suited to pedestrians and cyclists than vehicles, wherever practical and possible we recommend getting around the city on foot or by bike – these are often the quickest means of transport and also are best for getting a sense of the city.

The Universal bus service runs between Madingley Road P&R and Addenbrooke’s Hospital (Monday to Saturday), linking some departments and Colleges with the city centre and the central train station. For information about the Universal and other local bus services, see: www.cambridgeshire.gov.uk/buses.

About this Prospectus

While every effort has been made to ensure that the information contained in this prospectus is accurate at the time of going to press, changes are likely to occur given the lengthy interval between publication and commencement of the course. It is therefore very important that you check the University and College websites for any updates before you apply for the course by visiting www.undergraduate.study.cam.ac.uk and again before accepting any offer to study at the University. Where there is a difference between the contents of this prospectus and these websites, the contents of the websites take precedence and represent the basis on which we intend to deliver our educational services to you.

Any offer of a place to study at the University is subject to terms and conditions which can be found at www.cam.ac.uk/termsofadmission. The terms and conditions set out, for example, your key obligations as a student and when we might make changes to your course, the fees payable and the student regulations with which all students are required to comply. Again, it is important that you do read these before making an application.

If you are unable to access our website for any reason, please contact us on +44 (0) 1223 333308

Thanks
The University would like to thank the contributors, students and prospective applicants whose input has informed the development of this publication.
Cambridge Terminology

You might come across many new and unfamiliar words, terms and expressions when you are researching your university options. Some universities mention things that are particular to their institution, and Cambridge is no exception! Listed below are some of the terms you might come across in the prospectus or on our website with a quick guide to what they mean.

**Collegiate university** – a university made up of faculties and departments in different academic subjects and Colleges. Find out who does what on p3.

**DoS** – Director of Studies. All undergraduates have a DoS who’s an expert in their subject and who is responsible for their academic welfare.

**Formal (hall)** – a College meal with waiter service, normally three courses and formal clothing (and gown) is worn. The regularity and price varies from College to College. You can find more information on the College websites.

**May Week** – confusingly, this refers to the fortnight at the beginning of June after exams finish. Most end of year celebrations (including May Balls) are held at this time.

**Matriculation** – this is the formal admission of a student to the University.

**Paper** – an individual module, unit or topic on an undergraduate course. You will usually take a number of papers each year, some compulsory and some chosen from several options. See your chosen course page for more details (p44-117).

**Pools** – if your College is impressed by your application but does not have a place for you, they may pool your application for other Colleges to consider. Find out more about our winter and summer pools on p10.

**Porters** – every College has a team of Porters to maintain the safety and security of students and staff; they’ll often be your first point of contact for information or help around College.

**Senior Tutor** – the College officer with overall responsibility for academic, welfare and disciplinary matters.

**Supervision** – regular small-group teaching sessions for undergraduates (see p13).

If you come across anything else that isn't clear or you simply want to find out more about being a student at Cambridge, have a look at our website or call the Cambridge Admissions Office (see p156).
